The understanding of how to reduce risk factors for mental disorders has expanded remarkably as a result of recent scientific advances. This study, mandated by Congress, reviews those advances in the context of current research and provides a targeted definition of prevention and a conceptual framework that emphasizes risk reduction. Highlighting opportunities for and barriers to interventions, the book draws on successful models for the prevention of cardiovascular disease, injuries, and smoking. In addition, it reviews the risk factors associated with Alzheimer's disease, schizophrenia, alcohol abuse and dependence, depressive disorders, and conduct disorders and evaluates current illustrative prevention programs. The models and examination provide a framework for the design, application, and evaluation of interventions intended to prevent mental disorders and the transfer of knowledge about prevention from research to clinical practice. The book presents a focused research agenda, with recommendations on how to develop effective intervention programs, create a cadre of prevention researchers, and improve coordination among federal agencies.

Ever since *The Night in Question* left her with a hideous scar and no memory of what happened, Theo Lane has been hiding. An aspiring filmmaker, she uses a hidden button cam to keep the world at bay. She spends the entire summer in a Manhattan café, secretly documenting random "subjects." Once school starts, Theo finds her best friend has morphed into a flirtatious, short-skirt-clad stranger. Everyone ignores the scar. As if that will make it go away. The café remains her lunchtime refuge. Her most interesting subject is the Lost Boy, a stranger who comes in every day at the same time. When she finally gets up the courage to talk to him she discovers why: the Lost Boy, Andy, is waiting for someone who said she'd meet him there . . . four days ago. Intoxicated by Andy's love for this mystery girl, Theo agrees to help him find her, and her unhealthy obsession pulls her into a perilous, mind-bending journey. But is it really Andy's world she's investigating? Or is it her own? From the Hardcover edition.

A century ago, national political parties' nominating conventions for U.S. presidential candidates often resembled wide-open brawls, filled with front-stage conflicts and back-room deals. Today, leagues of advisors precisely plan and carefully script these events even though their outcomes are largely preordained. *Rewiring Politics* offers the first in-depth exploration of the profound changes in the nominating process to focus on the role of the media. Fourteen luminaries from the worlds of media and politics examine how the technology of "coverage" has transformed conventions over time. As the contributors demonstrate, the story of the evolution of the nominating process cannot be told without the concomitant story of the revolution in mass media. The impact of the media on political conventions has received surprisingly little scholarly attention. Yet few aspects of the American political process have faced such radical alterations in such a short period of time. From the first live television broadcast from a national convention on June 21, 1948, during the Republican convention in Philadelphia, through the advent of cable networks and the Internet, both the presentation and the content of the nominating process has been transformed. Today, because the party's nominee is selected before the event, candidates use their conventions-and convention coverage-as a form of advertising. They design mega-media events to electrify the party faithful and to woo undecided voters by dazzling them. Without a doubt, the contributors conclude, conventions still matter, though their role has changed over the past decades. *Rewiring Politics* helps readers assess the evolution of conventions in contemporary politics and addresses the implications of these changes on our parties, politics, and society.

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. *Parenting Matters* identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, *Understanding Child Abuse and Neglect*, which provided an overview of the research on child abuse and neglect. *New Directions in Child Abuse and Neglect Research* updates the 1993 report and provides new recommendations to respond to this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. *New Directions in Child Abuse and Neglect Research* recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. *New Directions in Child Abuse and Neglect Research* identifies four areas to look to in developing a coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response.

The seventeenth edition of *Party Politics in America* continues the comprehensive and authoritative coverage of political parties for which it is known while expanding and updating the treatment of key related topics including interest groups and elections. Marjorie Hershey builds on the book's three-pronged coverage of party organization, party in the electorate, and party in government and integrates contemporary examples—such as campaign finance reform, party polarization, and social media—to bring to life the fascinating story of how parties shape our political system. New to the 17th Edition Fully updated through the 2016 election, including changes in virtually all of the boxed materials, the chapter openings, and the data presented. Explores increasing partisan hostility, the status of voter ID laws and other efforts to affect voter turnout, young voters' attitudes and participation, and the role of big givers such as the energy billionaire Koch brothers in the 2016 campaigns. Critically examines the idea that Super PACs are replacing, or can replace, the party organizations in running campaigns. New and expanded online Instructor's Resources, including author-written test banks, essay questions, relevant websites with correlated sample assignments, the book's appendix, and links to a collection of course syllabi.

Based on expert review and research, this book provides an innovative standard and guide to social studies textbooks used in kindergarten through 12th grade classrooms for content, style, and design. The standards provide a foundation for individuals to select satisfactory textbooks and to help educators and school boards in the adoption of instructional materials. Chapter 1 addresses the problems of textbook content and style. Chapter 2 discusses the vast business of social studies publishing and the increased complexity of textbook packaging with the movement away from state-level adoption of textbooks. Chapter 3 focuses on the content of social studies textbooks with a comparison of past and present textbooks, a discussion of revisionism and reality, and a look at religion in textbooks. Chapter 4 examines the style and story of textbooks and finds that although the content of past textbooks may be flawed, the prose is superior to recent textbooks. Ideas on narrative, readability, vocabulary, instructional design, history, and style provide ways for textbooks to improve. Chapter 5 addresses the issue of format and proposes clarity and simplicity in technical design of books. Chapter 6 provides an outline to review textbooks for content and style and instructional activities and teacher guidance materials for usefulness. Chapter 7 includes an annotated list of the major U.S. and world history textbooks. (CK)
