AWWA Manual M14, Recommended Practice for Backflow Prevention and Cross-Connection Control, provides guidance to water purveyors on the recommended procedures and practices for operating a cross-connection control program. A cross-connection is an actual or potential connection between any part of a potable water system and any other environment that contains other substances that, under any circumstances, would allow such substances to enter the potable water system. The purpose of any cross-connection control program is to reduce the risk of contamination or pollution of the public water system.

Water Meters--Selection, Installation, Testing, and Maintenance Amer Water Works Assn
While the 20th century brought many technological advancements to the battlefield, a key weapon of warfare remains the soldier and his rifle. This volume chronicles the historical development of the modern service rifle after World War II and examines its resurgence in Afghanistan after generations of absence following the introduction of the assault rifle. Individual chapters survey the most combat-tested models--including the FN FAL, U.S. M14 and HK 417--in technical detail,

emphasizing key points in the evolution of rifle technology and ammunition. Also explored is the development of the current M16 series rifle, and how recent difficulties in Afghanistan have led to an increasing reliance on the venerable M14. Providing a strong knowledge base of the various weapons now in service throughout the world, this instructive work demonstrates that the battle rifle has not outlived its usefulness.

The United States Army sniper is a specially selected volunteer highly trained in advanced marksmanship and Fieldcraft skills. He can support special operations missions and is able to engage selected targets from concealed positions at ranges and under conditions that are not possible for the normal rifleman. The sniper's skill acts as a force multiplier, where the mission is two-fold: (1) to eliminate high-value tactical targets on the battlefield, and (2) act as observer gathering intelligence. Field Manual 23-10 provides doctrinal guidance on the mission, personnel, organization, equipment, training, skills, and employment of the Sniper. This manual is intended for use by commanders, staffs, instructors, and soldiers at training posts, United States Army

The U.S. Army teamed up with cartoonist and graphic artist Will Eisner to produce teaching tools for U.S. soldiers in a medium that they could easily understand. The M16A1 Rifle: Operation and Preventive Maintenance, first printed in 1969, features a female narrator who instructs GIs on the proper care of their AR-15 (military name M16A1) rifles—firearms notorious for jamming and malfunctioning. More than a simple manual and step-by-step guide, this unconventional yet important military document tried to appeal to soldiers with suggestive chapter titles such as “ How to Strip Your Baby, ” “ What to Do in a Jam, ” “ Sweet 16, ” and “ All the Way with N é g l i g é . ” A copy o the thirty-two-page booklet was issued to nearly every soldier serving in Vietnam.
Field Manual Springer Science & Business Media
To understand the operation of aircraft gas turbine engines, it is not enough to know the basic operation of a gas turbine. It is also necessary to understand the operation and the design of its auxiliary systems. This book fills that need by providing an introduction to the operating principles underlying systems of modern commercial turbofan engines and bringing readers up to date with the latest technology. It also offers a basic overview of the tubes, lines, and system components installed on a complex turbofan engine. Readers can follow detailed examples that describe engines from different manufacturers. The text is recommended for aircraft engineers and mechanics, aeronautical engineering students, and pilots.

The M14 may have only been the primary US service rifle for a little over a decade before being replaced by the M16, but it is still considered by many experts to be the best rifle to ever see US service. Primarily designed for a war in Europe, where it would take its place alongside the other battle rifles like the FN FAL, the M14 saw most of its combat use in the early days of the Vietnam War. Maintained until 1970 for compatibility with NATO forces the M14 had a renaissance as a semi-automatic sniping weapon and since 2001 the M14 has been employed as a Designated Marksman Rifle, being employed by all branches of the US military, especially in Afghanistan where the open terrain makes longer-range engagements common. Featuring specially commissioned full-color artwork and archive and close-up photographs, this engaging study tells the story of the M14, the long-lived battle rifle that remains in front-line service with US forces more than 50 years after its first adoption.

Committee Serial No. 10. Investigates the events leading up to, the actual event, and the responsibility for the seizure of the U.S.S. Pueblo by North Korea. Includes discussion of the applicability of the Military Code of Conduct to the activities of the members of the Pueblo while in North Korean custody. Includes the "Geneva Convention Relative to the Treatment of Prisoners of War," Aug. 12, 1949 (p. 1089-1170).
Air Force Manual Skyhorse
Howard Twining was a soldier in the infantry during World War II, serving in the Philippines and Okinawa in the Pacific theater. This is an abridged collection of his letters home to his wife Olive in Placerville, California, from June 1944 to

December 1945. By early 1944 the United States had been at war for two years. Howard was both an idealist and a man of action. He was 29 and had two young children; he most likely would not have been drafted. But as the war intensified and Uncle Sam's requests for recruits became more urgent, he felt he had a duty to help in his country's war effort. During the year and half they were separated, Howard dearly missed his family and wrote almost every day. While these letters are more than 60 years old, they reveal a timeless love, strength of character, and an ability to endure that speak to us today.
