of medical pharmacology in response to requests from our second year medical students who were preparing to sit for the Part I examination of the National Board of Medical Examiners. The students expressed a need for an organized approach to cope with the volume of basic science curricular material presented during the

first two years. Therefore, our review book was not designed to provide a comprehensive text on pharmacology, but rather to provide the students with a significant core of information, as a refresher, after they had successfully completed a basic course in pharmacology. This book represents a major revision of our review of

medical pharmacology. The book has been reorganized, updated and expanded to provide current information on major new drugs and information on older drug groups that typically are covered on licensure examinations. The book also has been expanded to include a large number of new questions for self-examination. The faculty have
