Have you ever heard a Bible interpretation or a scientifically-based argument that just didn't seem correct? Did you wish you knew how to show that it wasn't true? In a postmodern society, Christians are increasingly confronted with assertions that contradict the principles they believe. They need to be able to critically analyze arguments and know how to

refute, in a gentle way, those assertions that are not true. In order to do this Christians need three sets of skills: -hermeneutical skills -- to know how to accurately interpret God's Word and be able to correct misinterpretations of Scripture; -research design and statistical skills -- to be able to examine statements about God's world and evaluate whether or not they represent valid conclusions from the data; -knowledge of logical fallacies -- in order to be able to identify when

invalid inductive or deductive conclusions were being drawn, either from God's Word or from research studies about God's world. This book will help you be able to do the following:

- know and use valid hermeneutical skills;
- understand research design and statistical analysis techniques;
- recognize logical fallacies and replace them with accurate analyses.

An excellent resource for pastors, Sunday school teachers, and group leaders, this book is as practical as it

want to discern truth and refute error in a spirit of love. God, Technology, and the Christian Life Canongate Books

The dual purpose of this volume—to provide a distinctively philosophical introduction to logic, as well as a logic-oriented approach to philosophy—makes this book a unique and worthwhile primary text for logic and/or philosophy courses. Logic and Philosophy covers a variety of elementary formal and informal types of reasoning, including a chapter on traditional logic that culminates in a treatment of

Aristotle's philosophy of science; a truth-functional logic chapter that examines Wittgenstein's philosophy of language, logic, and mysticism; and sections on induction, analogy, and fallacies that incorporate material on mind-body dualism, pseudoscience, the "raven paradox," and proofs of God. Throughout the book Brenner highlights passages and ideas from various prominent philosophers, and discusses at some length the work of Plato, Aristotle, Descartes, Kant, and Wittgenstein.

Who am I? Why am I here?
Where do I find meaning? Life is full of big questions. The study of philosophy seeks answers to such questions. In his latest book, prolific author Vern Poythress investigates the foundations and limitations of Western philosophy, sketching a distinctly Christian approach to answering basic questions about the nature of humanity, the existence of God, the search for meaning, and the basis for morality. Vern S. Poythress
Explains the Laws of
Human Reasoning and
How to Apply Them in
Light of the Gospel
Humans use reasoning to understand and order the world around us. We apply this logic in a variety of contexts, from classifying simple objects to considering complex philosophies. But how should our identity as Christians—made in the image of God (Gen. 1:26 – 27) with minds renewed by the Holy

Spirit (Rom. 12:1 – 2)—inform our reasoning? Vern S. Poythress explains how all human reasoning reflects God's nature. Providing a foundational understanding of God as the source of rationality, Poythress details the 3 fundamental laws of logic—identity, contradiction, and excluded middle—with a strong focus on analogical reasoning. This robust guide explains types of analogy, ethics applied to logic, the use of analogies

in the doctrines of God, and more to give readers a renewed perspective on how to use reason as a follower of God.

material world. Readers influenced by this competing worldview hold assumptions about fundamental issues—like the nature of humanity, evil, and the purpose of life—that present profound obstacles to understanding the Bible. In Inerrancy and Worldview, Dr. Vern Poythress offers the first worldview-based defense of scriptural inerrancy, showing how worldview differences create or aggravate

most perceived difficulties with the Bible. His positive case for biblical inerrancy implicitly critiques the worldview of theologians like Enns, Sparks, Allert, and McGowan. Poythress, who has researched and published in a variety of fields—including science, linguistics, and sociology—deals skillfully with the challenges presented in each of these disciplines. By directly	addressing key examples in each field, Poythress shows that many difficulties can be resolved simply by exposing the influence of modern materialism. Inerrancy and Worldview's positive response to current attempts to abandon or redefine inerrancy will enable Christians to respond well to modern challenges by employing a worldview that allows the Bible to speak on its own terms.	Christian Apologetics Baker Books This book addresses one of the most urgent issues in contemporary American law—namely, the logic and limits of extending free exercise rights to corporate entities. Oxford radically, however, this University Press approach suggests that Serious Bible readers groups themselves all recognize that there should not be viewed as are differences things or “ persons ” in between accounts of

the same events in Matthew, Mark, Luke, and John, and no responsible reader can simply sweep these differences under the rug. But can all of the accounts still be reconciled with a belief in biblical inerrancy? Responding to the questions surrounding the gospel narratives, New Testament scholar Vern Poythress contributes a worthy case for inerrancy in the gospels and helps

readers understand basic principles for harmonization. He also tackles some of the most complicated exegetical problems, showing the way forward on passages that have perplexed many, such as the centurion's servant, the cursing of the fig tree, and more. All those interested in the authority of Scripture will find in this volume great encouragement and insight as

Poythress has provided an arresting case to stem the tide of skepticism.

What global future would ensure hope, justice and peace to the human mankind? In view of a fast evolving post-Covid world order, this volume explores a novel Christian post-colonial approach to global affairs. It examines the existing 'sociology of the powers' theoretical scheme, the debate between Christian realism and Christian pacifism, the

method and practice of prophetic witnessing, to elaborate a new Christian approach to statecraft and futurology in terms of theory, methodology and ontology. This book: • Uses the COVID-19 pandemic as the background to examine why and how the pandemic has accelerated the US 's decline, and to identify the tacit game rules that contributed to the UK government 's mishandling of the pandemic; • Compares the political systems between China and the West, and engages with selected theoretical

narratives from the Global South to envision an alternative 'shared globalisation' project; • Argues why it is important for post-colonial Christian individuals and communities to get involved in this global discussion for a new world order of complex realist interdependencies grounded on hope, social justice and peace. A fresh take on global politics and international relations, this volume will be of great interest to scholars and researchers of political science, religious studies, peace studies, theology and future studies.
