RITA ignition help? - Moto Guzzi Riders Forum - Page 1
The thing is Rita is a real old system and is at least a compromise between tick over and smooth middle power but can strangle top end, there are ways to get the best but EVEN with the points system there is still

a compromise I find that slightly lumpy (relatively) means much smoother cruising and better more responsive throttle at the mid to top end.

Magneto Service Information - Old Engine.org Homepage
Hi Bill, If you can find one, no question, the Rita is far and away better than any Boyer-Brandsden e.i. The trick is finding one. Lucas stopped producing amplifiers (aka 'black box') a couple of years ago. That said, an amplifier for any bike will do - it's the trigger unit and reluctor (the

bit that spins) that are peculiar to a particular model of bike, and they're available brand-new.

British Cycle Supply - Tech Help Files

7. For machines running with RITA ignition and no battery there are various suitable alternator parts and control circuits available. For racing use, without a lighting requirement, and where a Lucas alternator is used originally, then the low output Daytona Stator with a Welded Rotor and half-wave Control Box should be obtained.

Lucas Rita Ignition woes ... I'm getting 670 +/- ohms from the signal trigger at the cam and will check the coils from the manual info, does anyone know where point "A" and "C" is mentioned in the workshop manual? I guessed "C" is at the connector block to the trigger and that's where I got the ohm reading from.

Lucas RITA Ignitions. The RITA system has not been available new

for some time but they are still capable of giving good service. Lucas Rita; To identify, first is it AB5 or AB11? Despite these two being interchangeable electrically * and performance wise please note the two major differences. The AB5 Lucas RITA Electronic Ignition | Norton Owners Club Lucas Rita ignitions went out of production in 2004 when the amplifiers stopped being manufactured (though they are now back in production as MOIRA (see above). As of 07/01/2004 I no longer deal in any electronic components. I will leave the wiring diagrams and related information on the site to assist those people who need

them.
