"In this path-breaking book,

Heidi Schlippacke provocatively argues that German and Austrian aesthetics since World War II have more in common with the aesthetics of developing countries than with Western ones. Her original analysis of key films and texts challenges our view of the impact of globalism on culture and forces us to re-examine the meaning of nostalgia. Given its interdisciplinary scope, this important book should be read by anyone interested in contemporary literary or aesthetic issues."---Astrida

Tantillo, The University of Illinois at Chicago "Nostalgia After Nazism is a compelling, sophisticated entry in the growing field of German and Austrian memory studies. It introduces into German studies a nuanced set of tools drawn from the broad panoply of contemporary theory and sets those voices onto the broader historical landscape of post-World War II confrontations between the West's recent history and its present. The result is a highly readable, impeccably documented volume that joins

the best of literary history and close readings to a broad spectrum of theoretical models. Nostalgia After Nazism offers an exemplary model for cultural scholarship after the supposed 'end of theory,' recapturing how theory, history, and the texts of culture are mutually illuminating."---Katherine Arens, The University of Texas at Austin This book maps nostalgia and its displacements in the works of seminal post-Holocaust German and Austrian authors and filmmakers such as

Ingeborg Bachmann, Elfriede Jelinek, Rainer Werner Fassbinder, Michael Haneke, Tom Tykwer, and Robert Menasse. By focusing on nostalgia, the author links the central tropes of post-fascist German-language culture (home, family, history, nation) with affect. Within the former Nazi countries, the author argues, nostalgia encounters a taboo, since the fascist past must never be idealized. <i>Nostalgia After Nazism</i> utilizes globalization theory in order to delineate a cultural particularity within the former	Nazi nations. The caesura of the Holocaust has produced an historical and affective break that distinguishes these nations from other European countries. Germany and Austria experienced a regression to a pre-modern state during the period of the Third Reich; hence, their belated reentrance into modernity following the fall of Nazism has had profound implications for national identity and aesthetics. The compulsive fixation with the Nazi past has resulted, the author proposes, in a hesitant	and tenuous engagement with the post-national discourses of globalization. Through the lens of nostalgia, this book traces confrontations with history and home in post-fascist German and Austrian literature and film. These works often enact a repetition compulsion of the critique of Nazism via a focus on the tainted spaces of family, home, and nation. A nostalgic longing for the damaged home is possible only in an alienated form, and many contemporary German-language authors and

filmmakers represent scenes of departure from the entrapping space of home to other countries. Hence, <i>Nostalgia After Nazism</i> also outlines a shift from the aesthetic project of historical critique to instances of transnational nostalgia that combine a critique of recent history with a global concept of home. Through an analysis of the historical affect of nostalgia, this book offers a unique route of access to the conflicted emotions of loss and alienation that characterize contemporary Germany and	<i>Nostalgia After Nazism</i> engages scholarship in the fields of literary and film studies, philosophy, gender studies, and globalization studies. It takes part in current discussions about cultural particularities and local and national nostalgias by focusing on the anomalous cases of Germany and Austria. It provides novel readings of works by canonized and important new German and Austrian authors and directors, juxtaposing these readings with interpretations of comparable Anglo-	American texts. This book will be of interest to students and scholars in German and Austrian Studies, European Studies, comparative literary and cultural studies, cinema studies, Holocaust studies, and gender studies, as well as to those working on modernity/postmodernity, globalization, and contemporary notions of temporality and affect. As this innovative collection demonstrates, feminist scholars are producing a rich and diverse body of knowledge within their universities today. Often they work in isolation from one another and often their knowledge is not disseminated to the broader community. From its inception, the goal of this collection has been to publicize the work of feminist research across the disciplines and to foster an

open and inclusive communication between academic and community feminists. These fourteen essays bring to the fore a constellation of concerns that are linked to the broader women's movement and to global feminism, ranging from recovering histories to the rise of global connectivity. The essays together create a complex and dynamic interconnection of voices that speak to feminists both in academia and in the wider world.

First produced in 1998 at the famous Vienna Burgtheater, the remarkable and provocative *Sports Play* by Austrian playwright Elfriede Jelinek is a postdramatic theatrical exploration of the making, marketing and sale of the human body and of emotions in sport. It explores contemporary society's obsession with fitness and body culture bringing into sharp focus our need to belong to a group, a team or a nation. Sport is seen as a form of war in peacetime.

In *Pop-Feminist Narratives*, Emily

Spiers explores the recent phenomenon of 'pop-feminism' and pop-feminist writing across North America, Britain, and Germany. Pop-feminism is characterised by its engagement with popular culture and consumerism; its preoccupation with sexuality and transgression in relation to female agency; and its thematisation of intergenerational feminist discord, portrayed either as a damaging discursive	construct or as a verifiable phenomenon requiring remediation. Central to this volume is the question of theorising the female subject in a postfeminist neoliberal climate and the role played by genre and narrative in the articulation of contemporary pop-feminist politics. The heightened visibility of mainstream feminist discourse and feminist activism in recent years—especially in North America, Britain, and Germany—means that	the time is ripe for a coherent comparative scholarly study of pop-feminism as a transnational phenomenon. This volume provides such an account of pop-feminism in a manner which takes into account the varied and complex narrative strategies employed in the telling of pop-feminist stories across multiple genres and platforms, including pop-literary fiction, the popular 'guide' to feminism, film, music, and the digital. <i>Wonderful, Wonderful</i>

What impels someone to abandon middle-	class privilege for the sake of revolution? Kurt Janisch is an ambitious, but frustrated country policeman. Things are not going right in his life - at least not fast enough. But a country policeman gets talking to a lot of people in the line of duty - particularly

women. Lonely, middle-aged women, women with a bit of property perhaps... Matters go from bad to worse: for Kurt Janisch, for the women who fall for him. Someone sees too much, knows too much. Soon there's a body in a lake and a murderer to be caught. A thriller set amid the mountains and small towns of southern Austria, Greed is Elfriede Jelinek's most accessible novel since *The Piano Teacher*. But as always Jelinek gives the reader a lot more to

think about: the ecological costs of affluence, the inescapable burden and inadequacy of our everyday words, the exploitative nature of relations between men and women, the impossibility of life without relationships. A meditative reflection on ageing, Greed is another chapter in Jelinek's chronicling of her love/hate relationship with Austria.

How are we to think of satire if it has ceased to exist as

a discrete genre? This study proposes a novel solution, understanding the satiric in the postwar era as a set of writing practices: figures of inversion, myth-making, and citation. As the editors write
in this volume,
"while the
dichotomy of 'high'
and 'low,'
classical and
popular, elitist
and trivial has
occupied theorists
of culture for
centuries, very few
of them have paid
more than scant
attention to the
various attempts at
mediating between
these two levels of
cultural endeavor."

The essays collected here, most delivered at the twenty-second Wisconsin Workshop in October, 1991, address exactly this aspect of cultural studies, using modern Germany as their canvas. The contributors range across the entire breadth of German cultural life, analyzing developments in the arts, literature, poetry, architecture, and cinema, as well as looking at contemporary writing by women and at changes in cultural depictions of sexuality. Germany's political paroxysms throughout the last hundred years figure prominently in the evolution of its cultural consciousness, so there is in these essays a strong sense of "nation": invented, perfected, lost, and recovered, but always fascinating. A totally homogenized German culture, one devoid of any higher aspirations, will be the impoverished result of postmodernism, the editors warn. It is their goal to "remind those who

are all too eager to
overlook the losses
occurring in this
process that this
tendency can
also--besides its
positive democratic
aspect--lead to one-
dimensionality."
