125 Creative Writing Prompts for Petrolheads is a book (the first of a niche-inspired series) for the word lover who is also car crazy. Accelerate your writing with some out-of-the-(gear)box scribbling - if you are just writing for fun or if you are an experienced 'old' hand, thinking that you have already written it all. Get your creativity revved up with anything from memory-inspired nostalgic prompts to outlandishly silly ones. Whether it is for yourself or a gift to your dad, petrolhead girlfriend or bro, it will put some vroom in your writing life.

Transdex Index Veloce Publishing Ltd

BMW is a company associated with motoring firsts. The very idea of a sports sedan was merely a novelty until BMW introduced the 5 series in 1972. As BMW's "middle child," the 5 series has drawn features from the company's smallest and largest models, establishing a reputation for performance and practicality through multiple generations. This book covers the history of the 5 series midsize sedan and the related X5 SUV from September 1972 to the e60's major makeover for 2008 and the development of the e70 X5. Specific mechanical, electronic and cosmetic changes are described, including the

time of and reasons for their introduction. Several aspects of BMW's corporate history and technically related models such as the 6-series are also described, as are aftermarket modifications by Alpina, Hartge, and other specialist BMW tuners and speed shops. The book includes more than 200 photographs. Hearings, Reports and Prints of the House Committee on Science and Astronautics Janes Information Group Presents the story of the Suttons Group, from its creation by Alf Sutton. This is not a book about heavy goods vehicles, but the struggles, dramas and successes the group has endured in its 80 year history.

War Monthly Springer

A world of fun, excitement, exploration and satisfaction awaits the owner of an iconic BMW E30 3 Series cars - and this book is your ticket to that wonderful world. Some of the most popular forms of motorsport are examined, along with explanations of how to take part and what equipment you need.

Sir James Alfred Ewing (1855-1935) was a Scottish engineer, physicist and cryptographer. First published in 1926, as the fourth edition of an 1894 original, this book was written by Ewing 'to present the subject of heat-engines, in their mechanical as well as their thermodynamical aspects, with sufficient fulness for the ordinary needs of University students of engineering'. The text was extensively revised for this edition, taking into account developments in relation to steam turbines, steam boilers and internal combustion engines. Numerous illustrative figures are also provided. This book will be of value to anyone with an interest in Ewing's writings, steam engines and the history of engineering.

101 Performance Projects for Your BMW 3 Series 1982-2000 Springer Nature

This book shows how the systems approach is employed by scientists in various countries to solve specific problems concerning railway transport. In particular, the book describes the experiences of scientists from Romania, Germany, the Czech Republic, the UK,

Russia, Ukraine, Lithuania and Poland. For many of these countries there is a problem with the historical differences between the railways. In particular, there are railways with different rail gauges, with different signaling and communication systems, with different energy supplies and, finally, with different political systems, which are reflected in the different approaches to the management of railway economies. The book's content is divided into two main parts, the first of which provides a systematic analysis of individual means of providing and maintaining rail transport. In turn, the second part addresses infrastructure and management development, with particular attention to security issues. Though primarily written for professionals involved in various problems concerning railway transport, the book will also benefit manufacturers, railway technical staff, managers, and students with transport specialties, as well as a wide range of readers interested in learning more about the current state of transport in different countries.
