Japanese foreign direct investment has played a leading role in Asian economies for more than two decades. This book, describing the changing industrial dynamics after the Asian currency crisis in 1997, focuses on corporate strategies of Japanese automobile and electronics companies in Asian nations, with detailed analysis of management issues and strategies from the viewpoint of both the home economy and the recipient host economies. Among the cases presented are the global restructuring of the Korean automobile industry and the transfer of automotive technology to China via Taiwan. Other studies, from the electronics industry, look at production sites in Malaysia, backward integration in Singapore, and forward integration in Hong Kong. The contributions of specialists from Asia, Europe, and the United States collected here envision an ongoing process of globalization and provide valuable perspective and background for business management and East Asian studies.

On the 1st of April 1945, a Japanese hospital ship that had been given 'safe passage' by the Allies, in the dead of night, was mistaken for a military vessel and torpedoed by the American submarine 'Queenfish.' It sank within minutes taking almost all of the 2007 passengers to their watery graves. This is the gripping story of the Awa Maru, the little known 'Titanic of Japan.' Follow the journey of Kyoko Tanaka, whose parents and brother had been passengers on the Awa Maru as she set sail on her own voyage of discovery. She travels from Japan to Singapore in search of the truth and a 'piece of her history' and makes poignant and touching discoveries of the lives of her parents and some of the other families as they prepared to board the Awa Maru. The lives of the doomed passengers of the Awa Maru and the events of that horrific night when they perished are all told in this book as never before.

The world’s preeminent environmental organization began with a layer of soot on the windowsill of a Greenwich Village apartment. Natural Resources Defense Council (NRDC) founder John H. Adams, a pioneer of environmental action, was working as a lawyer for the U.S. Attorney’s office when he and fellow lawyers teamed up to form a grassroots environmental advocacy group. Since 1970, NRDC has grown into an international powerhouse with 1.2 million members and a staff of scientists and lawyers whose mission is to safeguard the planet. This inspiring memoir tells the story of the NRDC and the environmental movement it sparked.
