Published in 1992, like the first, this second edition is not intended as introductory textbook command-driven, Boolean searching. It is targeted at online searchers who already have some knowledge of command languages and may be proficient searchers on databases in one or two subject areas, but when required to venture into new and less familiar territory still need guidance. It is also offered to end users who possess the subject

expertise but lack of information retrieval know-how. The Manual is offered as a guide to database selection and a navigational aid through the twists and turns of the retrieval maze; at least some of the dead ends and backtracking may thereby be avoided. This volume, written by experts in their various fields, deals with the subject coverage and record structures of specific databases, offers comparisons between databases (context, indexing procedures, updating policies, etc.), discusses the choice between online and CD-ROM sources (and between hosts if online is selected), and illustrates strategies with numerous search extracts.

One person's loss is another person's gain. This invaluable guide explains everything readers need to know about finding and financing foreclosed and soon-to-be foreclosed residential properties with the highest potential return. Completely updated, this new edition reflects recent changes in the way banks and the government dispose of foreclosed properties, covers new laws, and advises how to steer clear of scams. ? First edition sold more than 30,000 copies in a year and a half ? The national residential foreclosure rate rose to from .75% to 1.16% (of all mortgages) by the end of 2006-the biggest jump in 30 years ? Foreclosures are expected to continue to increase as interest rates rise and monthly payments on short-term variable rate and interest-only loans make homes unaffordable
