*'As Their Natural Resources Fail'*

Cambridge University Press

"Our fourth streamlined edition arrives in the midst of some of the most dramatic upheavals ever witnessed, both in the economy generally and in higher education in particular. The COVID-19 pandemic has produced

levels of unemployment not seen since the Great Depression and has created dramatic changes in the ways we teach across educational institutions at every level. These developments have reinforced our confidence in the instructional philosophy that motivated us to produce our first edition"--

*Macroeconomics, Fourth Canadian Edition* UBC Press

Folland, Goodman, and Stano's bestselling *The Economics of Health and Health Care* text offers the market-leading overview of all aspects of Health Economics, teaching through core economic themes, rather than concepts unique to the health care economy. The Eighth Edition of this key textbook has been revised and

---

updated throughout, and reflects changes since the implementation of the Affordable Care Act (ACA). In addition to its revised treatment of health insurance, the text also introduces the key literature on social capital as it applies to individual and public health, as well as looking at public health initiatives relating to population health and economic equity, and comparing numerous policies across Western countries, China, and the developing world. It provides up-to-date discussions on current issues, as well as a comprehensive bibliography with over 1,100 references. Extra material and teaching resources are now also available through the brand new companion website, which provides full sets of discussion questions, exercises, presentation slides, and a test bank. This book demonstrates the multiplicity of ways in which economists analyze the health care system, and is suitable for courses in Health Economics, Health Policy/Systems, or Public Health, taken by health services students or practitioners.

“brilliant” (Lupita Nyong’o, Time), “poignant” (Entertainment Weekly), “soul-nourishing” (USA Today) memoir about coming of age during the twilight of apartheid “Noah’s childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa’s history that must never be forgotten.” —Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Times, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah’s unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was

---

punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. *Born a Crime* is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence,

and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love.

Ibss: Economics: 1995 McGraw-Hill Education  
This book collects selected articles addressing several currently debated issues in the field of international macroeconomics. They focus on the role of the central banks in the debate on how to come to terms with the long-term decline in productivity growth, insufficient aggregate demand, high economic uncertainty and growing inequalities following the global financial crisis. Central banks are of considerable importance in this debate since understanding the sluggishness of the recovery process as well as its implications for the natural interest rate are key to assessing output gaps and the monetary policy stance. The authors argue that a more dynamic domestic and

---

external aggregate demand helps to raise the inflation rate, easing the constraint deriving from the zero lower bound and allowing monetary policy to depart from its current ultra-accommodative position. Beyond macroeconomic factors, the book also discusses a supportive financial environment as a precondition for the rebound of global economic activity, stressing that understanding capital flows is a prerequisite for economic-policy decisions.

The fifth edition of Romer's *Advanced Macroeconomics* continues its tradition as the standard text and the starting point for graduate macroeconomics courses and helps lay the groundwork for students to begin doing research in macroeconomics and monetary

economics. Romer presents the major theories concerning the central questions of macroeconomics. The theoretical analysis is supplemented by examples of relevant empirical work, illustrating the ways that theories can be applied and tested. In areas ranging from economic growth and short-run fluctuations to the natural rate of unemployment and monetary policy, formal models are used to present and analyze key ideas and issues. The book has been extensively revised to incorporate important new topics and new research, eliminate inessential material, and further improve the presentation.

Who Shall Live? Springer

Brian Abel-Smith was one of the most influential figures in the shaping of social welfare in the twentieth century. A modern day Thomas Paine, the British economist and expert advisor was driven to improve the lives of the poor, working with groups like the World Health Organization, International Labour Organization, and the World Bank to help bring health and social welfare services to millions across the globe. The Passionate Economist is the first biography to chronicle his life and the many programs he helped create. Sally Sheard details Abel-Smith's work as an economist and advocate, setting it against the backdrop of the larger history of health and social welfare development since the 1950s. She analyzes these developments and the effects

---

that long-running welfare debates have had on both poverty and state responses to it. She compares welfare implementation in different developing countries and examines how it was administered by the agencies for which Abel-Smith worked. The result is an accessible book on a leading humanitarian and, through him, a history of exactly how we have cared for each other in the globalized era.

This work proposes a new approach to macroeconomics which draws upon the experience of the Japanese economy. The approach is similar to the Old Keynesian view: it rejects the Walrasian approach, and singles out real demand as the fundamental determinant of output in the economy as a whole. However, by maintaining that real demand constraints are important not only in the short-run, but in the long-run as well, it goes beyond what is normally understood as the Keynesian approach. It is also very different from the New Keynesian Economics; in particular, it regards the rigidity of nominal wages/prices as of

secondary importance. The work is extensively illustrated by almost 200 figures and tables of data. Public Economics McGraw-Hill Education

Mateus and Moreira present a formidable review of pressing issues in competition law and economics. Top officials, judges and experts from Europe and North America offer their insights into analytical issues, practical problems for companies, enforcers and complainants and on the state of trans-Atlantic divergence and convergence. The discussion on national champions and state aid is prescient. Throughout, the analysis is acute, cutting edge, and deep. Officials, counsel and scholars will draw from this fabulous book for years to come. Philip Marsden, British Institute of International

and Comparative Law, London, UK  
Competition policy is at a crossroads on both sides of the Atlantic. In this insightful book, judges, enforcers and academics in law and economics look at the consensus built so far and clarify controversies surrounding the issue. There is broad consensus on the fight against cartels, with some countries criminalizing this type of agreement. However there is also wide debate on the questions of monopolization and abuse of dominant position, vividly highlighted by the recent Microsoft case. Furthermore, there are today diverging views on the interplay of business strategies and the control of market power on both a national and international scale. The book discusses the perennial issue in Europe of the conflicts between

---

competition and industrial policies, once again bringing the theme of national champions to the fore. The contributing authors provide opinion on the efforts which have been made towards modernization in both the USA and the EU. Featuring new contributions by leading scholars and practitioners in antitrust, this book will be a great resource for antitrust enforcers, competition lawyers and practitioners and competition economists, as well as scholars and graduate students in antitrust and competition law.

Looks at the role of Native peoples, both Indian and Metis, in the economy of northern Manitoba from 1870 to the Depression, arguing that they played an important part in the transitional era between the mercantile fur trade and the emerging industrial economy of the mid- 20th century. Reconstructs the evolution of the economy of the fur trade era, showing that natives responded to the market economy in enterprising ways but were obstructed by government policy. Drawing on examples from the global North and South, this book examines the relationship between

migration, development and diaspora engagement from a governance perspective. It explores the ways that governments interact with their own extra-national diasporic populations in order to boost economic development, build global trading and investment networks, and increase their political leverage overseas. Inside, readers will find fifteen essays which highlight such issues as diaspora engagement by governments at different scales, the divisions that often exist within diaspora groups, diaspora transnationalism and return migration, diaspora knowledge networks and higher education capacity building, and the neglected issues of South-South migration and diasporas as well as North-South migration and diasporas. The book presents empirical case studies from various geographical contexts including Australia, Canada, the Philippines, India, the Caribbean, Zimbabwe, and the United States. Overall, this book presents fresh insights into how and why migrant-sending countries are increasingly turning to the diaspora

option to attempt to benefit from the transfer of knowledge, skills and financial and social capital. It provides policy makers, researchers, and students with new perspectives on governance and the means by which states are attempting to utilize their diaspora resources.
