The angels are all around us to guide us. They want to get involved in all areas of your life: in your daily life, your home, your business, your finances, and your family. These supernatural agents of God are just waiting for you to speak the word of God. God created angels to answer and obey your word. Watch your words; the angels are listening! Doubtful words and disbelief prevent them from acting on our behalf. Wrong words and wrong prayers can provoke them.

Words of faith allow them to act in our favor. The Bible says that angels will go before you and prosper your way. They provide divine protection for you as it was afforded to everyone in Bible times: Abraham, David, Elijah, Elisha, and others. This book will take you on a fascinating journey about the intervention of these heavenly beings who are obliged with the ministry of assisting the heirs of salvation.

Creating Intelligent Content with Lightweight DITA documents the evolution of the Darwin Information Typing Architecture (DITA) – a widely used open standard for structuring technical content. DITA has grown in popularity and features since its origins as an internal grammar for structuring technical documentation at IBM. This book introduces Lightweight DITA (LwDITA, which should be read as "Lightweight DITA") as a proposed version of the DITA standard that reduces its dependence on complex Extensible Markup Language (XML) structures and simplifies its authoring experience. This volume aims to reconcile discrepancies and similarities in methods for authoring content in industry and academia and does so by reporting on DITA’s evolution through the lens of computational thinking, which

has been connected in scholarship and media to initiatives for learning to code and programming. Evia’s core argument is that if technical communicators are trained with principles of rhetorical problem solving and computational thinking, they can create structured content in lightweight workflows with XML, HTML5, and Markdown designed to reduce the learning curve associated with DITA and similar authoring methodologies. At the same time, this book has the goal of making concepts of structured authoring and intelligent content easier to learn and teach in humanities-based writing and communication programs. This book is intended for practitioners and students interested in structured authoring or the DITA standard.

John Nat not your typical young, angry American neo-Nazi. A hater, yes, turned criminal, yes, but his complexity runs deeper. He's a nihilist with pretensions. He commits abominations, and leaves the reader wondering. Listen to John Nat ramble: "Hazy and cloudy, or maybe shadowy and dark, the blackness of black. Do you see it, the basic premises of good and evil. What is the universe composed of except putrid pieces of rotting crud thrown together by the empty ones who seek only suppression of what could be a beautiful cosmos? I see all these mothers, the walking bones; I can see them because I am the Savior of Savivors and will unite my spirit with the power of the sword." ... "Nazis, I love these people, all of them, sweet and they understand the true realities of life and not the rest of the bullshit. Most things are garbage; I also know that the only way to deal with garbage is to eliminate it; get a flamethrower and burn it all away, the garbage and the floor beneath the garbage."
