Count Basie was one of America's pre-eminent and influential jazz pianists, bandleaders, and composers, known for such classics as "Jumpin' at the Woodside," "Goin' to Chicago Blues," "Sent for You Yesterday and Here You Come Today," and "One O'Clock Jump." In *Good Morning Blues*, Basie recounts his life story to Albert Murray, from his childhood years playing ragtime with his own pickup band at dances and pig roasts, to his years in New York City in search of opportunity, to rollicking anecdotes of Basie's encounters with Fats Waller, Frank Sinatra, Fred Astaire, Sammy Davis Jr., Quincy Jones, Billie Holiday, and Tony Bennett. In this classic of jazz autobiography that was ten years in the making, Albert Murray brings the voice of Count Basie to the printed page in what is both testimony and tribute to an incredibly rich life.

"A theory is presented for the explanation of human learning behavior in a manual control task. In the performance of a psychomotor task, a human operator responds to sensory stimuli with limb movements. This psychophysiological phenomenon is conceptualized

herein as a single channel information processing system. A sensor, a decision center and an effector are the serially connected components of the system. Transmission and processing of information expend time, and the delay between the reception of a finite sum of component times which are assumed to be statistically independent random variables. In the decision center responses are selected from a set of possible alternatives. Stored in memory are a priori estimates of the probability that a specific response should be enforced at the moment of decision. Response selection is determined by a rule which takes the priors into account. Learning is effected by a revision of the priors based on the weighting of certain evidence. Readily perceived events in the state history of the dynamic process being controlled are used for evidence in resolving control policy uncertainty. Bayes' theorem is the revision rule. The model of human learning behavior is a computer program obtained from a translation of the theory into machine language. Behavior of the model depends not only on the rules of information processing postulated by the theory, but also on a set of parameters characterizing the mental and physical attributes of an individual human operator. Model behavior is compared with subject behavior measured in a motor skill experiment performed at MIT's Man Vehicle Laboratory. As set forth, the theory explains how a human operator learns to regulate the state of a dynamic process using a relay controller. Generalization of the theory to other task contexts is discussed."--Abstract.

Composer of more than 100 jazz pieces, three-time Grammy nominee, and performer on more than 125 albums, Jimmy Heath has earned a place of honor in the history of jazz. Over his long career, Heath knew many jazz giants such as Charlie Parker and played with other innovators including John Coltrane, Miles Davis, and especially Dizzy Gillespie. Heath also won their respect and friendship. In this extraordinary autobiography, the legendary Heath creates a "dialogue" with musicians and family members. As in jazz, where improvisation by one performer prompts another to riff on the same theme, *I Walked with Giants* juxtaposes Heath's account of his life and career with recollections from jazz giants about life on the road and making music on the world's stages. His memories of playing with his equally legendary brothers Percy and Albert (aka "Tootie") dovetail with their

recollections. Heath reminisces about a South Philadelphia home filled with music and a close-knit family that hosted musicians performing in the city's then thriving jazz scene. Milt Jackson recalls, "I went to their house for dinner...Jimmy's father put Charlie Parker records on and told everybody that we had to be quiet till dinner because he had Bird on.... When I [went] to Philly, I'd always go to their house." Today Heath performs, composes, and works as a music educator and arranger. By turns funny, poignant, and extremely candid, Heath's story captures the rhythms of a life in jazz.

Over 70 authors and veterans share the sacrifices so many of America's veterans have made, in peacetime and in war, throughout the 20th century. You'll read about Duty, Honor, Courage - from the testing of a submarine, to the loss of the Space Shuttle Challenger, to the everyday sacrifice of men and women in uniform, whether serving during peace or war. You'll walk bloodied beaches, soar over enemy turf, pray, crawl in and out of caves, tend the wounded, shoot and be shot at, feel your heart race with fright as flak comes at you from every direction...walk the deck...hit the deck...feel the heat as fire dances across the deck, into the cockpit and into the foxhole you occupy. Your heart will constrict as the man in front of you takes the bullet meant for you. You'll know the painful bite of shrapnel, the gnawing ache hunger brings and red-hot anger as a comrade falls. But most of all, you'll experience total, unabridged fear as you watch the enemy advance through the eyes of the author, and a swelling of pride as you meet America's veterans.

Powers to outlaw or proscribe terrorist organisations have become cornerstones of global counter-terrorism regimes. In this comprehensive volume, an international group of leading scholars reflect on the array of proscription regimes found around the world, using a range of methodological, theoretical and disciplinary perspectives from Political Science, International Relations, Law, Sociology and Criminology. These perspectives consider how domestic political and legal institutions intersect with and transform the use of proscription in countering terrorism and beyond. The chapters advance a range of critical perspectives on proscription laws, processes and outcomes, drawing from a global range of cases including Australia, Canada, the EU, Spain, Sri Lanka, Turkey, the UK and the USA. Using single and comparative cases, the authors emphasise the impacts of proscription on freedoms of speech and association, dissent, political action and reconciliation. The chapters demonstrate the manifold consequences for diasporas and minorities, especially those communities linked to struggles overseas against oppressive regimes, and stress the significance of language and other symbolic practices in the justification and extension of proscription powers. The volume concludes with an in-depth interview on the blacklisting of terror groups with the former U.S. Director of National Intelligence, James Clapper. This book was

originally published as a special issue of the journal *Terrorism and Political Violence*.

In this book, the technical explanation of the nature of analog sound creation is followed by the story of its birth and its subsequent development by various designers, manufacturers and performers. The individual components of analog sound creation are then examined in detail, with step by step examples of sound creation techniques. Then the modern imitative analog instruments are examined, again with detailed instructions for programming and using them, and the book is completed with appendices listing the major instrument lines available, hints on values and purchasing, other sources of information, and a discography of readily available recordings

which give good examples of analog sound synthesis. The CD which accompanies the book gives many examples of analog sound creation basics as well as more advanced techniques, and of the abilities of the individual instruments associated with classical and with imitative analog sound synthesis.
