Vern S. Poythress Explains the Laws of Human Reasoning and How to Apply Them in Light of the Gospel Humans use reasoning to understand and order the world around us. We apply this logic in a variety of contexts, from classifying simple objects to considering complex philosophies. But how should our identity as Christians—made in the image of God (Gen. 1:26 – 27) with minds renewed by the Holy Spirit (Rom. 12:1 – 2)—inform our reasoning? Vern S. Poythress explains how all human reasoning reflects God's nature. Providing a foundational understanding of God as the source of rationality, Poythress details the 3 fundamental laws of logic—identity, contradiction, and excluded middle—with a strong focus on analogical reasoning. This robust guide explains types of analogy, ethics applied to logic, the use of analogies in the doctrines of God, and more to give readers a renewed perspective on how to use reason as a follower of God. People are hungry for hope. They want to understand our human condition—its origin, nature, purpose, and destiny. The Christian faith offers hope for individuals and the entire universe, grounded in absolute truth. But how can we know that Christianity is true? And how can Christians confidently present their beliefs in the face of doubts

and competing views? In this comprehensive text, Douglas Groothuis makes a clear and rigorous case for Christian theism. Demonstrating how apologetics must be both rational and winsome, he addresses the most common questions and objections people raise regarding Christianity. After laying a foundation with the biblical basis for apologetics, apologetic method, and a defense of objective truth, he presents key arguments for the reality of God, a case for the credibility of Jesus, and evidence for the resurrection. Groothuis also evaluates alternative views and responds to challenges such as religious pluralism and the problem of evil. The second edition of this landmark work has been updated throughout to address current issues and sources. It includes new chapters on topics such as doubt and the hiddenness of God, the atonement, the church, and lament as a Christian apologetic. To know God in Christ, Groothuis argues, means that we desire to make Christian truth available to others in the most compelling form possible. Students, ordinary Christians, and seasoned philosophers will all find a wise guide for this endeavor in Christian Apologetics.

Interpersonal relationships are possible for humans because we are created in the image of a Trinitarian God. But if the Trinity is our model for relationships, why is the human condition rife with pain and evil? How are we to think correctly about fallen human relationships and our models for understanding them? Redeeming Sociology advocates a biblically informed model for human relationships—relationships rooted in the Trinitarian character of God, his governance of the world, and his redemption accomplished in Christ. Poythress examines how the breaking of relationships through sin leads to strife, murder, and oppression among human beings and sets cultures against one another. And he shows how these broken relationships are restored through the outworking of redemption in Christ. Though typical sociological models for interpersonal relationships may offer some valuable insights, they are handicapped by a fundamental misunderstanding of humanity. The biblical model that Poythress presents correctly diagnoses the problem of human relationships, so it can likewise prescribe a biblical solution that infuses new meaning and power into how we relate to others made in the image of God.

In recent years the Christian faith has been challenged by skeptics, including the New Atheists, who claim that belief in God is simply not reasonable. Here prominent Christian philosopher C. Stephen Evans offers a fresh, contemporary, and nuanced response. He makes the case for belief in a personal God through an exploration of natural "signs," which open our minds to theistic possibilities and foster belief in the Christian revelation. Evans then discusses why God's self-revelation is both authoritative and authentic. This sophisticated yet accessible book provides a clear account of the evidence for Christian faith, concluding that it still makes sense to believe.

"A theologically rich, spiritually edifying exploration of all that the Bible says about an awe-striking reality." –Dennis Johnson Each time God appears to his people throughout the Bible—in the form of a thunderstorm, a man, a warrior, a chariot, etc.—he comes to a specific person for a specific purpose. And each of these temporary appearances— called theophanies—helps us to better understand who he is, anticipating his climactic, permanent self-revelation in the incarnation of Christ. Describing the various accounts of God’s visible presence from Genesis to Revelation, theologian Vern S. Poythress helps us consider more deeply what they reveal about who God is and how he dwells with us today. Inerrancy and the Gospels Crossway
What if all events—big and small, good and bad—are governed by more

than just blind chance? What if they are governed by God? In this theologically informed and philosophically nuanced introduction to the study of probability and chance, Vern Poythress argues that all events—including the seemingly random or accidental—fall under God’s watchful gaze and are part of his eternal plan. Poythress tackles questions related to everything from natural disasters to the roll of the dice, explaining how God’s sovereignty functions as the lens through which we study subjects such as science, mathematics, modern physics, evolutionary biology, human choice, and gambling. Comprehensive in its scope, this book lays the theistic foundation for our scientific assumptions about the world while addressing personal questions about the meaning and significance of everyday events.

The dual purpose of this volume—to provide a distinctively philosophical introduction to logic, as well as a logic-oriented approach to philosophy—makes this book a unique and worthwhile primary text for logic and/or philosophy courses. Logic and Philosophy covers a variety of elementary formal and informal types of reasoning, including a chapter on traditional logic that culminates in a treatment of Aristotle's philosophy of science; a truth-functional logic chapter that examines Wittgenstein's philosophy of language, logic, and mysticism; and sections on induction, analogy, and fallacies that incorporate material on mind-body dualism, pseudoscience, the "raven paradox," and proofs of God. Throughout the book Brenner highlights passages and ideas from various prominent philosophers, and discusses at some length the work of Plato, Aristotle, Descartes, Kant, and Wittgenstein.

"God has appointed preaching in worship as one great means of accomplishing his ultimate goal in the world." —John Piper John Piper makes a compelling claim in these pages about the purpose of preaching: it is intended not merely as an explanation of the text but also as a means of awakening worship by being worship in and of itself. Christian preaching is a God-appointed miracle aiming to awaken the supernatural seeing, savoring, and showing of the glory of Christ. Distilling over forty years of experience in preaching and teaching, Piper shows preachers how and what to communicate from God’s Word, so that God’s purpose on earth will advance through Biblesaturated, Christ-exalting, God-centered preaching—in other words, expository exultation.

What does Christianity have to do with the study of mathematics? Prolific writer and scholar Vern Poythress offers a startling answer to this perplexing question: everything. This groundbreaking book argues that the harmony of abstract mathematical truths, the physical world of things, and the personal world of our thinking depends on the existence of the Christian God. With advanced degrees in mathematics and New Testament studies, Poythress shows that these distinct "perspectives" on mathematics cohere because all three find their origin in God’s consistent character and nature. Whether it’s simple addition and subtraction or more complex mathematical concepts such as set theory and the nature of infinity, this comprehensive book lays a theistic foundation for all mathematical inquiry.

Though the Bible presents a personal and relational God, popular modern worldviews portray an impersonal divine force in a purely material world. Readers influenced by this competing worldview hold assumptions about fundamental issues—like the nature of humanity, evil, and the purpose of life—that present profound obstacles to understanding the Bible. In Inerrancy and Worldview, Dr. Vern Poythress offers the first worldview-based defense of scriptural inerrancy, showing how worldview differences create or aggravate most perceived difficulties with the Bible. His positive case for biblical inerrancy implicitly critiques the worldview of theologians like Enns, Sparks, Allert, and McGowan. Poythress, who has researched and published in a variety of fields—including science, linguistics, and sociology—deals skillfully with the challenges presented in each of these disciplines. By directly addressing key examples in each field, Poythress shows that many difficulties can be resolved simply by exposing the influence of modern materialism. Inerrancy and Worldview's positive response to current attempts to abandon or redefine inerrancy will enable Christians to respond well to modern challenges by employing a worldview that allows the Bible to speak on its own terms.
