Lost Discoveries The Ancient Roots

[Lost Discoveries: The Ancient Roots of Modern Science ...](#)

Lost Discoveries explores the mostly unheralded scientific breakthroughs from the ancient world - Babylonians, Egyptians, Indians, Africans, New World, and Oceanic tribes, among others, and from the non-European medieval world. By example, the Egyptians developed the concept of the lowest common denominator and the Indians developed the use of zero and negative numbers.

Lost discoveries : the ancient roots of modern science ...

The author of "Lost Discoveries" claims he began to write "with the purpose of showing that the pursuit of evidence of nonwhite science is a fruitless endeavor," but his goal changed when he kept finding "examples of ancient and medieval non-Western science that equaled and often surpassed ancient Greek learning."

Mapping the Heavens, Curing Dandruff - The New York Times

Lost Discoveries, Dick Teresi's innovative history of science, explores the unheralded scientific breakthroughs from peoples of the ancient world -- Babylonians, Egyptians, Indians, Africans, New World and Oceanic tribes, among others -- and the non-European medieval world. They left an enormous heritage in the fields of mathematics, astronomy, cosmology, physics, geology, chemistry, and technology.
