Anthropological reflections on citizenship focus on themes such as politics, ethnicity and state management. Present day scholarship on citizenship tends to problematise, unsettle and contest often taken-for-granted conventional connotations and associations of citizenship with imagined culturally bounded political communities of rigidly

controlled borders. This book, the result of two years of research conducted by South African and Japanese scholars within the framework of a bilateral project on citizenship in the 21st century, contributes to such ongoing efforts at rethinking citizenship globally, and as informed by experiences in Africa and Japan in particular. Central to the essays in this book is the concept of flexible citizenship, predicated on a recognition of the histories of mobility of people and cultures, and of the shaping and reshaping of places and spaces, and ideas of being and belonging in the process. The book elucidates the contingency of political membership, relationship between everyday

practices and political membership, and how citizenship is the mechanism for claiming and denying rights to various political communities. 'Self' requires 'others' to construct itself, a reality that is subject to renegotiation as one continues to encounter others in a world characterised by myriad forms of interconnecting mobilities, both global and local. Citizenship is thus to be understood within a complex of power relationships that include ones formed by laws and economic regimes on a local scale and beyond. Citizenship in Africa, Japan and, indeed, everywhere is best explored productively as lying between the open-ended possibilities and tensions interconnecting the global and local.

Essay from the year 2015 in the subject Pedagogy - Common Didactics,

Educational Objectives, Methods, grade: A, , language: English, abstract: If a curriculum is going to be relevant it must respond to the changes in society. The relevance and effectiveness of a curriculum which will be good for school instruction must thus take into consideration the changes in society; society should be given an opportunity for inclusion of its aspirations. It becomes important that the curriculum is constructed in light of the factors that are present in society and how these factors change over time such as the culture and the availability of resources and the ideology of a nation. This essay will thus discuss the view that effective curriculum must respond to changes in society.

A “very welcome volume” of essays questioning the presumption of irreconcilable conflict between science and religion (*British Journal for the History of Science*). The “conflict thesis”—the idea that an inevitable, irreconcilable conflict exists between science and religion—has long been part of the

popular imagination. *The Warfare between Science and Religion* assembles a group of distinguished historians who explore the origin of the thesis, its reception, the responses it drew from various faith traditions, and its continued prominence in public discourse. Several essays examine the personal circumstances and theological idiosyncrasies of important intellectuals, including John William Draper and Andrew Dickson White, who through their polemical writings championed the conflict thesis relentlessly. Others consider what the thesis meant to different religious communities,

including evangelicals, liberal Protestants, Roman Catholics, Eastern Orthodox Christians, Jews, and Muslims. Finally, essays both historical and sociological explore the place of the conflict thesis in popular culture and intellectual discourse today. Based on original research and written in an accessible style, the essays in *The Warfare between Science and Religion* take an interdisciplinary approach to question the historical relationship between science and religion, and bring much-needed perspective to an often-bitter controversy. How are we to live with the wide varieties of sexuality and gender found across the rapidly changing global order? Whilst some countries have legislated in favour of same-sex marriage and the United Nations makes declarations about gender and sexual equality, many countries across the world employ punitive responses to such differences. In this compelling and original study, Ken Plummer argues the need for a practical utopian project of hope that he calls

‘ cosmopolitan sexualities ’ . He asks: how can we connect our differences with collective values, our uniqueness with multiple group belonging, our sexual and gendered individualities with a broader common humanity? Showing how a foundation for this new ethics, politics and imagination are evolving across the world, he discusses the many possible pitfalls being encountered. He highlights the complexity of sexual and gender cultures, the ubiquity of human conflict, the difficulties of dialogue and the problems with finding any common ground for our humanity. Cosmopolitan Sexualities takes a bold critical humanist view and argues the need for positive norms to guide us into the future. Highlighting the vulnerability of the human being, Plummer goes in search of historically grounded and potentially global human values like

empathy and sympathy, care and kindness, dignity and rights, human flourishing and social justice. These harbour visions of what is acceptable and unacceptable in the sexual and intimate life. Clearly written, the book speaks to important issues of our time and will interest all those who are struggling to finding ways to live together well in spite of our different genders and sexualities.

"Wow, what a difference a couple of years makes. Never before in my lifetime (and I have been around the block more times than I care to admit) has there been so much debate and outright disagreement about the state of our society. People are lining up on one side or another regarding immigration, climate change, jobs, the role of government, health care,

terrorism, threats to democracy, reproductive rights, and the high cost of higher education. If consensus seems elusive, keep in mind that even the idea of truth is under attack, with people disagreeing not only over the facts but also whether there is such a thing as objective truth and real news. Many of us feel angry, afraid, and overwhelmed. In such a situation, what are we to do? To answer this question, we might turn for inspiration to the wisdom offered more than sixty years ago by C. Wright Mills. When we feel our lives spinning out of control, when we are caught up in changes and challenges that threaten to overwhelm us, Mills suggested that we recognize that our personal problems are rooted

in social forces that are bigger than we are. By turning our attention to larger social patterns-in short, by making use of the sociological imagination-we gain a deeper understanding of what's really going on and why. Using the sociological perspective, we draw insight and also gain power because we are now confronting the source of our distress. Focusing on how society operates, we are able to join together with others to change society and, in the process, transform ourselves. For more than 150 years, sociologists have been working to better understand how society operates. As sociologists, we do not arrogantly imagine that we have all the answers, but we are confident that we have learned quite a lot that we can share with others. To our students, we offer an introduction to the fascinating and very practical study of the social world. Our invitation is to learn what we have learned and consider appropriate paths of action. After all, as we come to know our world, we have the responsibility to do all we can to improve it. *Society: The Basics, Fifteenth Edition Update*, provides you with a comprehensive understanding of how this world works. You will find this title informative, engaging, and even entertaining. Before you have finished the first chapter, you will discover that sociology is both enlightening and useful, and it is also a great deal of fun. Sociology is a field of study that can change the way you see

the world and open the door to many new opportunities. What could be more exciting than that?"--
