A Guide to the Site and Museum Kendall Hunt

My lady, Fiammetta Bianchini, was plucking her eyebrows and biting color into her lips when the unthinkable happened and the Holy Roman Emperor's army blew a hole in the wall of God's eternal city, letting in a flood of half-starved, half-crazed troops bent on pillage and punishment. Thus begins *In the Company of the Courtesan*, Sarah Dunant's epic novel of life in Renaissance Italy. Escaping the sack of Rome in 1527, with their stomachs churning on the jewels they have swallowed, the courtesan Fiammetta and her dwarf companion, Bucino, head for Venice, the shimmering city born out of water to become a miracle of east-west trade: rich and rancid, pious and profitable, beautiful and squalid. With a mix of courage and cunning they infiltrate Venetian society. Together they make the perfect partnership: the sharp-tongued, sharp-witted dwarf, and his vibrant mistress, trained from birth to charm, entertain, and satisfy men who have the money to support her. Yet as their fortunes rise, this perfect partnership comes under threat, from the searing passion of a lover who wants more than his allotted nights to the attentions of an admiring Turk in search of human novelties for his sultan's court. But Fiammetta and Bucino's greatest challenge comes from a young crippled woman, a blind healer who insinuates herself into their lives and hearts with devastating consequences for them all. A story of desire and deception, sin and religion, loyalty and friendship, *In the Company of the Courtesan* paints a portrait of one of the world's greatest cities at its most potent moment in history: It is a picture that remains vivid long after the final page.

This journalistic masterpiece by Washington Post columnist Sebastian Mallaby charts those controversial years at the Bank under the leadership of James Wolfensohn—the unstoppable power broker whose daring efforts to enlarge the planet's wealth in an age of globalization and terror were matched only by the force of his polarizing personality. This edition features a new afterword by the author that analyzes the appointment of Paul Wolfowitz as Wolfensohn's successor at the World bank

Once you left the class, though, you were on your own. Did you know how to create and prepare a dataset for analysis? Did you know how to select and generate appropriate graphics and statistics? Did you wonder why you were forced to take the class and when you would ever use what you learned? That's where "Stats with Cats" can help you out. The book will show you: How to decide what you should put in your dataset and how to arrange the data. How to decide what graphs and statistics to produce for your data. How you can create a statistical model to answer your data analysis questions. The book also provides enough feline support to minimize any stress you may experience. Charles Kufs has been crunching numbers for over thirty years, first as a hydrogeologist, and since the 1990s as a statistician. A Guide for Practitioners Random House

Whether humans crossed the seas between the Old World and the New in the times before Columbus is a tantalizing question that has long excited scholarly interest and tempted imaginations the world over. From the myths of Atlantis and Mu to the more credible, perhaps, but hardly less romantic tales of Viking ships and Buddhist missionaries, people have speculated upon what is, after all, not simply a question of contact, but of the nature and growth of civilization itself. To the specialist, it is an important question indeed. If people in the Western Hemisphere and in the Eastern Hemisphere developed their cultures more or less independently from the end of the last Ice Age until the voyages of Columbus, the remarkable similarities between

New World and Old World cultures reveal something important about the evolution of culture. If, on the other hand, there were widespread or sustained contacts between the hemispheres in pre-Columbian times, these contacts represent events of vast significance to the prehistory and history of humanity. Originally delivered at a symposium held in May 1968, during the national meeting of the Society for American Archaeology, the papers presented here, by scholars eminent in the field, offer differing points of view and considerable evidence on the pros and cons of pre-Columbian contact between the Old World and the New. Various kinds of data—archaeological, botanical, geographical, and historical—are brought to bear on the problem, with provocative and original results. Introductory and concluding remarks by the editors pull together and evaluate the evidence and suggest ground rules for future studies of this sort. *Man across the Sea* provides no final answers as to whether people from Asia, Africa, or Europe visited the American Indian before Columbus. It does, however, present new evidence, suggested lines of approach, and a fresh attempt to delineate the problems involved and to establish acceptable canons of evidence for the future.
