Mac's Angels: Midnight Fantasy Vamsee Puligadda This book presents a study of the relationship between Cabinet-level Ministers and top civil servants in Ireland. The nature of this relationship can potentially have far-reaching effects on people ' s lives as it can influence the type of public policy agreed at top levels of government. A total of sixteen interviews were carried out for the research, eight with retired Cabinet-level Ministers and eight

with retired Secretaries General of Irish government departments. Anonymity, not just for the participants but also for the government departments in which they had served, was vital to the success of the research. Also vital was the fact that only retirees were interviewed as this removed the fear for participants that their careers might suffer if they spoke too frankly. The result is a collection of interviews containing frank and open views on the relationship between Ministers and their officials and on how this relationship influences public

policy development.
