Long-term care hospital (LTCH). ... You're transferred to a LTCH directly from an acute care

hospital. You're admitted to a LTCH within 60 days of being discharged from a hospital. What it is. LTCHs specialize in treating patients that are hospitalized for more than 25 days. Patients may include people who've used ventilators for an ...

Long-Term Acute Care Hospitals (LTACH) | MCG Health

Long-term care hospitals (LTCH) provide acute care for Medicare patients who need extended or more intensive care. While many traditional hospitals are also “acute care hospitals,” LTCHs are licensed acute care hospitals that specialize in treating patients who need more time to recover.

Coding in the Long Term Acute Care Setting

Long-term acute care hospitals, or LTACHs, care for a relatively small proportion of Medicare beneficiaries but account for a substantial cost. In fiscal year

(FY) 2014, approximately 118,000 beneficiaries were cared for in an LTACH, with an associated cost of 5.4 billion dollars.

Long-Term Acute Care Program Billing Guide
October 1, 2016 Every effort has been made to ensure this guide’s accuracy. If an actual or apparent conflict between this document and an agency rule arises, the agency rules apply.

Long-Term Acute Care Program Billing Guide
Post-acute care settings include long-term care hospitals (LTCHs), inpatient rehabilitation facilities (IRFs), skilled nursing facilities (SNFs) and home health agencies. AHA supports enhanced coordination between general acute-care hospitals and post-acute providers to improve overall quality of

care and reduce total health spending.

Medicare Coverage and Long-Term Acute Care Hospital Stays

The long term acute care (LTAC) facility, also known as a long term care hospital (LTCH), must meet the Medicare requirements for accreditation and licensure in the state in which the LTCH is doing business. The member’s need for nursing and rehabilitative services are such that only an
