### Researching the Visual Gallery Books

This original, field-changing collection explores the plasticity and unfinishedness of human subjects and lifeworlds, advancing the conceptual terrain of an anthropology of becoming. People's becomings trouble and exceed ways of knowing and acting, producing new possibilities for research, methodology, and writing. The contributors creatively bridge ethnography and critical theory in a range of worlds on the edge, from war and its aftermath, economic transformation, racial inequality, and gun violence to religiosity, therapeutic markets, animal rights activism, and abrupt environmental change. Defying totalizing analytical schemes, these visionary essays articulate a human science of the uncertain and unknown and restore a sense of movement and possibility to ethics and political practice. Unfinished invites readers to consider the array of affects, ideas, forces, and objects that shape contemporary modes of existence and future horizons, opening new channels for critical thought and creative expression. Contributors. Lucas Bessire, Jo ã o Biehl, Naisargi N. Dave, Elizabeth A. Davis, Michael M. J. Fischer, Angela Garcia, Peter Locke, Adriana Petryna, Bridget Purcell, Laurence Ralph, Lilia M. Schwarcz

### Theories of Informetrics and Scholarly Communication Ahoy Comics

This book probes the efforts at manipulation individuals face daily in this information age and the tactics of persuaders from many sectors of society using various forms of Orwellian "doublespeak." The book contains the following essays: (1) "Notes toward a Definition of Doublespeak" (William Lutz); (2) "Truisms Are True: Orwell's View of Language" (Walker Gibson); (3) "Mr. Orwell, Mr. Schlesinger, and the Language" (Hugh Rank); (4) "What Do We Know?" (Charles Weingartner); (5) "The Dangers of Singlespeak" (Edward M. White); (6) "The Fallacies of Doublespeak" (Dennis Rohatyn); (7) "Doublespeak and Ethics" (George R. Bramer); (8) "Post-Orwellian Refinements of Doublethink: Will the Real Big Brother Please Stand Up?" (Donald Lazere); (9) "Worldthink" (Richard Ohmann); (10) "Bullets Hurt, Corpses Stink": George Orwell and the Language of Warfare" (Harry Brent); (11) "Political Language: The Art of Saying Nothing" (Dan F. Hahn); (12) "Fiddle-Faddle, Flapdoodle, and Balderdash: Some Thoughts about Jargon" (Frank J. D'Angelo); (13) "How to Read an Ad: Learning to Read between the Lies" (D. G. Kehl); (14) "Subliminal Chainings: Metonymical Doublespeak in Advertising" (Don L. F. Nilsen); (15) "Doublespeak and the Polemics of Technology" (Scott Buechler); (16) "Make Money, Not Sense: Keep Academia Green" (Julia Penelope); (17) "Sensationspeak in America" (Roy F. Fox); and (18) "The Pop Grammarians--Good Intentions, Silly Ideas, and Doublespeak" (Charles Suhor). Three appendixes are attached: "The George Orwell Awards," "The Doublespeak Award," and "The Quarterly Review of Doublespeak." (MS)

### Carjacked: The Culture of the Automobile and Its Effect on Our Lives SAGE

This book captures the state of the art in visual research. Margolis and Pauwels have brought together, in one volume, a unique survey of the field of visual research that will be essential reading for scholars and students across the social sciences, arts and humanities. The SAGE Handbook of Visual Research Methods encompasses the breadth and depth of the field, and points the way to future research possibilities. It illustrates 'cutting edge' as well as long-standing and recognized practices. This book is not only 'about' research, it is also an example of the way that the visual can be incorporated into data collection and the presentation of research findings. Chapters describe a methodology or analytical framework, its strengths and limitations, possible fields of application and practical guidelines on how to apply the method or technique. The Handbook is organized into seven main sections: - Framing the Field of Visual Research - Producing Visual Data and Insight - Participatory and Subject-Centered Approaches - Analytical Frameworks and Approaches - Visualization Technologies and Practices - Moving Beyond the Visual - Options and Issues for Using and Presenting Visual Research. Eric Margolis is an Associate Professor in the Hugh Downs School of Human Communication. He is President of the International Visual Sociology Association. Luc Pauwels is Professor of Visual Culture at the University of Antwerp. He is Chair of the Visual Communication Studies Division of the ICA and Vice-President of the International Visual Sociology Association (IVSA).

A teacher at a New England prep school ignites a gender war—with deadly consequences—in this dark and provocative novel by the bestselling author of *The Passenger* "Riveting . . . full of imagination and power."—Caroline Kepnes, author of *You* and *Providence* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY NEW YORK • WINNER OF THE ALA'S ALEX AWARD When Alexandra Witt joins the faculty at Stonebridge Academy, she's hoping to put a painful past behind her. Then one of her creative writing assignments generates some disturbing responses from students. Before long, Alex is immersed in an investigation of the students atop the school's social hierarchy—and their connection to something called the Darkroom. She soon inspires the girls who've started to question the school's "boys will be boys" attitude and incites a resistance. But just as the movement is gaining momentum, Alex attracts the attention of an unknown enemy who knows a little too much about her—and what brought her to Stonebridge in the first place. Meanwhile, Gemma, a defiant senior, has been plotting her attack for years, waiting for the right moment. Shy loner Norman hates his role in the Darkroom, but can't find the courage to fight back until he makes an unlikely alliance. And then there's Finn Ford, an English teacher with a shady reputation, who keeps one eye on his literary ambitions and one on Ms. Witt. As the school's secrets begin to trickle out, a boys-versus-girls skirmish turns into an all-out war, with deeply personal—and potentially fatal—consequences for everyone involved. Lisa Lutz's blistering, timely tale of revenge and disruption shows us what can happen when silence wins out over decency for too long—and why the scariest threat of all might be the idea that sooner or later, girls will be girls. Praise for *The Swallows* "The Swallows is fast-moving, darkly humorous and at times shockingly vicious. The battle of the sexes within its pages couldn't be more compelling. . . . Lutz delivers a frantic, morbidly funny

story."—BookPage "A decade before the #MeToo movement kicks off in full force, women are coming for the patriarchy in this big ol' novel, ripe with idiosyncratic characterization and memorable scenes."—Refinery29

The distribution of income, the rate of pay raises, and the mobility of employees is crucial to understanding labor economics. Although research abounds on the distribution of wages across individuals in the economy, wage differentials within firms remain a mystery to economists. The first effort to examine linked employer-employee data across countries, *The Structure of Wages: An International Comparison* analyzes labor trends and their institutional background in the United States and eight European countries. A distinguished team of contributors reveal how a rising wage variance rewards star employees at a higher rate than ever before, how talent becomes concentrated in a few firms over time, and how outside market conditions affect wages in the twenty-first century. From a comparative perspective that examines wage and income differences within and between countries such as Denmark, Italy, and the Netherlands, this volume will be required reading for economists and those working in industrial organization.

### Stories in the Worst Way Rutgers University Press

Discusses the ways that the magazine and its authors and editors have both passively and actively shaped American opinions of other cultures and caused us to reflect on our own culture.

### The Structure of Wages University of Chicago Press

In a crucial shift within posthumanistic media studies, Bernhard Siegert dissolves the concept of media into a network of operations that reproduce, displace, process, and reflect the distinctions fundamental for a given culture. *Cultural Techniques* aims to forget our traditional understanding of media so as to redefine the concept through something more fundamental than the empiricist study of a medium's individual or collective uses or of its cultural semantics or aesthetics. Rather, Siegert seeks to relocate media and culture on a level where the distinctions between object and performance, matter and form, human and nonhuman, sign and channel, the symbolic and the real are still in the process of becoming. The result is to turn ontology into a domain of all that is meant in German by the word *Kultur*. Cultural techniques comprise not only self-referential symbolic practices like reading, writing, counting, or image-making. The analysis of artifacts as cultural techniques emphasizes their ontological status as "in-betweens," shifting from first-order to second-order techniques, from the technical to the artistic, from object to sign, from the natural to the cultural, from the operational to the representational. *Cultural Techniques* ranges from seafaring, drafting, and eating to the production of the sign-signal distinction in old and new media, to the reproduction of anthropological difference, to the study of *trompe-l'oeils*, grids, registers, and doors. Throughout, Siegert addresses fundamental questions of how ontological distinctions can be replaced by chains of operations that process those alleged ontological distinctions within the ontic. Grounding posthumanist theory both historically and technically, this book opens up a crucial dialogue between new German media theory and American postcybernetic discourses.

Alcohol-impaired driving is an important health and social issue as it remains a major risk to Americans' health today, surpassing deaths per year of certain cancers, HIV/AIDS, and drownings, among others, and contributing to long-term disabilities from head and spinal injuries. Progress has been made over the past decades towards reducing these trends, but that progress has been incremental and has stagnated more recently. *Getting to Zero Alcohol-Impaired Driving Fatalities* examines which interventions (programs, systems, and policies) are most promising to prevent injuries and death from alcohol-impaired driving, the barriers to action and approaches to overcome them, and which interventions need to be changed or adopted. This report makes broad-reaching recommendations that will serve as a blueprint for the nation to accelerate the progress in reducing alcohol-impaired driving fatalities.

*Breaking Ranks* eloquently documents the many ways that militarism infiltrates ordinary lives, and is a powerful reminder of the personal costs of war. A model of sensitive and perceptive analysis of oral history interviews, *Breaking Ranks* reaches its audience on many levels. It is essential reading

for anyone concerned about better connecting intellectually and humanly with the current political moment."—Robert A. Rubinstein, The Maxwell School of Syracuse University "Breaking Ranks is extraordinarily well written, lively and compelling. This is the first book to combine gripping, personal stories of anti-war Iraq and Afghanistan veterans with rigorous academic analysis."—Aaron Glantz, author of *The War Comes Home: Washington's Battle Against America's Veterans* "As Matthew Gutmann and Catherine Lutz show in this timely and important book, soldiers can and do think on their own and come to political and ethical conclusions that often run contrary to what the military might want, expect, or portray. In *Breaking Ranks*, Gutmann and Lutz give us a valuable addition to our understanding of soldiers, politics, and ethics."—Andrew Bickford, George Mason University

*The SAGE Handbook of Visual Research Methods* Routledge

Originally released by Knopf in 1996, Lutz's rigorously innovative debut barely made a ripple in the mainstream publishing world, and a paperback edition was never published. Meanwhile, however, the book attained a cult status, and its influence has grown tremendously since its initial publication. "Gary Lutz is one of the rarest and purest of our treasured literary artists. His authentic language conquers any habit of speech. Let the reader prepare for the first known examples of the most crucial and intimate matters of the heart and mind"--Diane Williams.

A look at Fayetteville, North Carolina, home to Fort Bragg, that poses the question, 'Are we all military dependents?' Fayetteville has earned the nicknames of Fatalville and Fayetteenam. Unusual and not-sounusual features of the town include gross income inequalities, an extraordinarily high incidence of venereal disease, miles and miles of strip malls, and a history of racial violence. Through interviews with residents and historical research, Catherine Lutz immerses herself in the life of the town to discover how it has supported the military for over a century. From secret training operations that use civilians as mock enemies and allies to the satellite economy of the town, Lutz's history of Fayetteville reveals the burdens that military preparedness creates for all of us.

A New York Times Bestseller "Each interview is a revelation." —USA Today "As heartwarming as a holiday pumpkin pie and every bit as homey . . . what emerges in these compelling pages is hard-won wisdom and boundless humanity." —Seattle Post-Intelligencer As heard on NPR, a wondrous nationwide celebration of our shared humanity StoryCorps founder and legendary radio producer Dave Isay selects the most memorable stories from StoryCorps' collection, creating a moving portrait of American life. The voices here connect us to real people and their lives—to their experiences of profound joy, sadness, courage, and despair, to good times and hard times, to good deeds and misdeeds. To read this book is to be reminded of how rich and varied the American storybook truly is, how resistant to easy categorization or stereotype. We are our history, individually and collectively, and *Listening Is an Act of Love* touchingly reminds us of this powerful truth. Dave Isay's latest book, *Callings*, published in 2016 from Penguin Press.

*Carjacked* is an in-depth look at our obsession with cars. While the automobile's contribution to global warming and the effects of volatile gas prices are widely known, the problems we face every day because of our cars are much more widespread and yet much less known -- from the surprising \$14,000 per year that the average family pays each year for the vehicles it owns, to the increase in rates of obesity and asthma to which cars contribute, to the 40,000 deaths and 2.5 million crash injuries each and every year. *Carjacked* details the complex impact of the automobile on modern society and shows us how to develop a healthier, cheaper, and greener relationship with cars.

What are the essentials you'll need to begin an off-the-grid lifestyle, and how do you get started? This practical how-to guide considers all aspects of remote living, including site selection and the creation of your own utilities. Investment and ongoing costs of backwoods living are evaluated, based on the building-block approach to solar power and other readily-available technologies. This book is designed for those who seek an extensive evaluation of basic remote lifestyles and a realistic approach to getting started.

Visual Methodologies University of Chicago Press

This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as "a good book on rocket stuff...that's a really fun one" by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Scientometrics have become an essential element in the practice and evaluation of science and research, including both the evaluation of individuals and national assessment exercises. Yet, researchers and practitioners in this field have lacked clear theories to guide their work. As early as 1981, then doctoral student Blaise Cronin published "The need for a theory of citing" —a call to arms for the fledgling scientometric community to produce foundational theories upon which the work of the field could be based. More than three decades later, the time has come to reach out the field again and ask how they have responded to this call. This book compiles the foundational theories that guide informetrics and scholarly communication research. It is a much needed compilation by leading scholars in the field that gathers together the theories that guide our understanding of authorship, citing, and impact.
