At a crucial point in the twentieth century, as Nazi Germany prepared for war, negotiations between Britain, France, and the Soviet Union became the last chance to halt Hitler's aggression. Incredibly, the French and British governments dallied, talks failed, and in August 1939 the Soviet Union signed a nonaggression pact with Germany. Michael Carley's gripping account of these negotiations is not a pretty story. It is about the failures of appeasement and collective security in Europe. It is about moral depravity and blindness, about villains and cowards, and about heroes who stood against the intellectual and popular tides of their time. Some died for their beliefs, others labored in obscurity and have been nearly forgotten. In 1939 they sought to make the Grand Alliance that never was between France, Britain, and the Soviet Union. This story of their efforts is background to the wartime alliance created in 1941 without France but with the United States in order to defeat a demonic enemy. 1939 is based upon Mr. Carley's longtime research on the period, including work in French, British, and newly opened Soviet archives. He challenges prevailing interpretations of the origins of World War II by situating 1939 at the end of the early cold war between the Soviet Union, France, and Britain, and by showing how anti-communism was the major cause of the failure to form an alliance against Hitler. 1939 was published on September 1, the sixtieth anniversary of the Nazi invasion of Poland and the start of the war.

Beyond Training examines the nature of second language teacher development and how teachers' practices are influenced by their beliefs and principles. It seeks to move discussion of language teacher development beyond the level of "training," which reflects a technical view of specific teaching practices. Instead, it takes a more holistic approach to teacher development built on the notion of the teacher as critical and reflective thinker. The argument pursued throughout is that teacher education needs to engage teachers not merely in the mastery of techniques, but in an exploration of the knowledge, beliefs, and attitudes that underly their teaching practices. One of those rare books that is immediately enjoyable yet will repay many re-readings' Poetry Review Carol Ann Duffy's highly praised second collection, for which she was given the Somerset Maughan Award, showcases the Poet Laureate's skill even at the very start of her career. Within are poems that reveal the full range of her interests: from the dramatic monologues, to meditations on death and art, to poems of protest and poems of love. Throughout it all, though, is a resounding determination to give voices to those who are usually voiceless, and always apparent is her inimitable wit, wisdom and imagination. At once tender and sharp, moving and humorous, *Selling Manhattan* has dazzled both readers and critics ever since it was first published in 1987.

The definitive, easy to understand and breakthrough guide on how young people can take their limited first income and turn it into a small fortune by the time they turn thirty from an expert financial planner. Most people know that there are 70 million Baby Boomers in America today...but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

Literary Analysis: The Basics is an insightful introduction to analysing a wide range of literary forms. Providing a clear outline of the methodologies employed in twenty-first century literary analysis, it introduces readers to the genres, canons, terms, issues, critical approaches, and contexts that affect the analysis of any text. It addresses such questions as: What counts as literature? Is analysis a dissection? How do gender, race, class and culture affect the meaning of a text? Why is the social and historical context of a text important? Can digital media be analysed in the same way as a poem? With examples from ancient myths to young adult fiction, a glossary of key terms, and suggestions for further reading, *Literary Analysis: The Basics* is essential reading for anyone wishing to improve their analytical reading skills.

Abraham Lincoln never said, "You cannot fool all the people all the time."

Thomas Jefferson never said, "That government is best which governs least."

And Horace Greeley never said, "Go west, young man." In *They Never Said It*,

Paul F. Boller, Jr. and John George examine hundreds of misquotations, incorrect attributions, and blatant fabrications, outlining the origins of the quotes and revealing why we should consign them to the historical trashcan. Many of the misquotes are quite harmless. Some are inadvertent misquotes that have become popular (Shakespeare actually said, "The best part of valor is discretion"), others, the inventions of reporters embellishing a story (Franklin Roosevelt never opened a speech to a DAR group with the salutation, "My fellow immigrants"). But some of the quotes, such as Charles Darwin's supposed deathbed recantation of evolution, falsify the historical record with their blatant dishonesty. And other chillingly vicious ones, filled with virulent

racial and religious prejudices, completely distort the views of the person supposedly quoted and spread distrust and hatred among the gullible. These include the forged remarks attributed to Benjamin Franklin that Jews should be excluded from America and the fabricated condemnation of Catholics attributed to Lincoln. An entertaining and thought-provoking book, *They Never Said It* covers a great deal of history and sets it right. Going beyond a mere catalog of popular misconceptions, Boller and George reveal how rightists and leftists, and atheists and evangelists all have at times twisted and even invented the words of eminent figures to promote their own ends. The ultimate debunking reference, it perfectly complements handbooks of quotations.

**MATHEMATICAL APPLICATIONS FOR THE MANAGEMENT, LIFE, AND SOCIAL SCIENCES**, 10th Edition, is intended for a two-semester applied calculus or combined finite mathematics and applied calculus course. The book's concept-based approach, multiple presentation methods, and interesting and relevant applications keep students who typically take the course--business, economics, life sciences, and social sciences majors--engaged in the material. This edition broadens the book's real-life context by adding a number of environmental science and economic applications. The use of modeling has been expanded, with modeling problems now clearly labeled in the examples. Also included in the Tenth Edition is a brief review of algebra to prepare students with different backgrounds for the material in later chapters.
