M275 V12 Bi-Turbo Platform - Technical discussion relating to models sharing the M275 V12 Bi-Turbo (V12 TT). Including SL600, SL65 AMG, CL600, CL65 AMG, S600, S65 AMG.

Usually engine misfiring in V12 Mercedes engines is due to a problem with the ignition system, and can usually be traced back to problems with ignition coils. Having a professional perform a differential diagnosis to find the source of the problem is critical, as your Mercedes will be unreliable until the problem is fixed.

Mercedes-Benz M275 engine - WikiVisually

Design. The M279 is based on the previous generation M275 engine, but has been extensively revised. It now

features port injection, larger turbochargers, changes to the valvetrain timing, and a new exhaust system for improved efficiency and emissions. The M279 also uses single overhead camshafts with 3 valves per cylinder, and has an identical bore and stroke compared to before.

M275. The M275 is a 3 valve per cylinder 5.5 L (5513 cc) twin turbocharged and intercooled version. Bore is 82 mm and stroke is 87 mm. Output is 500 hp (373 kW) at 5000 rpm with 590 ft.lbf (800 Nm) of torque at 1800-3500 rpm.

Mercedes-Benz M279 engine - Wikipedia

The mighty 65 AMG is a 6.0 liter variant of the M275 V12 available in S,

CL and SL models. The flagship of the AMG engine range at the time it produced 612 HP and 1000 NM (741 lb-ft) in stock trim. Never satisfied with factory power levels, Kleemann engineers developed 3 different tuning levels, 65-K1, K2 and K3. 65-K1 is available for Maybach 57S and 62S models, providing an unmatched ...

M275 Engine

Its a horrible feeling when the check engine light comes on your dash. If you have engine misfires the first code that typically comes up is P0300. This is a generic failure code simply indicating, at a summary level, that there is a misfire. From there, the reader, for example will indicate P0302 and P0304.
