context for its aims and purposes." Subtitled: The Guy Croft  
- Electronics Weekly Robots exist all around us. They populate our factories, assist our surgeons and have become an integral part of our armed forces. But they are not just working behind the scenes – impressive inventions such as free-roaming hoovers take care of your household chores and the iPal is set to become your closest friend. David Hambling reveals the groundbreaking machines – once the realm of science fiction – that are by our sides today, and those that are set to change the future forever. From the Reem robocop that polices the streets of Dubai to the drones that deliver our parcels and even the uncanny Gemonoid Hi-4 built to look just like you, here are fifty unique robots that reach into every aspect of our daily lives. We: Robot examines why robots have become embedded in our culture, how they work and what they tell us about our society and its future.

When owning a  
narrow boat, or any  
engine-powered  
vessel, it is vital  
to ensure that the  
engine is kept in  
good working order.  
Narrow Boat Engine  
Maintenance and  
Repair is a  
practical guide to  
help keep your

engine operational,  
and your boat  
moving. It also  
provides  
instruction on how  
to identify faults  
and, where  
possible, how to  
fix them. With its  
focus on diesel  
engine operation,  
and the systems  
found on most  
vessels, this is a  
useful resource for  
any boat owner. It  
provides practical  
guidance to  
undertake everyday  
maintenance on your  
diesel engine; it  
demonstrates how to  
complete a service  
and locate and  
resolve common

This book contains a collection of peer-review scientific papers about marine engines' performance and emissions. These papers were carefully selected for the

"Marine Engines Performance and Emissions" Special Issue of the Journal of Marine Science and Engineering. Recent advancements in engine technology have allowed designers to reduce emissions and improve performance. Nevertheless, further efforts are needed to comply with the ever increased emission legislations. This book was conceived for people interested in marine engines. This information concerning recent developments may be helpful to academics, researchers, and professionals engaged in the field of marine engineering.

operate from a high-cost location such as Switzerland. The book enhances these insights by providing detailed company profiles documenting the company history, development, and how their relevant global niche positions were reached. Readers will benefit from these profiles as they compile a diverse selection of industries, mainly active within the B2B sector, with mostly mature companies (60 years to older than 100 years since founding) and different types of ownership structures including family firms. 'Masterpieces of Swiss Entrepreneurship' brings unique learning opportunities to owners and leaders of SMEs in Switzerland and elsewhere. Findings are based on detailed bottom-up research of 36 companies -- without any preconceived notions.

The book is both conceptual and practical. It fosters understanding for different choices in development pathways and management practices. Matti Alahuhta, Chairman DevCo Partners, ex-CEO Kone, Board member of several global listed companies, Helsinki, Finland Start-up entrepreneurs need proven models from industry which demonstrate the various paths to success.

"Masterpieces of Swiss Entrepreneurship" provides deep insights highlighting these models and the important trade-offs entrepreneurial teams must consider when choosing the path of high growth or of maximum control, as they are often mutually exclusive.
