Early in its history,

anthropology was a visual as well as verbal discipline. But as time passed, visually oriented

professionals became a minority among their

colleagues, and most anthropologists used written words rather than audiovisual modes as their professional means of communication.

Today, however, contemporary electronic and interactive media once more

place visual anthropologists and anthropologically oriented artists within the mainstream. Digital media, small-sized and easy-to-use equipment, and the Internet, with its interactive and public forum websites, democratize roles once relegated to highly trained professionals alone. However, having access to a good set of tools does not guarantee accurate and reliable work. Visual anthropology involves much more than media alone. The definitive behind-the-scenes story of the visionary team that launched the handheld industry. Palm insider Andrea Butter and New York Times columnist David Pogue -- with full, exclusive cooperation of the company's founders and more than fifty key Palm and Handspring executives -- tell the riveting tale of the start of an industry constantly in the headlines. The origins of this volatile industry began with the tiny team who beat staggering odds to turn the PalmPilot into a billion-dollar market and later took their ultimate vision to Handspring,

now Palm's most powerful rival. Many of today's current events relating to the competition in this industry are forecasted in this important business drama. The authors take an unprecedented look at how the visionary founders of the industry led one of the most successful startups in history to succeed against all odds-including a shoestring budget, shortsighted corporate partners, and competition from Microsoft. The roller-coaster ride is full of insight into the bumbles of venture capitalists, the allure and pitfalls of partnerships with giant corporations, and the steely determination needed to maintain entrepreneurial and visionary independence. With gripping

accounts of the last-minute crises that almost torpedoed the PalmPilot on the eve of its unveiling, and the triumphant, unprecedented reception of Palm in the marketplace, as well as the glimpses into the future of this industry, this book is as entertaining as it is instructional. Key revelations include: \* The principles of business, economy, and product design that led Palm to succeed where billion-dollar corporations like Apple, Motorola, and Casio had failed. \* Important moments in technological development of the handheld such as the secret "Easter egg," a software surprise planted in the Palm software that nearly sank launch plans. \* Unique insight into the showdown with Microsoft, and

3Com's tragic decision not to make Palm independent that led Palm's founder Jeff Hanwkins and CEO Donna Dubinsky to take their vision elsewhere. \* The ongoing competition between Palm and Handspring. The new rivals to contend with including Sony. This book is provided as a guide, encouragement and handbook for faculty to introduce digital media in language you can understand and provide strategies and activities you can quickly assimilate into your teaching.

We are excited that more people will be able to benefit from the powerful help and guidance contained in this book. We are even more exhilarated as we anticipate how each of you will discover applications and new directions we would never anticipate, and look forward.

We look forward to your innovations as you use the material you discover here. This book responds to the needs of our changing world and students by revealing innovative technology applications and how faculty are and can use digital media in teaching in higher education because faculty make the quickest changes and learn how to do it best. It is a valuable resource for faculty from faculty, because it allows the sharing of successful teaching experiences with digital media with our

worldwide colleagues so they may modify it, extend it, and improve it. Moreover, in our work with faculty across all disciplines, we also find that many struggle to think about teaching in ways in which they can incorporate technology meaningfully. While we might be experts in our discipline (chemistry, philosophy, music, etc) due to the curriculum of terminal degrees, we might not have strong preparation in instructional design. We have been fortunate to bring together faculty experts across

different disciplines to specifically speak about how and why to use digital media in higher education settings. We realize we are asking you to think about your way of teaching with new ideas and strategies. Therefore, we try to illustrate them with clear examples. These different approaches include clear descriptions of what these activities look like, why to develop and implement them, and how to do so for your specific needs. How to Write Successful Business and Management Essays IT in Science "Grey is the color of truth." So observed Mac Bundy in defending America's intervention in Vietnam. Kai Bird brilliantly captures this ambiguity in his revelatory look at Bundy and his brother

William, two of the most influential policymakers of the Kennedy and Johnson administrations. It is a portrait of fiercely patriotic, brilliant and brazenly self-confident men who directed a steady escalation of a war they did not believe could be won. Bird draws on seven years of research, nearly one hundred interviews, and scores of still-classified top secret documents in a masterful reevaluation of America's actions throughout the Cold War and Vietnam.
