Among the gems are "All The Sounds of Fear", "The Sky is Burning", "The Very Last Day of a Good Woman" and "In Lonely Lands". Though they stand tall on their own merits they also point the way to the sublime stories that followed soon after and continue to come even now, more than forty years later.

Althusser and Law is the first book specifically dedicated to the place of law in Louis Althusser’s philosophy. The growing importance of Althusser’s philosophy in contemporary debates on the left has - for practical and political, as well theoretical reasons - made a sustained consideration of his conception of law more necessary than ever. As a form of what Althusser called ‘Ideological State Apparatuses’, law is at the forefront of political struggles: from the destruction of Labour Law to the exploitation of Patent Law; from the privatisation of Public Law to the ongoing hegemony of Commercial Law; and from the discourse on Human Rights to the practice of judicial courts. Is Althusser still useful in helping us to understand these struggles? Does he have something to teach us about how law is produced, and how it is used and misused? This collection demonstrates that Althusser’s ideas about law are more important, and more contemporary, than ever. Indeed, the contributors to Althusser and Law argue that Althusser offers a new and invaluable perspective on the place of law in contemporary life.

William F. Edmiston revises current theories of what narratologists call &"focalization&" and applies his revised theory to four eighteenth-century French memoir-novels. Hindsight and Insight contributes to our knowledge of the history and evolution of the novel by demonstrating that France's earliest novelists were already engaged in the kinds of narrative experimentation that are usually associated with modern writers. It presents an analysis of the narrative point of view in both its theoretical aspects and its practical applications. Edmiston exposes the inadequacies of current concepts of focalization and proposes a revised concept that is applicable to personal narration, one that can accommodate all the focal possibilities available to the first-person narrator. He applies this concept to four French memior-novels: Les Egarements du coeur et de l'esprit by Marivaux, Manon Lescaut by Pr& é vost, and La Religieuse by Diderot.Each of these well-known novels offers a different case study and raises specific theoretical questions of selective focalization, forms of reported speech, problems of temporal ambiguity, manipulation of the reader, narratorial reliability, and cognitive privilege. Edmiston's study proposes a reading of the novels that resolves certain problems of interpretation raised by other recent studies.

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, Incidents in the Life of a Slave Girl, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

An ambitious theoretical work that ranges from the age of Socrates to the late twentieth century, this book traces the development of the concepts of irony within the history of Western literary criticism. Its purpose is not to promote a universal definition of irony, whether traditional or revisionist, but to examine how such definitions were created in critical history and what their use and invocation imply. Joseph A. Dane argues that the diverse, supposed forms of irony--Socratic, rhetorical, romantic, dramatic, to name a few--are not so much literary elements embedded in texts, awaiting discovery by critics, as they are notions used by critics of different eras and persuasions to manipulate those texts in various, often self-

serving ways. The history of irony, Dane suggests, runs parallel to the history of criticism, and the changing definitions of irony reflect the changing ways in which readers and critics have defined their own roles in relation to literature. Probing and provocative, The Critical Mythology of Irony will appeal to a broad spectrum of critics and scholars, particularly those concerned with the historical basis of critical language and its political and educational implications.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
