This is an overview of the subprime mortgage securitization process and seven key informational frictions that arise. The authors discuss the ways that market participants work to minimize these frictions and speculate on how this process broke down. They offer a complete picture of the subprime borrower and the subprime loan, discussing both predatory borrowing and predatory lending. They present the key structural features of a typical subprime securitization, document how rating agencies assign credit ratings to mortgage-backed securities, and outline how these agencies monitor the performance of mortgage pools over time.
