"If a student researcher had only one handbook on their bookshelf, Miller and Salkind's Handbook would certainly have to be it. With the updated material, the addition of the section on ethical issues (which is so well done that I'm recommending it to the departmental representative to the university IRB), and a new Part 4 on "Qualitative Methods," the new Handbook is an indispensable resource for researchers." "Dan Cover, Department of Sociology, Furman University The book considered a "necessity" by many social science researchers and their students has been revised and updated while retaining the features that made it so useful. The emphasis in this new edition is on the tools with which graduate students and more advanced researchers need to become familiar as well as be able to use in order to conduct high quality research.

Researching Human Experience Holistically SAGE

This book provides a framework for understanding micro, small and medium sized enterprises (MSMEs) as important contributors to economic growth. By examining the economic and investment decisions behind these businesses, the author shows how managers of MSMEs can add value to the firm by applying managerial finance tools. Early chapters establish the basic tenets of new venture development and financing and explore the economic environment that business-owners inhabit, focusing on venture capital, microfinance intervention, and public sector interventions. Later chapters guide the reader through the process of financial planning and forecasting, and valuation, finishing with insights into how to harvest investments and make sound financial decisions. The book has interdisciplinary appeal and offers a timely consideration of MSMEs in developing economies. It will be valuable reading for all interested in the management and development of small businesses, the finance of entrepreneurship and policy affecting small and medium sized enterprises.

Love and Madness in the Gilded Age Excel Books India

Terry Lucey offers a comprehensive treatment of the principles, application and design of management information systems in both public and private sector organisations. The book also includes assignments, cases and a selection of examination questions.

Theory and Problems CRC Press

This book has been developed with a focus on the need to demystify the subject and make it easy for students to grasp the principles

and details involved, and make it easily understandable to beginners exposed to the subject for the first time. An attempt has been made to explain things in a logical progression, in the simplest possible way so that neophytes may quickly grasp the concepts and methodology. A novel approach in the book is the illustrative use of computers with TORA package, as a problem-solving tool. In actual practice, situations arise with large and complex problems that are difficult to solve. At such times, using computers to solve problems gives fast and more accurate results. The chapters are arranged so as to progressively explain the workings of various models in actual practice through step-by-step procedures that so simplify and solve them, that even students from a non-mathematics academic background will grasp them quickly. Linear programming, the most powerful tool for managerial decision-making is covered elaborately, including thorough discussion of various LP methods and LP solutions, Duality in LP problems, sensitivity analysis, etc. Models in the book also use Linear Programming to reach solutions including those relating to transportation

and transshipment, assignment, and Game Theory&illustrated with screen-shots of a computer with a TORA package. Readers whether students, business executives, managers, researchers and academicians will find that the insights and knowledge obtained from the book will stand them in good stead in both academic as well as occupational pursuits.

Alcohol use disorder (AUD) is a major public health problem in the United States. The estimated 12-month and lifetime prevalence values for AUD are 13.9% and 29.1%, respectively, with approximately half of individuals with lifetime AUD having a severe disorder. AUD and its sequelae also account for significant excess mortality and cost the United States more than \$200 billion annually. Despite its high prevalence and numerous negative consequences, AUD remains undertreated. In fact, fewer than 1 in 10 individuals in the United States with a 12-month diagnosis of AUD receive any treatment. Nevertheless, effective and evidence-based interventions are available, and treatment is associated with reductions in the risk of relapse and

AUD-associated mortality. The American Psychiatric Association Practice Guideline for the Pharmacological Treatment of Patients With Alcohol Use Disorder seeks to reduce these substantial psychosocial and public health consequences of AUD for millions of affected individuals. The guideline focuses specifically on evidence-based pharmacological treatments for AUD in outpatient settings and includes additional information on assessment and treatment planning, which are an integral part of using pharmacotherapy to treat AUD. In addition to reviewing the available evidence on the use of AUD pharmacotherapy, the guideline offers clear, concise, and actionable recommendation statements, each of which is given a rating that reflects the level of confidence that potential benefits of an intervention outweigh potential harms. The guideline provides guidance on implementing these recommendations into clinical practice, with the goal of improving quality of care and treatment outcomes of AUD.

Archie and Amelie Springer

Physical Assessment of the Newborn, 5th Edition, is a comprehensive text with a wealth of detailed

information on the assessment of the newborn. This valuable and essential resource illustrates the principles and skills needed to gather assessment data systematically and accurately, and also provides a knowledge base for interpretation of this data. Coverage addresses: gestational assessment, neurologic assessment, neonatal history, assessment of the dysmorphic infant, and systemic evaluation of individual body systems, as well as key information on behavioral and pain assessment, including the use of specific tools with various groups ranging from term to extremely preterm infants. Numerous tables, figures, illustrations, and photos, many of them in full color, are a major strength that enhances the book's usefulness as a clinical resource. The text is an excellent teaching tool and resource for anyone who performs newborn examinations including nurses, neonatal and pediatric nurse practitioners, nurse-midwives, physicians and therapists. It can also serve as a core text for any program preparing individuals for advanced practice roles in neonatal care. KEY FEATURES: An authoritative and renowned text that comprehensively addresses all key aspects of newborn assessment Provides a well-ordered evaluation of individual body systems. Assists the practitioner in identifying infant state, behavioral clues, and signs of pain, facilitating individualized care. Comprehensively addresses the tremendous range of variation among newborns of different gestational ages. The content is amplified by numerous photos and illustrations, many in full color Includes Power Point slides and an Image Bank

A REESE'S BOOK CLUB PICK THE NEW YORK TIMES BESTSELLER ONE OF THE NEW YORK TIMES BEST THRILLERS OF 2020 "I loved this book. It gave me the same waves of happiness I get from curling up with a classic Christie...The alternating points of view keep you guessing, and guessing wrong." – Alex Michaelides, #1 New York Times bestselling author of The Silent Patient "Evok[es] the great Agatha Christie classics...Pay close attention to seemingly throwaway details about the characters' pasts. They are all clues." -- New York Times Book Review A wedding celebration turns dark and deadly in this deliciously wicked and atmospheric thriller reminiscent of Agatha Christie from the New York Times bestselling author of The Hunting Party. The bride - The plus one - The best man - The wedding planner - The bridesmaid - The body On an island off the coast of Ireland, guests gather to celebrate two people joining their lives together as one. The groom: handsome and charming, a rising television star. The bride: smart and ambitious, a magazine publisher. It's a wedding for a magazine, or for a celebrity: the designer dress, the remote location, the luxe party favors, the boutique whiskey. The cell phone service may be spotty and the waves may be rough, but every detail has been expertly

planned and will be expertly executed. But perfection is for plans, and people are all too human. As the champagne is popped and the festivities begin, resentments and petty jealousies begin to mingle with the reminiscences and well wishes. The groomsmen begin the drinking game from their school days. The bridesmaid not-so-accidentally ruins her dress. The bride's oldest (male) friend gives an uncomfortably caring toast. And then someone turns up dead. Who didn't wish the happy couple well? And perhaps more important, why?

Updating Estimation of the Social Cost of Carbon Dioxide Burns & Oates

About the Book: The revised second edition thoroughly explains the basic methods and techniques involved in mathematical analysis of economic phenomena. Statistical methods have been emphasized. Numerous new concepts, solved examples and illustrative practice problems have been included throughout the book. In addition, few new chapters have been added to enrich the quality of text as well. About the Author: Dr. R. Veerachamy was formerly Professor and Chairman in the Department of Economics, Bangalore University, Bangalore. He has put in 37 years of teaching on Quantitative Techniques for both Economics and Management students. His book "Quantitative Methods for Economists" is a very popular text among

student community all over the country. Since 1973 he is handling the paper "Quantitative Methods for Economists" for the postgraduate students in Bangalore University. He has obtained his MSc. degree in Mathematical Economics from Madurai Kamaraj University and also has MA Economics degree as well from the same University to his credit. He is a First Rank Gold Medalist in Econometrics. He received his Ph.D. in the area of International Economics from Bangalore University. He has contributed research papers/articles in several journals of repute. He has vast experience in curriculum development for both MA and MBA courses. Currently he is working as a Professor, Department of Management Studies, East Point College of Higher Education, Bangalore. *Heuristic Inquiry* W. W. Norton & Company This text is especially relevant to students studying quantitative techniques as part of business, management and/or finance on undergraduate and professional courses, especially: ACCA; CIMA; CIPFA; ICA, IOB, ICAEW. This introductory interdisciplinary textbook covers all the major topics involved at the interface between business and management on the one hand and mathematics and statistics on the other. Topics dealt with include logistics, finance, production and operations management, and economics. This text is especially relevant to students studying quantitative techniques as part of business,

Bringing key developments and debates together in a single volume, this book provides an authoritative guide for students and practitioners embarking on qualitative research in social work and related fields. Frequently illustrated with contemporary and classic case examples from the authors' own empirical research and from international published work, and with self-directed learning tasks, the book provides insight into the difficulties and complexities of carrying out research, as well as sharing 'success' stories from the field. Shaw and Holland have long experience of writing for practitioners and students and in making complex concepts accessible and readable, making this an ideal text for those engaging in qualitative social work research at any

level. Ian Shaw is a Professor of Social Work at the University of York and at the University of Aalborg. Sally Holland is a Reader in Social Work at the School of Social Sciences in Cardiff University. The American Psychiatric Association Practice Guideline for the Pharmacological Treatment of Patients With Alcohol Use Disorder Broadway Books

'Getting your PhD will no doubt establish itself as a firm favourite' - ESCalate 'Packed with practical advice on all aspects of the PhD process, new and continuing research students should find this book of great help' - Professor Malcolm Tight, Lancaster University, UK How to get your Ph.D is an original study guide aimed at prospective and current postgraduate students, covering the process of accessing, undertaking and completing doctoral research in the social sciences and the humanities. The content is unique in incorporating discussion of the less recognised personal, emotional and organisational demands of independent study. Drawing on a variety of student experiences, the authors apply a case study approach to examine the dilemmas and complexities of postgraduate study. The book is organised into four parts covering the research process; writing, publishing and networking; shifting identities and institutions and

relationships of support. Each chapter includes an easy to use format including real-life accounts, tips and strategies for problem solving and guidance for additional resources. The guide includes accessible advice and guidance across a spectrum of methodological, personal, emotional, practical and institutional issues.

Research and Practice U.S. Government Printing Office

Focused on exploring human experience from an authentic researcher perspective, *Heuristic Inquiry: Researching Human Experience Holistically* presents heuristic inquiry as a unique phenomenological, experiential, and relational approach to qualitative research that is also rigorous and evidence-based. Nevine Sultan describes a distinguishing perspective of this research that treats participants not as subjects of research but rather as co-researchers in an exploratory process marked by genuineness and intersubjectivity. Through the use of real-life examples illustrating the various processes of heuristic research, the book offers an understanding of heuristic inquiry that is straightforward and informal yet honors its

creative, intuitive, and poly-dimensional nature.

A Lasting Legacy SAGE

Questions about change in social and personal life are a feature of many accounts of the contemporary world. While theories of social change abound, discussions about how to research it are much less common. This book provides a timely guide to qualitative methodologies that investigate processes of personal, generational and historical change. The authors showcase a range of methods that explore temporality and the dynamic relations between past, present and future. Through case studies, they review six methodological traditions: memory-work, oral/life history, qualitative longitudinal research, ethnography, intergenerational and follow-up studies. It illustrates how these research approaches are translated into research projects and considers the practical as well as the theoretical and ethical challenges they pose. Research methods are also the product of times and places, and this book keeps to the fore the cultural and historical context in which these methods developed, the theoretical traditions on which they draw, and the empirical questions they address. *Researching Social Change* is an invaluable resource for researchers and graduate students across the social sciences

who are interested in understanding and researching social change.

Quantitative Techniques New Age International

A New York Times Book Review Editors' Choice Selection "[Lucey] delivers the goods, disclosing the unhappy or colorful lives that Sargent sometimes hinted at but didn't spell out."—Boston Globe In this seductive, multilayered biography, based on original letters and diaries, Donna M. Lucey illuminates four extraordinary women painted by the iconic high-society portraitist John Singer Sargent. With uncanny intuition, Sargent hinted at the mysteries and passions that unfolded in his subjects' lives. These women inhabited a rarefied world of wealth and strict conventions—yet all of them did something unexpected, something shocking, to upend society's rules.

Fire World (The Last Dragon Chronicles #6) Pearson Education India

This Third Edition of *Doing Research with Children* is practical introduction to the process of designing, doing and writing up research with children and young people. At the centre is a commitment to engaging with children and young people as active research participants rather than as passive subjects. In the new edition, you'll

find up to date information on the fast-changing political and ethical debates around research with children and young people as well as guidance on how to carry out research yourself. Divided into three sections, the new edition covers: -the main theories and approaches of research with children and young people -expanded guidance on research ethics -techniques for conducting both qualitative and quantitative research -more on analysing your research -a brand new chapter on communicating your research findings. This is a must-have guide for students and practitioners who are engaging in research with children and young people. Available with Perusall—an eBook that makes it easier to prepare for class Perusall is an award-winning eBook platform featuring social annotation tools that allow students and instructors to collaboratively mark up and discuss their SAGE textbook. Backed by research and supported by technological innovations developed at Harvard University, this process of learning through collaborative annotation keeps your students engaged and makes teaching easier and more effective. Calen is a good man from a bad family. He's worked hard for success, but something's missing...or rather, someone. Calen is the son of an Irish mobster, but he's rejected his legacy and has made a name for himself as a club owner. After years of hard work,

he has the life he's always wanted. Almost. Then his father asks him to take a meeting with a rival crew. It's too important to say no. Reluctantly, he drives out to the middle of nowhere to meet them. There to negotiate for reparations, he sees an innocent girl being held against her will—someone who looks very familiar. Unwilling to leave the girl to a fate worse than death, he demands she be included as part of the deal. Maia is forced to stay with Calen for her safety, but she soon finds out he has ulterior motives for protecting her. ***Calen's Captive is the second book in the Singular Obsession Series. No cliffhangers and no serials. Each novel stands alone. Not suitable for readers under 18.***

international context. This book can be used as a reference for academicians and researchers who would like to discuss and introduce new developments in the field of quantitative methods in economics and finance and explore applications of quantitative methods in other business areas.

Researching Social Change Academic Press
Computers are a fundamentally important tool in sport science research, sports performance analysis and, increasingly, in coaching and education programmes in sport. This book defines the field of 'sport informatics', explaining how computer science can be used to solve sport-related problems, in both research and applied aspects. Beginning with a clear explanation of the functional principles of hardware and software, the book examines the key functional areas in which computer science is employed in sport, including: knowledge discovery and database development data acquisition, including devices for measuring performance data motion tracking and analysis systems modelling and simulation match analysis systems e-learning and multimedia in sports education Bridging the
