"Behind Photographs began as the personal quest of photographer Tim Mantoani to document and preserve noted photographers together with their images. "We have come to a point in history where we are losing both photographic recording mediums photographic recording mediums and iconic photographers," Mantoani comments. "While many people are familiar with iconic photographs, the general public has no idea of who created them. Human settlement of the western fringes of the Pacific occurred at least 40,000 years ago. Long, hazardous sea voyages were the only way of reaching the tiny islands scattered through this vast expanse of ocean. Food and shelter were hard to come by, even on land. This book documents how these settlers adapted culturally and biologically to the Pacific environment, and how this can explain the patterns seen today in New Zealand, Polynesia, Micronesia, and Melanesia. The book discusses the distinctive Pacific environment and how its inhabitants have evolved into large-bodied, muscular people to meet the particular demands of the region. People of the Great Ocean is a uniquely original work based on extensive research and careful analysis. Houghton's text presents detailed technical information, but remains highly readable and persuasive.

Ellis Amdur's writing on martial arts has been groundbreaking. In *Dueling with O-sensei*, he challenged practitioners that the moral dimension of martial arts is expressed in acts of integrity, not spiritual platitudes and the deification of fantasized warrior-sages. In *Old School*, he applied both academic rigor and keen observation towards some of the classical martial arts of Japan, leavening his writing with vivid descriptions of many of the actual practitioners of these wonderful traditions. His first edition of *Hidden in Plain Sight* was a discussion of esoteric training methods once common, but now all but lost within Japanese martial arts. These methodologies encompassed mental imagery, breath-work, and a variety of physical techniques, offering the potential to develop skills and power sometimes viewed as nearly superhuman. Usually believed to be the provenance of Chinese martial arts, Amdur asserted that elements of such training still remain within a few martial traditions: literally, 'hidden in plain sight.' Two-thirds larger, this second edition is so much more. Amdur digs deep into the past, showing the complexity of human strength, its adaptation to varying

lifestyles, and the nature of physical culture pursued for martial ends. Amdur goes into detail concerning varieties of esoteric power training within martial arts, culminating in a specific methodology known as 'six connections' or 'internal strength.' With this discussion as a baseline, he then discusses the transfer of esoteric power training from China to various Japanese jujutsu systems as well as Japanese swordsman-ship emanating from the Kurama traditions. Finally, he delves into the innovative martial tradition of Daito-ryu and its most important offshoot, aikido, showing how the mercurial, complicated figures of Takeda Sokaku and Morihei Ueshiba were less the embodiment of something new, than a re-imagining of their past.
