Action is the foundational key to all success. Pablo Picasso What does it take to succeed? How can I succeed? These are the questions that have been asked over the years. One method of learning more is to review the Success Manifesto of those who have attained success in their fields. As we know, a manifesto is a public declaration of intentions, motives or views. In this book, the CelebrityExperts(R) herein share their experiences in their various fields. Like most readers, these authors began their missions at ground zero. As they progressed to success, they harnessed or developed many traits that they share. These traits typically include: a vision or chosen goal, perseverance, a knowledge of and passion for the subject, a willingness to take calculated risks, a plan, and the courage to take action. Regardless of the goals the authors have chosen, by using their ideas to mentor you, you can profit from their experiences, both positive and negative - thereby avoiding a loss of time and resources as you move closer to your own goal(s). So, are you ready? If you are, then go into action and start the process. Just think - one day you could write your own Success Manifesto It had long since come to my attention that people of accomplishment rarely sat back and let things happen to them. They went out and happened to things. Leonardo da Vinci

The world's foremost expert on pricing strategy shows how this mysterious process works and how to maximize value through pricing to company and customer. In all walks of life, we constantly make decisions about whether something is worth our money or our time, or try to convince others to part with their money or their time. Price is the place where value and money meet. From the global release of the latest electronic gadget to the bewildering gyrations of oil futures to markdowns at the bargain store, price is the most powerful and pervasive economic force in our day-to-day lives and one of the least understood. The recipe for successful pricing often sounds like an exotic cocktail, with equal parts psychology, economics, strategy, tools and incentives stirred up together, usually with just enough math to sour the taste. That leads managers to water down the drink with hunches and rules of thumb, or leave out the parts with which they don't feel comfortable. While this makes for a sweeter drink, it often lacks the punch to have an impact on the customer or on the business. It doesn't have to be that way, though, as Hermann Simon illustrates through dozens of stories collected over four decades in the trenches and behind the scenes. A world-renowned speaker on pricing and a trusted advisor to Fortune 500 executives, Simon's lifelong journey has taken him from rural farmers' markets, to a distinguished academic career, to a long second career as an entrepreneur and management consultant to companies large and small throughout the world. Along the way, he has learned from Nobel Prize winners and leading management gurus, and helped countless managers and executives use pricing as a way to create new markets, grow their businesses and gain a sustained competitive advantage. He also learned some tough personal lessons about value, how people perceive it, and how people profit from it. In this engaging and practical narrative, Simon leaves nothing out of the pricing cocktail, but still makes it go down smoothly and leaves you wanting to learn more and do more—as a consumer or as a business person. You will never look at pricing the same way again.

[The Decline and Fall of the American Automobile Industry](#) MotorBooks International Knowledge Management (KM) is the art and science of utilizing knowledge as the most important resource towards gaining competitive advantage in today's business environment. Despite the huge and growing interest in KM, there has been no serious attempt to bridge theory and practice, the practices of East and West, the soft side (organizational capabilities) with the hard side (information technology), or the practices of large companies with start-ups. Until now. Written by the Dean of Hitotsubashi Business School in Tokyo, the world's leading centre of KM, and featuring contributions from thought leaders around the world, this book will provide a synthesis towards the emerging field of KM. It brings together the latest trends in the field and re-ignites the debate on the future form of knowledge management.
