In this era of tweets and blogs, it is easy to assume that the self-obsessive recording of daily minutiae is a recent phenomenon. But Americans have been navel-gazing since nearly the beginning of the republic. The daily planner—variously called the daily diary, commercial diary, and portable account book—first emerged in colonial times as a means of telling time, tracking finances, locating the nearest inn, and even planning for the coming winter. They were carried by everyone from George Washington to the soldiers who fought the Civil War. And by the twentieth century, this document had become ubiquitous in the American home as a way of recording a great deal more than simple accounts. In this appealing history of the daily act of self-reckoning, Molly McCarthy explores just how vital these unassuming and easily overlooked stationery staples are to those who use them. From their origins in almanacs and blank books through the nineteenth century and on to the enduring legacy of written introspection, McCarthy has penned an exquisite biography of an almost ubiquitous document that has borne witness to American lives in all of their complexity and mundanity.

On a hot summer day in 1876, George Armstrong Custer led the Seventh Cavalry to the most famous defeat in U.S. military history. Outnumbered and exhausted, the Seventh Cavalry lost more than half of its 400 men, and every soldier under Custer's direct command was killed. It's easy to understand why this tremendous defeat shocked the American public at the time. But with Custerology, Michael A. Elliott tackles the far more complicated question of why the battle still haunts the American imagination today. Weaving vivid historical accounts of

Custer at Little Bighorn with contemporary commemorations that range from battle reenactments to the unfinished Crazy Horse memorial, Elliott reveals a Custer and a West whose legacies are still vigorously contested. He takes readers to each of the important places of Custer's life, from his Civil War home in Michigan to the site of his famous demise, and introduces us to Native American activists, Park Service rangers, and devoted history buffs along the way. Elliott shows how Custer and the Indian Wars continue to be both a powerful symbol of America's bloody past and a crucial key to understanding the nation's multicultural present. "[Elliott] is an approachable guide as he takes readers to battlefields where Custer fought American Indians . . . to the Michigan town of Monroe that Custer called home after he moved there at age 10 . . . to the Black Hills of South Dakota where Custer led an expedition that gave birth to a gold rush."—Steve Weinberg, Atlanta Journal-Constitution "By 'Custerology,' Elliott means the historical interpretation and commemoration of Custer and the Indian Wars in which he fought not only by those who honor Custer but by those who celebrate the Native American resistance that defeated him. The purpose of this book is to show how Custer and the Little Bighorn can be and have been commemorated for such contradictory purposes."—Library Journal "Michael Elliott's Custerology is vivid, trenchant, engrossing, and important. The American soldier George Armstrong Custer has been the subject of very nearly incessant debate for almost a century and a half, and the debate is multicultural, multinational, and multimedia. Mr. Elliott's book provides by far the best overview, and no one interested in the long-haired soldier whom the Indians called Son of the Morning Star can afford to miss it."—Larry McMurtry Enduring Legacy Penguin

"The year 2020 will mark the fortieth anniversary of the publication of Charles Reagan Wilson's classic study *Baptized in Blood: The Religion of the Lost Cause, 1865-1920*. Conceived in part to honor this milestone, this multiauthor volume seeks to show how various aspects of Lost Cause ideology persist into the present. Among the contributors to this work are Carolyn Dupont, Sandy Dwayne Martin, Colin Chapell, Keith Harper, and Charles Reagan Wilson himself. Among the many aspects of the Lost Cause to be considered are the following: the impact of Lost Cause ideology on southern Christianity; the difficulty of evading neo-Confederate narratives in education; and the influence of Confederate catechisms in keeping Lost Cause ideology alive and well"--

Forgotten Legacy ABRAMS

Marriage aims at the glory of God through intimate companionship. God meant husband and wife to walk together, talk together, work together, and sleep together. As the Puritans said, God did not make the woman out of man's head to control him, or out of his feet for him to trample on her, but out of his side to be embraced near to his heart. Here is a book of practical encouragements for

two key aspects of marriage: companionship and sex. Dr. Joel Beeke draws upon the wisdom of the Holy Scriptures and over three decades of pastoral ministry to present a dozen practical principles for fanning into flame the fire of love between husband and wife. The Bible has a higher aim than a satisfying marriage, namely, glorying in God forever. Marriage will one day be done, made obsolete by the magnificent relationship between Christ and His people. Even now, marriage is neither the chief purpose nor the highest joy of man. But the Scriptures do call wedded people to glorify God here and now through their marriages. Dr. Beeke's book aims to assist them in this. In Part I ("Friends"), the book explores the meaning, cultivation, and threats to friendship in marriage. Friendship is that personal bond of shared life that brings people together in delightful harmony. It is rooted God's created order of making men and women in His image. We broke this harmonious order when our first parents sinned against God, simultaneously turning against each other. But Christ is the great peacemaker and friendship-restorer. Cultivating friendship with your spouse is hard work, but profoundly rewarding. It revolves around sharing life together. The book gives guidance in how to share yourself with your spouse through the gifts of time, discussing decisions, listening to each other's feelings, talking about how God is at work in your lives, praying together, building trust, laughing together, giving thanks, pleasing your spouse, and finding shared interests. It also walks the reader through the minefields of giving and receiving correction, honoring in-laws, having balanced friendship with others, and supporting on another in crises. Above all, we must remember that our most important friendship is with our Lord Jesus Christ, who alone can walk with us through life, death, and eternity. In Part II ("Lovers"), Dr. Beeke sets forth several ways in which the gospel energizes married Christians to enjoy sex in holy delight. The words "gospel," "sex," and "holy," may not seem to go together. This book shows that in reality sexual love between husband and wife is both a holy duty pleasing to God and blessed privilege empowered by Christ's grace. Rather than splitting our lives into different compartments such as sex and religion, God calls us to respond to Christ's mercies by offering our whole existence to Him as a living sacrifice. The Bible teaches us doctrines like the image of God in man, the creation mandate God laid upon the human race, the moral law for marriage, forgiveness of sins by faith in Christ, sanctification by divine grace, Christ's call to take up our cross, adoption by God, and turning from idols to give thanks to God. All these doctrines have massive implications for our sexual relationship with our spouses. However these doctrines must do more than sit in our minds; they must sink into our hearts. In Reformed, experiential fashion, Dr. Beeke leads the reader to know, believe, feel, and act based upon God's Word applied by God's Spirit.

Afghanistan's Experiences Princeton University Press

At the turn of the twentieth century, Montana started emerging from its rugged past. Permanent towns and cities, powered by mining, tourism, and trade, replaced ramshackle outposts. Yet Montana's frontier endured, both in remote pockets and in the wider cultural imagination. The frontier thus played a continuing role in Montanans' lives, often in fascinating ways. Author John Clayton has written extensively on these shifts in Montana history, chronicling the breadth of the frontier's legacy with this diverse collection of stories. Explore the remnants of Montana's frontier through stories of the Little Bighorn Battlefield, the Beartooth Highway, and the lost mining camp of Swift Current--and through legendary characters such as Charlie Russell, Haydie Yates, and "Liver-eating" Johnston.

Afghanistan's Experiences is a sweeping analysis of the historic events and interplay between politics, religion, and terrorism in Afghanistan, the southeastern region of the country, and beyond. The author has vividly explained the origin and the rise of Taliban to power one of the most important sources of turmoil in contemporary time. Thus, one can perceive how the dynamics of the sinister politics, religious extremism, and terrorism has culminated in avoidable brutal wars and human tragedies.

Hamid Hadi has vividly described and put into political debate Afghanistan's history; the implications of the Russian invasion of Afghanistan; the Americans, the Pakistanis, and Saudis role in the civil war; and the creation of the al-Qaeda that led to the 9/11 tragedy. In a unique research and analysis, the author has examined the acts of Islamic terrorists against the American people and institutions during the last 176 years and brilliantly deduced that the Russian invasion of Afghanistan was a watershed era in the formation of contemporary terrorism and that the failure of both superpowers foreign policy in Afghanistan to a great extent has resulted in growth of the terrorist network. Besides a detailed description of the 9/11 tragedy and Iraq war, Hamid Hadi has painstakingly brought the world religions and Abrahamic religions in particular into debate and discussed the reform of the Islamic faith.

Early Muslim culture set the foundation for the Renaissance of Europe and for nearly every aspect of the modern world. In this age of conflict, "Lost History" provides a vital look at the Muslim world and its deep connection to all cultures. Unlike many histories, which address the noted Arab Golden Age of Baghdad, Persia, and Muslim Spain from 632 to 1258 AD and the fall of Baghdad, "Lost History" reveals the many 'golden ages' of Muslim thought, from Shiite Iran to Mughal India, to the 18th century. Engaging chapters introduce a contemporary accountant, obstetrician, civil engineer, or astrophysicist, all whose work is linked to early Muslim advancements. Artful flashbacks render page - turning accounts of such luminaries as Al Ma'mun, who founded Baghdad's international House of Wisdom from which came foundations for modern math, astronomy, chemistry, medicine, and literature; Al Khwarizmi, often considered the Father of Algebra, whose invention of algorithms makes possible cell phones today; revered Arab philosopher Al Kindi, who wrote, 'nothing should be dearer to the seeker of truth than the truth itself;' Astronomer Al Manon, for whom is named a crater of the moon; the exiled Emir Abdal Rahman, who brought to Cordoba, Spain, irrigation systems and unique architecture; and the Syrian - born Al Nafis, who revealed that the blood flows from the heart, through the lungs, to the body and back again. Finally, readers discover that Omar Khayyam, well - loved poet of the Rubaiyat, was a mathematical wizard who calculated the length of a year to be 365.242 days (later calculated by atomic clocks to within millionths of a second). Writes the author: 'By recovering lost history together, maybe we can really get at the issues of today that will never be solved by force. Because if there is no other lesson to be drawn from "Lost History", it is that force rarely ever positively resolves issues of the spirit and the soul - whether in individuals, or in civilizations.'

One out of five Americans, more than 55 million people, are first-or second-generation immigrants. This landmark study, the most comprehensive to date, probes all aspects of the new immigrant second generation's lives, exploring their immense potential to transform American society for better or worse. Whether this new generation reinvigorates the nation or deepens its social problems depends on the social and economic trajectories of this still young population. In *Legacies*, Alejandro Portes and Rubén G. Rumbaut—two of the leading figures in the field—provide a close look at this rising second generation, including their patterns of acculturation, family and school life, language, identity, experiences of discrimination, self-esteem, ambition, and achievement. Based on the largest research study of its kind, *Legacies* combines vivid vignettes with a wealth of survey and school data. Accessible, engaging, and indispensable for any consideration of the changing face of American society, this book presents a wide range of real-life stories of immigrant families—from Mexico, Cuba, Nicaragua, Colombia, the Dominican Republic, Haiti, Jamaica, Trinidad, the Philippines, China, Laos, Cambodia, and Vietnam—now living in Miami and San Diego, two of the areas most heavily affected by the new immigration. The authors explore the world of second-generation youth, looking at patterns of parent-child conflict and cohesion within immigrant families, the role of peer groups and school

subcultures, the factors that affect the children's academic achievement, and much more. A companion volume to Legacies, entitled Ethnicities: Children of Immigrants in America, was published by California in Fall 2001. Edited by the authors of Legacies, this book will bring together some of the country's leading scholars of immigration and ethnicity to provide a close look at this rising second generation. Read the deeply moving and impeccably researched account of the events surrounding the plane crash that killed the 1961 US figure skating team. Only once has the United States lost an entire national team to disaster: 1961, when all eighteen members of the US figure skating team died in the crash of Sabena Flight 548. Sixteen family members, coaches, and friends died with them. *Frozen in Time* takes you, for the first time ever, inside the lives of these skaters, revealing their friendships and romances, rivalries, sacrifices, and triumphs. The skaters you'll read about were the top finishers at the 1961 US National Championships. Winning a medal at Nationals earned each skater passage aboard Sabena Flight 548, a state-of-the-art Boeing 707. The plane would take them to Brussels, where they planned to board a new plane for Prague, host city of the 1961 World Figure Skating Championships. Some of the skaters brought parents or older siblings as chaperones. Coaches and judges also boarded the plane, and some of them brought spouses and children. When the plane crashed in a Belgian field on February 15, entire families were shattered, and the American skating program suffered a staggering blow that threatened to cripple it for many years. *Frozen in Time* takes you on a journey to experience the highly competitive US National and North American championships of that fateful year. This story takes place in the final days of what now seems like an antique era, when the world was black and white, when figure skating was not a well-publicized sport. The book portrays strong, accomplished women leading unconventional lives on a national stage in a conservative era. The story of the Owen and Westerfeld women—along with all the dedicated athletes—transcends the world of sport and touches the human heart. It is one of the most powerful and tragic stories in the history of American sports. “. . . a reverential tribute. Skating enthusiasts will want to add this to the shelf.” —Publishers Weekly

A stunning collection that brings an earlier era to life. Although steam engines were seldom used for everyday train transportation by 1960, they live on in the minds of those fortunate enough to have experienced them and in the many museums and steam-powered excursions throughout the country. They are especially active in the West, where master photographer Joel Jensen has, for more than twenty-five years, documented these well-restored and maintained veterans in their natural settings doing what they used to—hauling both passengers and freight and delighting rail fans of all ages. This timeless collection takes us back to the end of the nineteenth century and the first half of the twentieth, with captivating images evoking the past. Essays by John Gruber, the president of the Center for Railroad Photography, and Scott Lothes, the project director for the center, help to put these wonderful photographs in context.

I was born in December 1954 or January 1955 ('when the first snow fell') as the third child of a Kurdish family living in a remote village of Eastern Turkey. My father died of tuberculosis at the age of 31 when I was six years old. My mother was 34, never married again, dedicated her life to her children. From the moment I learned how to read and write I became a passionate reader of the books; books of literature, books of history, books of travel, books of

philosophy, books of memoirs, books of biographies, books of politics... This book contains some of the excerpts that I noted while reading. Excerpts of wisdom and reflection from Barack Obama to Haji Ali (Nurmadhar of Korphe Village in Karakoram) from Edward Gibbon to Abdul Sattar Edhi (Pakistani Philanthropist). Excerpts on life, on love, on humanity, on civilization, on courage, on art, on ideas, on faith, on democracy, on freedom, on nations, on education, on war, on peace... Just a few short examples: For only in death are we alone-Rabindranath Tagore *** Sir, that all who are happy, are equally happy, is not true. A peasant and a philosopher may be equally satisfied, but not equally happy. Happiness consists in the multiplicity of agreeable consciousness-Samuel Jonson *** Serious literature is no less of a life preserver, even if the society is all but oblivious of it-Philip Roth *** It bothers me a little that at 99 you're going to die any minute, because I have a lot of other things I want to do-Delmer Berg Sezai Arli Doha, November 2020

The thrilling family saga of five unforgettable women who remade Europe From the great courts, glittering palaces, and war-ravaged battlefields of the seventeenth century comes the story of four spirited sisters and their glamorous mother, Elizabeth Stuart, granddaughter of the martyred Mary, Queen of Scots. Upon her father's ascension to the illustrious throne of England, Elizabeth Stuart was suddenly thrust from the poverty of unruly Scotland into the fairy-tale existence of a princess of great wealth and splendor. When she was married at sixteen to a German count far below her rank, it was with the understanding that her father would help her husband achieve the kingship of Bohemia. The terrible betrayal of this commitment would ruin "the Winter Queen," as Elizabeth would forever be known, imperil the lives of those she loved, and launch a war that would last for thirty years. Forced into exile, the Winter Queen and her family found refuge in Holland, where the glorious art and culture of the Dutch Golden Age indelibly shaped her daughters' lives. Her eldest, Princess Elizabeth, became a scholar who earned the respect and friendship of the philosopher René Descartes. Louisa was a gifted painter whose engaging manner and appealing looks provoked heartache and scandal. Beautiful Henrietta Maria would be the only sister to marry into royalty, although at great cost. But it was the youngest, Sophia, a heroine in the tradition of a Jane Austen novel, whose ready wit and good-natured common sense masked immense strength of character, who fulfilled the promise of her great-grandmother Mary and reshaped the British monarchy, a legacy that endures to this day. Brilliantly researched and captivatingly written, filled with danger, treachery, and adventure but also love, courage, and humor, *Daughters of the Winter Queen* follows the lives of five remarkable women who, by refusing to surrender to adversity, changed the course of history.

Fighting fascism at home and abroad begins with the consolidation of a progressive politics Seventy-five years ago,

Henry Wallace, then the sitting Vice President of the United States, mounted a campaign to warn about the persisting "Danger of American Fascism." As fighting in the European and Japanese theaters drew to a close, Wallace warned that the country may win the war and lose the piece; that the fascist threat that the U.S. was battling abroad had a terrifying domestic variant, growing rapidly in power: wealthy corporatists and their allies in the media. Wallace warned that if the New Deal project was not renewed and expanded in the post-war era, American fascists would use fear mongering, xenophobia, and racism to regain the economic and political power that they lost. He championed an alternative, progressive vision of a post-war world-an alternative to triumphalist "American Century" vision then rising--in which the United States rejected colonialism and imperialism. Wallace's political vision - as well as his standing in the Democratic Party - were quickly sidelined. In the decades to come, other progressive forces would mount similar campaigns: George McGovern and Jesse Jackson more prominently. As John Nichols chronicles in this book, they ultimately failed - a warning to would-be reformers today - but their successive efforts provide us with insights into the nature of the Democratic Party, and a strategic script for the likes of Bernie Sanders and Alexandria Ocasio-Cortez.

In Sustainable History and Human Dignity, Professor Nayef Al-Rodhan shows that it is the human quest for sustainable governance, balancing the ever-present tension between nine human dignity needs and three human nature attributes (emotionality, amorality & egoism), that has and will most profoundly shape the course of history. Beginning with an 'Ocean Model' of a single collective human civilisation, Al-Rodhan constructs a common human story comprised of multiple geo-cultural domains and sub-cultures with a history of mutual borrowing and synergies. If humanity as a whole is to flourish, all of these diverse geo-cultural domains must succeed. Only thus can lasting peace and prosperity be achieved for all, especially in the face of 'Civilisational Frontier Risks' and highly disruptive technologies in the twenty-first century.
