Now in its 2nd edition, An Introduction to Western Medical Acupuncture provides a broad evidence-based approach to acupuncture when used

as part of modern medicine. Illustrated throughout it gives the practitioner an essential guide for deciding where and how to treat conditions with acupuncture, and how to avoid known risks associated with it. Ultimately it provides the practitioner with a tool to develop safe and effective practice. For this edition the text has been revised, updated and extensively re-written. A new chapter brings together the

understanding of how pain is recognised by the nervous system, and how acupuncture can influence these pathways. This is followed by six chapters providing detailed explanations of the effects and mechanisms of acupuncture, organised according to three recognised treatment approaches – needling to produce local changes, to generate effects at the level of the spinal segment, and to modify the overall function of the

nervous system. The chapters on the evidence from research have been also updated. An explanation of the various mechanisms of acupuncture linked to how they can best be activated by needling. Learn the principles of treatment rather than any 'cook-book' approach. Clear and objective discussion of the evidence for the effectiveness and the risks of acupuncture. Thorough and detailed description of all aspects of clinical

practice. Reference section for quickly reminding the practitioner of the best approach to treating many problems.

This three-volume Manual on International Maritime Law presents a systematic analysis of the history and contemporary development of international maritime law by leading contributors from across the world. Prepared in cooperation

with the International Maritime Law Institute, the International Maritime Organization's research and training institute, this a uniquely comprehensive study of this fundamental area of international law. Volume II: Shipping Law provides a detailed understanding of the historical development of shipping law looking at concepts, sources, and international organisations relating to shipping law; nationality, registration and ownership of ships; ship sale and shipping contracts; ship management and ship finance; arrest of ships; international trade and shipping documents; carriage of goods, passengers and their luggage by sea; maritime labour

law; law of maritime safety; law of marine collisions; law of salvage; law of wrecks; law of general average; law of towage; law of harbours and pilotage; limitation of liability for maritime claims; and law of marine insurance. Volume II published in October 2014 addresses the major issues which arise in the law of the sea. The forthcoming Volume III will provide analysis of marine environmental law and maritime security law. The full three-volume Manual will set out the entirety of international maritime law, re-stating and re-examining its fundamental principles, how it is enacted, and the issues that are shaping its future. It will be a superlative resource for those

working with or studying this area of law.

Fully revised and updated to reflect changes in clinical practice, legislation and regulation, this groundbreaking textbook intertwines the subjects of dental hygiene and dental therapy to provide a comprehensive resource for students of these courses, as well as those studying new degree programmes in oral health science. The Clinical Textbook of Dental Hygiene and Therapy is designed as a dedicated companion text for these disciplines and should enable students to streamline their

primary reading. Following course developments and an expansion in the remit of both hygienists and therapists, this book is written not only for students, but also as a revision aid for those already in practice. Interactive questions on a companion website allow the reader to test their knowledge and understanding. The opening section of the book is dedicated to relevant oral sciences: anatomy; histology; embryology; oral medicine and pathology. The clinical section contains fourteen chapters which provide coverage of the core syllabus for dental hygiene and therapy. The final section is dedicated to primary dental care services and law, ethics and professionalism. FEATURES

- Provides unique combined coverage of the subjects of dental hygiene and dental therapy
- Emphasises the clinical domain and reflects role expansion
- Highly illustrated in full colour throughout
- Includes expert contributions from dental hygienists, therapists, and dentists
- Dedicated companion website at www.wiley.com/go/noble/dentalhygiene

This book presents up-to-date knowledge on infertility in the context of polycystic ovary syndrome (PCOS) and provides clear evidence-based guidance on its treatment. The book opens by discussing anovulation, oocyte

quality, and the endometrium in women with PCOS, infertility and subfertility cofactors, and the impact of PCOS phenotypes on fertility. All aspects of management are then thoroughly addressed. The available medical treatments for PCOS-related infertility – including antiestrogens, aromatase inhibitors, insulin-sensitizing drugs, and gonadotropins – are reviewed, and other potential therapeutic approaches, such as acupuncture and laparoscopic ovarian drilling, are assessed. Careful attention is also devoted to the role of lifestyle interventions. The use of controlled ovarian stimulation in infertile PCOS patients

undergoing intrauterine insemination or in vitro fertilization is examined in detail, as are the benefits of in vitro maturation of oocytes. This book will be of value to all who are involved in the care of women with PCOS and related infertility issues.

Comprehensively revised and expanded with vital new content, the second edition of Medical Acupuncture continues to explore the

realistic integration of acupuncture into conventional medicine. Advocating the Western medical acupuncture approach (WMA), this science-based compendium provides the trained practitioner with all the latest research on the effectiveness of WMA and its associated mechanisms, techniques, clinical practice and evidence. Medical Acupuncture demonstrates a variety of needling techniques and clinical applications within the context of WMA and its evolution from traditional Chinese acupuncture using current knowledge of anatomy,

physiology and pathology alongside the principles of evidence-based medicine. Split into seven sections the book begins by establishing the roots of WMA in the Introduction and then progresses on to describe the mechanisms of action in Section 2, including peripheral components of stimulation and evidence from neuroimaging. Sections 3 and 4 cover clinical approaches (eg, superficial needling, electroacupuncture, safety of acupuncture) and techniques related to acupuncture (TENS, laser therapy). Section 5 takes a closer look at the difficulties

faced by trials and reviews while
Section 6 goes on to showcase

defined MAD/I language,
described in the report, is a

procedure-oriented algebraic language designed for general-purpose use. It is styled after such languages as ALGOL 60, MAD, and PL/I. MAD/I is also intended as a convenient 'base' language for extension by a definitional facility. The language anticipates the definition (or re-definition) of: data types and structures, statements, operators and operations. The definitional facility itself is not described. The user's guide shows how to compile and run MAD/I programs in MTS. Sample runs are

included. There is also a feature which allows assembler code for the IBM 360 to be compiled within a MAD/I program. General principles and manual exchange systems Oxford University Press

In 1968 Sean Martin got drafted and ended up fighting for his life in a war he wanted nothing to do with. Conversely, his lifer Lieutenant wanted to be immersed in war more than anything. Sean was a flower-loving hippie in a uniform toting an automatic weapon. The Lieutenant was

all about West Point, patriotism and being the best he could be. Both their lives changed in a single day when their unit was destroyed by the enemy in a fierce and deadly ambush. Under cover, but surrounded by an overwhelming enemy numbers, certain painful death was minutes away. They had a choice: get back into the battle with weapons blazing - a sure suicide run, or just run away. They chose the later. How? By foot. Where? West. How far? Europe. And now their adventure really begins. The two start their trek west, but in dogged pursuit is a tough and

determined North Vietnamese Captain who must capture them 'or else' and will not quit until he's got them locked up in the Hanoi Hilton. Added to this is the FBI who know the men are AWOL and are tracking their every move ready to pounce. With total worldly possessions of tattered uniforms, M-16's and a bandolier of ammo, Sean and the Lieutenant. are forced to solve the non-stop problems encountered along their route: Vietnam to Laos, to Burma to India and on to Europe. With surprises on every page, rich with humor and adventure

even Sean and the Lieutenant find hard to believe, you will be plugged into fear, resolve, betrayal, suffering and even love. But its all about survival. And what a romp it is. Proceedings of Laser-tissue Interaction John Wiley & Sons
Male Infertility: An Integrative Manual of Western and Chinese Medicine is a holistic manual on male infertility for the medical practitioner. The book integrates the conventional (or Western) medical approach to male

infertility with traditional Chinese medicine. Key Features: - information about several aspects of male reproductive medicine (anatomy, physiology diagnosis, fertility treatments) - information about the role of traditional Chinese medicine in treatment of male infertility (including energetic anatomy and Qi concepts) - complete guide to acupuncture techniques - easy-to-consult tables and appendices for quick reference The unique, integrated approach to

addressing male infertility makes this handbook essential reading for practicing and training andrologists, Chinese medicine practitioners, acupuncturists, as well as researchers and counsellors in the field of reproductive medicine.

The thirteen volume in the Evidence-based Clinical Chinese Medicine series is a must read for Chinese medicine practitioners interested in neurology or rehabilitation. Using a 'whole evidence' approach, this book aims to provide an analysis of the management

of post-stroke spasticity with Chinese and integrative medicine. This book describes the understanding and management of post-stroke spasticity with conventional medicine and Chinese medicine. Chinese medicine treatments used in past eras are analysed through data mining of classical Chinese medicine books. Several treatments are identified that are still used in contemporary clinical practice. Attention is then turned to evaluating the current state of evidence from clinical studies using an

evidence-based medicine approach. Scientific techniques are employed to evaluate the results from studies of Chinese herbal medicine, acupuncture and other Chinese medicine therapies. The findings from these reviews are discussed in terms of the implications for clinical practice and research. Chinese medicine practitioners and students can use this book as a desktop reference to support clinical decision making. Having ready access to the current state of evidence for herbal

formulas and acupuncture treatments allows practitioners to be confident in providing evidence-based health care. This book provides: With this information provided in an easy to use reference, practitioners can focus on giving high quality care supported by the best available evidence. In Chapter 5, the basic principles of the physical examination are covered, while Chapter 6 places the field of manual therapy within the context of contemporary pain neurosciences and therapeutic neuroscience education. For the remaining sections, the textbook alternates between the upper and lower quadrants. Sections 2 and 3 provide state-of-the-art updates on mechanical neck pain, whiplash, thoracic outlet syndrome, myelopathy, radiculopathy, peri-partum pelvic pain, joint mobilizations and manipulations and therapeutic exercises, among others. Sections 4 to 9 review pertinent and updated aspects of the shoulder, hip, elbow, knee, the wrist and hand, and finally the ankle and foot. The last two sections of the book are devoted to muscle referred pain and neurodynamics. This is a practical manual for health professionals who are beginning to use modern medical acupuncture. It starts from the assumption that acupuncture works by modifying the activity of the nervous system. Modern research fails to confirm the existence of precisely

localised 'acupuncture points' and these figure hardly at all in the book. Instead, the focus is on the principles that are used in deciding where to place the needles and on getting the amount of stimulation right. It is based on the course that the author has taught to health professionals for more than 35 years. It will be useful to students who have completed this course and also to those who have learned acupuncture in another way and who wish to explore a different approach. The Investor's Monthly Manual
