The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard Times makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

The Piano Shop on the Left Bank Random House Trade Paperbacks  
Walking his two young children to school every morning, Thad Carhart passes an unassuming little storefront in his Paris neighborhood. Intrigued by its simple sign--Desforges Pianos--he enters, only to have his way barred by the shop's imperious owner. Unable to stifle his curiosity, he finally lands the proper introduction, and a world previously hidden is brought into view. Luc, the atelier's master, proves an indispensable guide to the history and art of the piano. Intertwined with the story of a musical friendship are reflections on how pianos work, their glorious history, and stories of the people who care for them, from amateur pianists to the craftsmen who make the mechanism sing. The Piano Shop on the Left Bank is at once a beguiling portrait of a Paris not found on any map and a tender account of the awakening of a lost childhood passion. Praise for The Piano Shop on the Left Bank: "[Carhart's] writing is fluid and lovely enough to lure the rustiest plunker back to the piano bench and the most jaded traveler back to Paris." --San Francisco Chronicle "Captivating . . . [Carhart] joins the tiny company of foreigners who have written of the French as verbs. . . . What he tries to capture is not the sight of them, but what they see." --The New York Times "Thoroughly engaging . . . In part it is a book about that most unpredictable and pleasurable of human experiences, serendipity. . . . The book is also about something more difficult to pin down, friendship and community." --The Washington Post "Carhart writes with a sensuousness enhanced by patience and grounded by the humble acquisition of new insight into music, his childhood, and his relationship to the city of Paris." --The New Yorker NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WASHINGTON POST BOOK WORLD

Kosher? That means the rabbi blessed it, right? Not exactly. In this captivating account of a Bible-based practice that has grown into a multibillions-dollar industry, journalist Sue Fishkoff travels throughout America and to Shanghai, China, to find out who eats kosher food, who produces it, who is responsible for its certification, and how this fascinating world continues to evolve. She explains why 86 percent of the 11.2 million Americans who regularly buy kosher food are not observant Jews—they are Muslims, Seventh-day Adventists, vegetarians, people with food allergies, and consumers who pay top dollar for food they believe “answers to a higher authority.” Fishkoff interviews food manufacturers, rabbinic supervisors, and ritual slaughterers; meets with eco-kosher adherents who go beyond traditional requirements to produce organic chicken and pasture-raised beef; sips boutique kosher wine in Napa Valley; talks to shoppers at an upscale kosher supermarket in Brooklyn; and marches with unemployed workers at the nation’s largest kosher meatpacking plant. She talks to Reform Jews who are rediscovering the spiritual benefits of kashrut, and to Conservative and Orthodox Jews who are demanding that kosher food production adhere to ethical and environmental values. And she chronicles the corruption, price-fixing, and strong arm tactics of early-twentieth-century kosher meat production, against which contemporary kashrut standards pale by comparison. A revelatory look at the current state of kosher in America, this book will appeal to anyone interested in food, religion, Jewish identity, or big business.
