The 1st World Conference and Technology Exhibition on Biomass for Energy and Industry, held in Sevilla in June 2000, brought together for the first time the traditional European Conference on Biomass for Energy and Industry and the

Biomass Conference of the Americas, thus creating the largest and most outstanding event in the worldwide biomass sector. The conference elaborated innovative global strategies, projects and efficient practice rules for energy and the environment at a key stage in the industry's development. New concepts and projects were highlighted to increase the social and political awareness for a change in worldwide resource consumption and to promote economically, socially and environmentally sustainable development for the next millennium. In 2 volumes, the Proceedings include some 470 papers essential to an understanding of current thinking, practice, research and global developments in the biomass sector - a vital reference source for researchers, manufacturers, and policy makers involved or interested in the use of biomass for energy and industry.

The story is told of Chekai, a teenage boy who survives school bullying to become a champion of peaceful coexistence in an ethnically and economically divided society. Matur County is an example of a country that faces internal divisions, one that is under increasing danger from external threats, including terrorism.

Chekai is bullied by his teacher, Ms Letia and his class prefect, Goliath. This reflects the ethnic suspicions and economic inequalities that threaten to tear the society apart. However, Chekai thinks realistically about the problems in his society. Through curiosity, he discovers that unlike what is said, the people of Matur County have a lot in common. He realises that they will only defeat their real enemies if they are united. Chekai wins a presidential essay writing competition and becomes a peace ambassador. He uses his new position to chart a new path on which everyone will walk. This includes those who previously bullied him, and those who had been discriminated against.

The Meaning Text Theory (MTT) is a lexicon-centred and dependency-based theory for the description of language using a holistic model that incorporates semantics, syntax, morphology and lexis. This volume, prepared on the

occasion of Igor Mel'cuk's 70th birthday, offers a cross-section of the current advances in MTT and its applications. The first part of the book focuses on lexical phenomena that are still largely neglected in mainstream linguistics: sound symbolism as manifested by ideophones, and idiosyncratic lexical relations as manifested by lexical functions (LFs). In particular, LFs are addressed from different angles (including the introduction of new “standard” LFs, the argument structure and semantic decomposition of lexical relations captured by LFs, automatic recognition of LF-instances in corpora, and the use of LFs in terminology and natural language processing). The

second part of the book deals with such prominent model-oriented issues as semantic paraphrasing in MTT, the role of phrase structure in MTT and syntactic analysis within MTT.
