I recently bought Logitech z323 speaker system and connected directly to the projector via a set twin phono RCA cables but there's no sound coming through the speakers just the in-built projector speaker. Is it possible for the Logitech speakers to work by connecting to the projector or even the Sky Box or do I need to buy an additional amp ...

I have the Logitech
Z623 2:1 speaker

system and it works
just fine with the
Logitech bluetooth
audio adaptor. The
volume is loud and the
bass awesome when I
connect my iphone via
bluetooth. I want to
use the speaker system
for my laptop, which
does not have
bluetooth, but in any
case I want to connect
via a cable rather than
bluetooth.
