of this text continues informal logic to provide a comprehensive introduction to Logic, a subject that is increasingly becoming popular among students. What distinguishes the text is its graded step-by-step approach to the subject, with forming the basis and Symbolic logic and Inductive logic forming the more advanced steps. The book also uses a hands-on approach to teaching of logic to induce self-learning, as shown in sections such as on how to create a

The Experiment Crash Course

in Logic is a booklet designed to introduce basic principles of logic and critical thinking to students so they can better express their ideas. Many high school and college students have trouble constructing theoretical arguments and writing clearly because they are not acquainted with the forms of reasoning that are

presented in this booklet. Intended as a supplement to other instructional material for a variety of courses, this booklet will guide students through a mini-course on logic that includes many examples and exercises. With knowledge of the basic forms of reasoning, students will have the tools necessary to solve problems and evaluate

---

arguments as well as articulate their own ideas and insights clearly. Crash Course in Logic will be of great value to teachers of any subject who are searching for an accessible way to teach critical thinking and reasoning to their students. <u>LOGIC</u> Cengage Learning Rhetorical Strategies is a worktext for composition students to	apply rhetorical theory in their writing. The exercises interconnect rhetorical skill work for students to practice "thinking on paper" in style (rhetorical figures, emphasis, arrangement); language (audience appropriate, diction, syntax); and conventions (MLA style, format, source handling). Content includes:	Aristotle's Six Parts of an Argument, Rhetorical Situations, Appeals and Fallacies, Thesis Statements, Topic Sentences, Voice, Stylistics, Revision, Documenting Sources, Grammar/Punctuation/Usage, and Visual Arguments. All skills are reflected in a sample student research paper. Content is relevant for AP Composition

From the Authors of Engineering Writing by Design:  
Creating Formal Documents of Lasting Value  
Engineering presentations are often a topic of frustration.  
Engineers complain that they don't enjoy public speaking, and that they don't know how to address audiences with

varying levels of technical knowledge.  
Their colleagues complain about the state of information transfer in the profession. Non-engineers complain that engineers are boring and talk over everybody's heads. Although many public speaking books exist, most concentrate on surface issues, failing to distinguish the formal oral technical presentation from general public speaking.

with Real Impact is inherently valuable in that it shows engineers how to leverage what they already know. The book's mantra is: if you can think like an engineer, you can speak like an engineer. Supplementary Exercise Booklet A Crash Course in Logic Falsehood and Fallacy shows students how to evaluate what they read in a digital age now that old institutional gatekeepers, such as the media or institutions of higher education, no longer hold a monopoly on disseminating knowledge. Short chapters cover the problems that exist as a result of the current flow of unmediated information, Fake News, and bad arguments, and demonstrate how to critically evaluate sources - particularly those that appear online. Kilcrease provides a range of tools to help students evaluate the legitimacy of what they read. She discusses how to be on the lookout for bad arguments and logical fallacies and explains how students can produce clear and convincing academic writing. Exercises are included throughout the book to test student knowledge. Written in a positive style and full of useful tools and exercises, Falsehood and Fallacy embraces the idea that everyone is a writer and has aptitude for further growth. **McGraw-Hill**
