The Imperial Messenger Routledge  
This revised edition of the number-one bestseller and winner of the 1989 National Book Award includes the Pulitzer Prize-winning author's new, updated epilogue. One of the most thought-provoking books ever written about the Middle East, From Beirut to Jerusalem remains vital to our understanding of this complex and volatile region of the world. Three-time Pulitzer Prize winner Thomas L. Friedman drew upon his ten years of experience reporting from Lebanon and Israel to write this now-classic work of journalism. In a new afterword, he updates his journey with a fresh discussion of the Arab Awakenings and how they are transforming the area, and a new look at relations between Israelis and Palestinians, and Israelis and Israelis. Rich with anecdote, history, analysis, and autobiography, From Beirut to Jerusalem will continue to shape how we see the Middle East for many years to come. "If you're only going to read one book on the Middle East, this is it."--Seymour M. Hersh

Version 2.0, Updated and Expanded, with a New Afterword We all sense it—something big is going on. You feel it in your workplace. You feel it when you talk to your kids. You can ’ t miss it when you read the newspapers or watch the news. Our lives are being transformed in so many realms all at once—and it is dizzying. In Thank You for Being Late, version 2.0, with a new afterword, Thomas L. Friedman exposes the tectonic movements that are reshaping the world today and explains how to get the most out of them and cushion their worst impacts. His thesis: to understand the twenty-first century, you need to understand that the planet ’ s three largest forces—Moore ’ s law (technology), the Market (globalization), and Mother Nature (climate change and biodiversity loss)—are accelerating all at once. These accelerations are transforming five key realms: the workplace, politics, geopolitics, ethics, and community. The year 2007 was the major inflection point: the release of the iPhone, together with advances in silicon chips, software, storage, sensors, and networking, created a new technology platform that is reshaping everything from how we hail a taxi to the fate of nations to our most intimate relationships. It is providing vast new opportunities for individuals and small groups to save the world—or to destroy it. With his trademark vitality, wit, and optimism, Friedman shows that we can overcome the multiple stresses of an age of accelerations—if we slow down, if we dare to be late and use the time to reimagine work, politics, and community. Thank You for Being Late is an essential guide to the present and the future.

Globalization: Key Thinkers offers a critical commentary on the leading thinkers in the contemporary globalization debate, as well as new arguments about the future direction of globalization thinking. The book guides the reader through the key arguments of leading thinkers, explaining their place in the wider globalization debate and evaluating their critical reception. Eleven thematic chapters focus on one or two key thinkers covering every aspect of the globalization debate including the theoretical arguments of Anthony Giddens and Manuel Castells, to the positive arguments of Thomas Friedman and Martin Wolf and the reforming ideas of Joseph Stiglitz. Other chapters variously address the ideas of Immanuel Wallerstein, Arjun Appadurai, Paul Hirst, Naomi Klein, Grahame Thompson, David Held, Anthony McGrew, Michael Hardt, Antonio Negri, Saskia Sassen and Peter Dicken. Each chapter also provides some carefully selected recommendations for further reading for the thinkers discussed. The book ends with a concluding chapter that examines how thinking about globalization is likely to develop in future. Whilst individual chapters can stand alone, the book is designed as a whole to enhance the reader's understanding of how different thinkers' ideas relate and contrast to each other.

In this brilliant, essential book, Pulitzer Prize-winning author Thomas L. Friedman speaks to America's urgent need for national renewal and explains how a green revolution can bring about both a sustainable environment and a sustainable America. Friedman explains how global warming, rapidly growing populations, and the expansion of the world's middle class through globalization have produced a dangerously unstable planet--one that is "hot, flat, and crowded." In this Release 2.0 edition, he also shows how the very habits that led us to ravage the natural world led to the meltdown of the financial markets and the Great Recession. The challenge of a sustainable way of life presents the United States with an opportunity not only to rebuild its economy, but to lead the world in radically innovating toward cleaner energy. And it could inspire Americans to something we haven't seen in a long

time--nation-building in America--by summoning the intelligence, creativity, and concern for the common good that are our greatest national resources. Hot, Flat, and Crowded is classic Thomas L. Friedman: fearless, incisive, forward-looking, and rich in surprising common sense about the challenge--and the promise--of the future.

Globalization is speeding up our world, extending our relationships globally and bringing us closer together in positive and not-so-positive ways. The church and many Christians, however, remain largely unaware of its seductive power, resulting in a failure of vision for mission in today's world. This up-to-date resource by a veteran leader in global development work with World Vision orients readers to the history of globalization and to a Christian theological perspective on it, explores concrete realities by focusing on global poverty, and helps readers reimagine Christian mission in ways that announce the truly good news of Christ and God's kingdom. Diagrams and sidebars that incorporate the voices of global partners are included. This is the second book in a new series that reframes missiological themes and studies for students using/featuring the common theme of mission as partnership with Christians.

Best-selling author Thomas Friedman says that globalization has made the world flat and that we cannot stop the process. But while it is right to say that globalization tends to flatten our world, it is wrong to say that there are no alternatives to current patterns of economic, ecological, political, and cultural integration. This book argues that the Christian liturgical calendar provides a constructive alternative to the globalization of economics, ecologies, politics, and cultures. It does so by incorporating the church into the fullness of time in the gospel narrative, thereby helping us escape from the dead end of Friedman's flat world so that we can improvise healthier ways of being globally integrated.  
Globalization, Spirituality, and Justice Revised Edition ABC-CLIO  
The Imperial Messenger reveals the true value of this media darling, a risible writer whose success tells us much about the failures of contemporary journalism. Belén Fernández dissects the Friedman corpus with wit and journalistic savvy to expose newsroom practices that favor macho rhetoric over serious inquiry, a pacified readership over an empowered one, and reductionist analysis over integrity. The Imperial Messenger is polemic at its best, relentless in its attack on this apologist for American empire and passionate in its commitment to justice. About the series: Counterblasts is a new Verso series that aims to revive the tradition of polemical writing inaugurated by Puritan and leveller pamphleteers in the seventeenth century, when in the words of one of them, Gerard Winstanley, the old world was “running up like parchment in the fire.” From 1640 to 1663, a leading bookseller and publisher, George Thomason, recorded that his collection alone contained over twenty thousand pamphlets. Such polemics reappeared both before and during the French, Russian, Chinese and Cuban revolutions of the last century. In a period of conformity where politicians, media barons and their ideological hirelings rarely challenge the basis of existing society, it’s time to revive the tradition. Verso’s Counterblasts will challenge the apologists of Empire and Capital.

As the U.S. Muslim population continues to grow, Islamic schools are springing up across the American landscape. Especially since the events of 9/11, many have become concerned about what kind of teaching is going on behind the walls of these schools, and whether it might serve to foster the seditious purposes of Islamist extremism. The essays collected in this volume look behind those walls and discover both efforts to provide excellent instruction following national educational standards and attempts to inculcate Islamic values and protect students from what are seen as the dangers of secularism and the compromising values of American culture. Also considered here are other dimensions of American Islamic education, including: new forms of institutions for youth and college-age Muslims; home-schooling; the impact of educational media on young children; and the kind of training being offered by Muslim chaplains in universities, hospitals, prisons, and other such settings. Finally the authors look at the ways in which Muslims are rising to the task of educating the American public about Islam in the face of increasing hostility and prejudice. This timely volume is the first dedicated entirely to the neglected topic of Islamic education.  
*Lessons amid the Rubble* Univ of California Press  
The war in Iraq, Afghanistan, continual conflict in the Middle East, and the global war on terrorism, are all intertwined in a greater battle of global conflict: World War III. However, the fogs that have been created to hide these conflicts from public opinion are obstructing a clear view of reality. Fogs prevent the public from accurately seeing this war unfold and from taking action in the government to help prevent, this now, inevitable conflict. This work unveils that the media and government are two thickening fogs that continue to obscure the reality of what is occurring. Media does little to help develop an in-depth understanding of the world. In turn this creates limited interest in reporting of foreign affairs among

the market sectors they strive to reach. The government has focused on winning the hearts and minds of the American people in order to drive the cause of the war on terrorism. Yet, this war has unleashed greater struggles, which citizens have covertly been blinded to. While these global conflicts are seemingly isolated, the authors illustrate that they are, in fact, closely linked with similar underlying causes. The fogs of war and peace need to lessen so the American people can be accurately informed and global leaders are able to strive for better policies in order to bring World War III to an end. Seemingly unrelated conflicts raging in Iraq, Afghanistan, the Middle East, and other global areas, are in fact, closely linked, as part of a greater battle, World War III. In the midst of conflict, this work delves into factors of World War III, and claims that we have already begun this new war. However, in an age where the average American citizen is uninformed on international foreign policy and conflict, the two fogs of government and media, are only contributing to this miseducation. These fogs have never been thicker in obscuring the reality of what is occurring. The fog that is media, explains what is occurring in cryptic sound bites by funneling certain information to the American people. Government, the second fog, affects citizens by either withholding or distorting information and opponents, and expands a great effort to deceive and distort current events. In turn it tries to win the hearts of the people by explaining that this is the only way to obtain the idea of peace. This work explains that through the distorted reality of the fogs, we are now in a stage of disinformation, misinformation, and noninformation, which block the view of citizens from what is truly happening and how to deal with it. It is the first analytical model that clearly examines the fogs of war and peace and how new perspectives must be found. The authors offer a model to help inform readers to better understand World War III, while illuminating the causes, nature, and dynamics of the global concern. In turn, they offer new policy directions for political leaders in America, Israel, and Europe and hope to bring to light these fogs of destruction.

In this fresh, literate, and biting critique of current thinking on some of today's most important and controversial topics, leading anthropologists take on some of America's top pundits. This absorbing collection of essays subjects such popular commentators as Thomas Friedman, Samuel Huntington, Robert Kaplan, and Dinesh D'Souza to cold, hard scrutiny and finds that their writing is often misleadingly simplistic, culturally ill-informed, and politically dangerous. Mixing critical reflection with insights from their own fieldwork, twelve distinguished anthropologists respond by offering fresh perspectives on globalization, ethnic violence, social justice, and the biological roots of behavior. They take on such topics as the collapse of Yugoslavia, the consumer practices of the American poor, American foreign policy in the Balkans, and contemporary debates over race, welfare, and violence against women. In the clear, vigorous prose of the pundits themselves, these contributors reveal the hollowness of what often passes as prevailing wisdom and passionately demonstrate the need for a humanistically complex and democratic understanding of the contemporary world. In the run-up to the Iraq invasion, a number of Americans thought the idea was crazy. Now everyone, except a few die-hards, thinks it was. So what was going through the minds of the talented and experienced men and women who planned and initiated the war? What were their assumptions? Overreach aims to recover those presuppositions.

The battle for hearts and minds in the Middle East is being fought not on the streets of Baghdad, but on the newscasts and talk shows of Al Jazeera. The future of China is being shaped not by Communist Party bureaucrats, but by bloggers working quietly in cyber cafes. The next attacks by al Qaeda will emerge not from Osama bin Laden's cave, but from cells around the world connected by the Internet. In these and many other instances, traditional ways of reshaping global politics have been superseded by the influence of new media--satellite television, the Internet, and other high-tech tools. What is involved is more than a refinement of established practices. We are seeing a comprehensive reconnecting of the global village and a reshaping of how the world works. Al Jazeera is a paradigm of new media's influence. Ten years ago, there was much talk about "the CNN effect," the theory that news coverage--especially gripping visual storytelling--was influencing foreign policy throughout the world. Today, "the Al Jazeera effect" takes that a significant step further. The concept encompasses the use of new media as tools in every aspect of global affairs, ranging from democratization to terrorism, and including the concept of "virtual states." "The media" are no longer just the media. They have a larger popular base than ever before and, as a result, have unprecedented impact on international politics. The media can be tools of conflict and instruments of peace; they can make traditional borders

irrelevant and unify peoples scattered across the globe. This phenomenon, the Al Jazeera effect, is reshaping the world.

This volume addresses the promise and peril of post-9/11 interfaith trialogue. In fifteen clearly written and insightful essays, distinguished scholars of different faiths and divergent world views guide readers toward an informed understanding of the role of religion and the basic teachings of Judaism, Christianity, and Islam in the aftermath of the September 11 terror attacks on the United States. Acknowledging commonalities, these essays also shed light on the essential differences among the teachings of the Abrahamic traditions and raise pivotal questions regarding humanity's future: What prompted the carnage? What has changed since then? What remains to be achieved? Dispelling ignorance about the religious other is a necessary but only a first step toward achieving a durable and effective trialogue. In an increasingly perilous and interconnected world where the effects of globalization are yet to be fully recognized, interfaith trialogue holds out the hope of genuine movement toward a more peaceful coexistence.

This new edition of Manfred Steger's award-winning book explores the three principal ideologies of our time: the neoliberal "market globalism," the "justice globalism" of the global justice movement, and the "jihadist globalism" of radical Islamists. Steger, one of the world's leading scholars on these subjects, explores globalization's central questions: What, exactly, are the core claims of these conflicting globalisms? What are the most likely future trajectories of this great ideological struggle of the twenty-first century? Written with impressive historical and theoretical breadth, this groundbreaking work is essential reading for all those concerned with the key questions that our shrinking world must face.

From the Pulitzer Prize-winning New York Times columnist and bestselling author of From Beirut to Jerusalem and The Lexus and the Olive Tree comes this smart, penetrating, brilliantly informed book that is indispensable for understanding today's radically new world and America's complex place in it. Thomas L. Friedman received his third Pulitzer Prize in 2002 "for his clarity of vision, based on extensive reporting, in commenting on the worldwide impact of the terrorist threat." In Longitudes and Attitudes he gives us all of the columns he has published about the most momentous news story of our time, as well as a diary of his private experiences and reflections during his post-September 11 travels. Updated for this new paperback edition, with over two years' worth of Friedman's columns and an expanded version of his diary, Longitudes and Attitudes is a broadly influential work from our most trusted observer of the international scene.
