Herb Rubenstein, Sustainable Business Group Raising a Father provides a very candid and honest assessment of the everyday obstacles we all face in trying to attain the proper work-life balance. Peter J. Pittman, President, Denver West Rotary Club During Arjun Sen's tenure in the corporate world, a wise, corporate stair-climbing friend told him, Arjun, in order to achieve bigger glories, one must make smaller sacrifices in life. It was clear he referred to spending less time with family, not being there for children's special moments, and similar small sacrifices in personal life. Sen learns the hard way that these sacrifices come with large costs, and in Raising a Father he recounts his journey to this realization. Foreseeing his father-daughter future reduced to obligatory phone calls on birthdays and Father's Day, Sen leaves corporate America. He founds a home-based marketing consulting company in Denver, his ten-year-old daughter's favorite city; names his daughter as manager; and begins the real journey of becoming a true father. In this memoir, Sen discusses how he now measures success differently. Raising a Father tells the story of how a young girl uses her charm, her love, and her caring nature to train her dad to become a better father and a better person.

Known as an advocate for the endangered earth, Barry Lopez is one of America's preeminent writers on nature. This invigorating book invites readers to sit down with Lopez and his friend William E. Tydeman to engage with their conversations about activism, the life of the mind, and all things literary. Even readers who think they know everything there is to know about Lopez will learn much from this richly informative book, both from Tydeman's concise biography of Lopez and from the dialogue about Lopez's ideas and experiences. The three interviews and Tydeman's reflections on other discussions with Lopez gathered here address nature, human beings' relationship to the land, the tension between political activism and the life of the intellectual, memory and reconciliation, the artist's social responsibility, and the business of authorship. "What is the nature of the relationship between the writer and the reader?" Lopez asks. It's "reciprocal, contractual, and moral." Lopez's thoughts on the importance of authenticity will resonate with every reader or writer, as will his deep commitment to story in all his work. He and Tydeman engage in illuminating exchanges on style and genre, the publication process, and relationships among authors, editors, and publishers. Both men are interested in photography and its relationship to writing, a subject on which they offer thought-provoking comments. A comprehensive annotated bibliography of Lopez's writings by archivist Diane Warner rounds out the volume. Raising a Father Balboa Press

Rick's book is a wry and acerbic account of his experiences of the illness, including hints and suggestions for fellow M.E. sufferers. You might just learn a bit of rocket science too. M.E. is a depressing subject. Most M.E. books are so woeful you want to reach for the razor blades. So he's tried to lighten-up this book; who wants to read a dire book when you're feeling miserable already? He pulls no punches: those of the medical profession that have helped him he praises. Those that were useless, obstructive, or frankly bizarre, come in for damning criticism. He discusses the efficacy of current 'best practices' and why a tobacco enema is a bad idea. Included is a hypothesis about what M.E. might be, and how it could be tackled by future research. Though written from a British perspective, he hopes this book will help and amuse M.E. sufferers and their carers worldwide. Please bear in mind that he's a rocket scientist, not a doctor, but he likes to think he's got a handle on M.E.

The Second Edition of this book includes a revision and an extension of its former version. The book is divided into three parts, namely: Introduction, The Aircraft, and Air Transportation, Airports, and Air Navigation. It also incorporates an appendix with somehow advanced mathematics and computer based exercises.

The first part is divided in two chapters in which the student must achieve to understand the basic elements of atmospheric flight (ISA and planetary references) and the technology that apply to the aerospace sector, in particular with a specific comprehension of the elements of an aircraft. The second part focuses on the aircraft and it is divided in five chapters that introduce the student to aircraft aerodynamics (fluid mechanics, airfoils, wings, high-lift devices), aircraft materials and structures, aircraft propulsion, aircraft instruments and systems, and atmospheric flight mechanics (performances and stability and control). The third part is devoted to understand the global air transport system (covering both regulatory and economical frameworks), the airports, and the global air navigation system (its history, current status, and future development). The theoretical contents are illustrated with figures and complemented with some problems/exercises. The course is complemented by a practical approach. Students should be able to apply theoretical knowledge to solve practical cases using academic (but also industrial) software, such as Python and XFLR5. The course also includes a series of assignments to be completed individually or in groups. These tasks comprise an oral presentation, technical reports, scientific papers, problems, etc. The course is supplemented by scientific and industrial seminars, recommended readings, and a visit to an institution or industry related to the study and of interest to the students. All this documentation is not explicitly in the book but can be accessed online at the book's website [www.aerospaceengineering.es](http://www.aerospaceengineering.es). A blond-haired, blue-eyed Lutheran man is approached on the streets of Chicago by members of the Latin Kings so he may teach them how to pray, and he does so with grace--this man's story, one suspects, isn't going to be a typical one. Life has not been easy for Charles Featherstone. From being bullied by peers and teachers in school, to his refusing to become a bully himself by leaving the armed services, to wandering the world in search of work and finding unexpected hospitality as an outsider nearly everywhere, to witnessing the 9/11 attacks from his nearby office, Featherstone's story is a tale of survival akin to Jacob's wrestling the angel at the River Jabbok. It may well leave the reader limping a bit, too, for the encounter with God found in these pages is stark and startling. Truly God's love knows no bounds and cannot be captured by labels--but as Featherstone's life attests, that love just might capture you.
