Clinical psychologist Serena Wieder Ph.D. redefines the building blocks of development and the challenges that derail a child's functioning and learning. For Wieder, vision and space -- what is seen by the eyes, transformed by the mind and experienced as movement, plays a crucial but heretofore underestimated crucial role in the development of a child's thoughts and feelings. Co-author Harry Wachs, O.D., a pioneer of developmental vision therapy, offers therapy focused on visual/spatial aspects of development supporting cognition. Based on decades of experience, Wieder and Wachs guide therapists and parents in interventions for use at home, school and therapy offices involving affect based Floortime approaches and other problem-solving experiences, addressing unrecognized challenges that often derail life competencies, learning and development. A new step-by-step Manual presents tools to develop visual/spatial learning. This groundbreaking book changes the way parents and therapists

understand child development and work to promote each child's potential in meaningful ways.

The great thing about being Canadian is simply this: we don't take ourselves too seriously, which works out pretty well because no one else on the planet takes us seriously, either. If you're reading this book, there's a good chance you're a Canadian. But what does that mean? There are the stereotypical nods, such as politeness and apologizing, but there's so much more! To be honest, you've probably taken part in (or at least talked about) hockey, poutine, curling, canoes, health care, snowshoes, parkas, camping, beer, road work, Canadian Tire, Slurpees, moose, maple syrup, and Tim Hortons in the last 24 hours. "A Hoser's Guide to Canadian History" is your ticket to even more things "Canadian" that you may have missed during your water-cooler discussions, online chats, or your seventeen-hour wait in the local emergency room. As you read this book, you'll discover new and exciting facts about Canada that simply weren't taught in school. As a History teacher, I found the need to spread the unvarnished truth of this great nation's past. People like Sir John "Eh" MacDonald, Tommy Douglas, and Pierre Trudeau all had a distinct impact on this great country of ours, and part of their stories are included in these pages. Even less-famous folks who helped to shape Canada got a mention: John Humphrey, Laura Secord, and Egerton Ryerson. (Yes, "Egerton" is a real name.) Canada has an exciting past, full of events that have brought us to where we are now. Like all countries, we have some things we'd like to forget, but most of those unpleasant moments happened because we had morons in Parliament, something that doesn't happen anymore. Canadians have no need to apologize for being nice, honest, and caring people. So, please enjoy this book, and if you don't, well, I'm

sorry.

Getting Started in VISTA "O'Reilly Media, Inc."

The Best Place for Garbage is the best place to learn about composting with earthworms. Worms can easily turn your organic waste into very valuable fertilizer that you can use to make anything green grow better and stronger. Use it in your garden, on your lawn, on your houseplants, even to make the green in your wallet grow faster by selling worm compost.

Whether you are new to this wonderful process or you want to expand your expertise, this comprehensive tutorial has it all. Everything is covered: from indoor and outdoor worm homes, how to feed your worms, what to feed your worms, how to harvest the castings and, most importantly, both how and why to use them. What sets this book apart is not the telling of what to do (though that part is pretty darn good!), but you will also learn why you are doing what you are doing. This makes it easy for you to figure out things on your own once you get going. There are great troubleshooting tips and tricks to make sure you never fall victim to a smelly worm bin or worse: dead worms. There are actually many myths surrounding what worms can and cannot eat and where and how they can or cannot live. Find out the real truth in The Best Place for Garbage as you learn how these myths came to be and why they really are just urban legends (Yes, worms can eat meat. And citrus. And bananas. No, you do not need to drill holes in your bin. Really!) Told with a very heavy dose of humor and an even bigger helping of common sense, this book is perfect for anyone who gardens, anyone who recycles, anyone who eats. It is currently estimated that over a third of all waste is made up of organic matter that can be recycled. Recycling plastics and such is awesome, but in this case, you can personally make a difference and get something valuable in return. Try that with a water bottle. Also includes a bonus section of ideas for school and college level science projects.
