Leadership is a daunting subject for most developing leaders, but eventually all followers will be called upon to lead. Where do we start? What model or theory do we utilize? The choices become overwhelming for anyone attempting online searches. Everywhere you look are leadership books, programs, degrees, workshops, seminars, boot camps, and even mobile apps! Many organizations at Air University are utilizing the full range of leadership approach. Initially introduced by James MacGregor Burns in 1978 and Bernard Bass in 1985, these transformational and transactional leadership styles have sustained nearly four decades. Through (1) idealized transformational leader behaviors, one may raise the levels of his or her ethical and moral values while committing to "doing the right thing" for himself or herself and his or her followers; (2) by using inspirational motivation, leaders learn to articulate a vision to energize followers to accomplish more than they ever thought possible; (3) by intellectually stimulating followers, leaders will challenge followers to create and innovate as they reframe problems with renewed visions; and by providing individualized consideration, leaders may learn to incorporate each member's distinct gifts and talents as individual contributors to the organizational team. These transformational behaviors can offer connections to reaching (4) authentic transformational leadership by incorporating not only ethics and values but also, according to John Sosik, virtues and character strengths to refine one's leadership acumen, ameliorating leader-follower dynamics

You are not perfect. Never have been, never will be. And no matter how much experience you gain, how long you contemplate a decision, or who you seek counsel from, you will still make the occasional management misstep--a few of them. Guaranteed. And if you stay in management long enough, you will undoubtedly ask yourself questions such as: • Why do I sometimes feel threatened by my best people? • How do I remain cool in hot situations? • How can I ensure people hear what I say? • How can I cope more effectively with change? • Why have I lost so many of my best employees to the competition? The question is, will you wait for these mistakes to happen and then stay awake at night dwelling on these questions, or will you address them proactively so that you may discover the right solutions to apply now? Clinical and business psychologist Nicole Lipkin knows the stresses leaders face. In *What Keeps Leaders Up at Night*, she examines the common mistakes leaders make with their people. Featuring illuminating examples and exercises, this sleep-friendly book shines a bright light into the dark corners where all leaders struggle with their own shortcomings and presents smart solutions to the problems that arise as a result.

Doctoral Thesis / Dissertation from the year 2014 in the subject Business economics - Business Management, Corporate Governance, grade: B, (Atlantic International University) (Department Of Business Administration, Atlantic International University, USA), course: Business Management, language: English, abstract: This study sought to investigate the impact of leadership styles and business strategy on the organizational performance of Small-Medium Scale Enterprises (SMEs) in the manufacturing sector of Ghana. This had become necessary due to the fact that available literature on the subject matter lacked precision in terms of the specific leadership style and strategy which could better be employed to improve performance in the chosen area of study. A field survey (by means of questionnaires) was conducted in Accra, involving 60 CEOs and Senior managers drawn from 10 organizations, which were randomly sampled for the study. In addition, a time series data from 2008 to 2013 on sales, profits before tax and employment from the 10 organizations were collected to develop performance indices for the organizations. Regression and analysis of variance (ANOVA) were then run to examine the relationship between leadership, strategy and organizational performance. The study revealed that leadership and business strategy statistically and significantly impacted on organizational performance but strategy had the greater influence. Again, transformational leadership style and cost leadership significantly influenced organizational behaviour ($p=.000$)

This illuminating study critiques the concept of leadership as understood in the last 75 years and looks to the twenty-first century for a reconstructed understanding of leadership in the postindustrial era. More similarities in past decades were found than had been thought; the thread throughout Rost's book is that leadership was conceived of as good management. He develops a new definition and paradigm for leadership in this volume that distinguishes leadership from management in fundamental ways. The ethics of leadership from a postindustrial perspective completes the paradigm. The book concludes with suggestions that can be immediately utilized in helping to transform our understanding of leadership.
