Want to be an expert on Triumph's 350 and 500 unit-construction twins? Here is everything you need to know about these classic machines. Alongside the headline-grabbing bikes - the Bonneville and Trident - Triumph built a whole series of smaller 350/500cc machines, with all the style of their bigger brothers, but lighter in weight, easier to ride and now cheaper to buy. The Triumph 350/500s played a key role in the company's success through the 1960s, in North America as well as the UK. The range included everything from the original 350cc 3TA, a mild mannered tourer, to the final Daytona Tiger 500 (a modified version of which won the Daytona 500 race in 1967), and the TR5T trail bike. This comprehensive book covers the complete history of these bikes, with details of model variants, advice on buying and living with a Triumph 350/500, technical specifications, and a list of useful contacts.

The Elemental Motorcyclist offers riding advice in a conversational tone, often using amusing anecdotes to illustrate its message. The author does not pound home hard-and-fast rules, but offers gentle suggestions for riders to consider as they grow in their riding experience. The Commando was the main bike in Norton's range from
1968, and was produced until the demise of Norton Villiers
Triumph in 1977. The bike featured the unique 'Isolastic'
system that rubber-mounted the engine and protected the rider
from the twin-cylinder's vibrations. The model range provided

the rider with a choice of touring and sporting models, as well
as offering special police machines and off-the-shelf production
racers. Commandos feature strongly in today's classic scene,
and offer excellent performance and spares availability, as well
as a vast range of improvements and updated components. This
book looks at the history and development of the Commando,
gives the specifications and outlines the model changes, and
also offers the riding experiences of past and present owners.
In addition there is a blow-by-blow account of the author's
restoration of a 1971 750cc model that had been re-imported
into the UK from America needing a complete rebuild.
