Approaching the Stuart courts through the lens of the queen consort, Anna of Denmark, this study is underpinned by three key themes: translating cultures, female agency and the role of kinship networks and genealogical identity for early modern royal women. Illustrated with a fascinating array of

objects and artworks, the book follows a trajectory that begins with Anna's exterior spaces before moving to the interior furnishings of her palaces, the material adornment of the royal body, an examination of Anna's visual persona and a discussion of Anna's performance of extraordinary rituals that follow her life cycle. Underpinned

by a wealth of new archival research, the book provides a richer understanding of the breadth of Anna's interests and the meanings generated by her actions, associations and possessions. *Handbook for Sound Engineers* CRC Press Lights, Camera, Worship! is a manual for all of your technical needs. The RDS-1 was created as a prototype for evaluation of a complex, portable, turnkey, video / audio recording studio for today's Concert Video Producers, TV Producers, industrial Media departments, high end Videographer, or well-funded Band that wants to produce their own video segments. The 24 track 24 bit hard disk recording deck from Mackie takes the 24 tracks from the retractable Mackie 1604 VLZ mixing boards and cleanly records them onto a removable computer hard disk. This unit also provides equipment to direct a 6 video camera crew including video screens, preview and program out switchers and an intercom system. Even though major pieces of equipment like the Makie 24/96 hard disk recorder are out of production there are a number of even better recorders that can take its place when you decide to make your own recording console. This book will be an invaluable tool at the design stage as well as a guide to write your own OPERATIONS MANUAL.
