This book explores the relationship between the safety of journalists and self-censorship practices around the world, including local case studies and regional and international perspectives. Bringing together scholars and practitioners from around the globe, *Journalist Safety and Self-Censorship* provides new and updated insights into patterns of self-censorship and free speech, focusing on a variety of

factors that affect these issues, including surveillance, legislation, threats, violent conflict, gender-related stereotypes, digitisation and social media. The contributions examine topics such as trauma, risk and self-censorship among journalists in different regions of the world, including Central America, Estonia, Turkey, Uganda and Pakistan. The book also provides conceptual clarity to the notion of journalist self-censorship, and explores the question of how self-censorship may be studied empirically. Combining both theoretical and practical knowledge, this collection serves as a much-needed resource for any academic, student of journalism, practicing journalist, or NGO working on issues of journalism, safety, free speech and censorship.

where nothing is as it seems, through a maze of mental curiosities and contradictions. It discusses paradoxes of all types--mathematical, logical, scientific, philosophical and more. Though many involve sophisticated concepts and logical reasoning, none requires a highly technical background--knowledge of ordinary language and simple arithmetic will do. Twenty-five stand-alone chapters each present and discuss a different paradox, including: the Barber Paradox; the Crocodile's Dilemma, M. C. Escher's Paradoxes, the Liar Paradox, the Prisoner's Dilemma, the Raven Paradox, Zeno's Paradox, and many others. Each chapter features an end note indicating related paradoxes elsewhere in the book. Includes 118 mind-boggling illustrations, optical illusions and visual acrobatics.

Charles VIII led Europe's most potent army to victory against one Italian province after another. The Italian states rallied though, and at Fornovo they fought the French juggernaut to a standstill.

Here began the bloody Italian Wars.

The Absolute Sound Simon and Schuster

Before he was a top chef, Tom Colicchio learned to love cooking when he was still slinging burgers at a poolside snack bar. Barbara Lynch tells the story of luring her

way into her first chef's job and then needing to cook her way out of trouble in the galley kitchen of a ship at sea. Stories of mentorship abound: Rick Bayless tells the story of finally working with Julia Child, his childhood hero; Gary Danko of earning the trust of the legendary Madeleine Kamman. How I Learned to Cook is an irresistible treat, a must-have for anyone who loves food and wants a look into the lives of the men and women who masterfully prepare it.

achievement, but too many people believe that creativity is something you are born with and cannot be learned. In *How to Have Creative Ideas* Edward de Bono - the leading authority on creative thinking - outlines 62 different games and exercises, built around random words chosen from a list, to help encourage creativity and lateral thinking. For example, if the task were to provide an idea for a new restaurant and the random word chosen was 'cloak', ideas generated might be: a highwayman theme; a Venetian theme with gondolas; masked waiters and waitresses. Or, if asked to make a connection

between the two random words 'desk' and 'shorts', readers may come up with: both are functional; desks have 'knee holes' and shorts expose the knees; traditionally they were both male-associated items. All the exercises are simple, practical and fun, and can be done by anyone.

"Creepy crawling" was the Manson Family's practice of secretly entering someone's home and, without harming anyone, leaving only a trace of evidence that they had been there, some reminder

---

that the sanctity of the private home had been breached. Now, author Jeffrey Melnick reveals just how much the Family creepy crawled their way through Los Angeles in the sixties and then on through American social, political, and cultural life for close to fifty years, firmly lodging themselves in our minds. Even now, it is almost impossible to discuss the sixties, teenage runaways, sexuality, drugs, music, California, and even the concept of family without referencing Manson and his "girls." Not just another history of Charles Manson, Creepy Crawling explores how the Family weren't so much outsiders but emblematic of the Los Angeles counterculture freak scene, and how Manson worked to connect himself to the mainstream of the time. Ever since they spent two nights killing seven residents of Los Angeles—what we now know as the

"Tate-LaBianca murders"—the Manson family has rarely slipped from the American radar for long. From Emma Cline's *The Girls* to the recent TV show *Aquarius*, the family continues to find an audience. What is it about Charles Manson and his family that captivates us still? Author Jeffrey Melnick sets out to answer this question in this fascinating and compulsively readable cultural history of the Family and their influence from 1969 to the present.
