Using a synthesis of ecology, anthropology, philosophy and political theory, this book traces our society's conflicting legacies of

freedom and domination, from the first emergence of human culture to today's global capitalism. The theme of Murray Bookchin's grand historical narrative is straightforward environmental, economic and political devastation are born at the moment that human societies begin to organize themselves hierarchically. And, despite the nuance and

detail of his arguments, the lesson to be learned is just as basic: our nightmare will continue until hierarchy is dissolved and human beings develop more sane, sustainable and egalitarian social structures.
