"The main goal of this book is to present what could be called Brazilian guitar today, working melodically, harmonically and rhythmically in some of the most important Brazilian musical styles. We have chosen to always use two electric guitars in these arrangements (but in the song "Voleiros e Cantadores", which is for solo electric guitar), so that the essential functions of the guitar – rhythm, melody and harmony – might be expressed in the clearest and best way in each different style. We have made three versions of each piece, for ease of study: a complete one, one without the first electric guitar, and one without the second electric guitar. Therefore the student will be able to listen to the complete version and then practice with the other ones, playing the missing parts of the first guitar and the second guitar. At the end of the book, like an appendix, we have included the bass lines used in the recordings to strengthen the rhythmic and harmonic comprehension of each style." All music is in notation and tablature. A free recording of the music is available as an internet download.

As the world grows more complex, some of the best stories are told through visuals - infographics. From election results to catastrophes to wars to scientific discoveries: the stream of data we are exposed to daily becomes ever more complicated. Infographics help make sense of it, transforming difficult to grasp facts and figures into accessible visualizations. Print media are increasingly making successful use of them. Visual Journalism reveals the masters of this discipline and their finest works. The portraits of studios and individuals within this compendium illustrate how the world of infographics continues to evolve as it informs data and graphic trends. A visual revolution showcases the myriad possibilities of non-verbal communication.

Documentary Storytelling has reached filmmakers and filmgoers worldwide with its unique focus on the key ingredient for success in the growing global documentary marketplace: storytelling. This practical guide reveals how today's top filmmakers bring the tools of narrative cinema to the world of nonfiction film and video without sacrificing the rigor and truthfulness that give documentaries their power. The book offers practical advice for producers, directors, editors, cinematographers, writers and others seeking to make ethical and effective films that merge the strengths of visual and aural media with the power of narrative storytelling. In this new, updated edition, Emmy Award-winning author Sheila Curran Bernard offers: New strategies for analyzing documentary work New conversations with filmmakers including Stanley Nelson (The Black Panthers), Kazuhiro Soda (Mental), Orlando von Einsiedel (Virunga), and Cara Mertes (JustFilms) Discussions previously held with Susan Kim (Imaginary Witness), Deborah Scranton (The War Tapes), Alex Gibney (Taxi to the Dark Side), and James Marsh (Man on Wire).

This book consists of two titles, which are the following: Book 1: In this guide, you will learn about all the basics of artificial intelligence. You'll learn what it is, how it works, and where it came from (or, in other words, how it all started). Aside from that, we'll dive into some data analytics and examples of artificial intelligence. We'll cover several steps in the analytical process, and see what it takes for artificial intelligence to be effective. Last but not least, safety and privacy issues will be brought to light, since today's age is full of hacking, spying, and theft. Therefore, it is mandatory that these devices and systems are kept safe and secure. Book 2: Many people have unanswered questions about artificial intelligence. Today, the majority of those questions will likely be answered. Concerns will be addressed, and examples will be

given. This book starts off with a question and answer section about artificial intelligence. It then proceeds to cover specific artificially intelligent applications, such as chatbots and robotics. These pages will show details of things that puzzle many people's minds. But you won't be left in the dark and will enjoy the full benefits of this knowledge.

What does it mean to be a conservative in an age so sceptical of conservatism? How can we live in the presence of our 'canonized forefathers' at a time when their cultural, religious and political bequest is so routinely rejected? With soft left-liberalism as the dominant force in Western politics, what can conservatives now contribute to public debate that will not be dismissed as pure nostalgia? In this highly personal and witty book, renowned philosopher Roger Scruton explains how to live as a conservative in spite of the pressures to exist otherwise. Drawing on his own experience as a counter-cultural presence in public life, Scruton argues that while humanity might survive in the absence of the conservative outlook, it certainly won't flourish. How to be a conservative is not only a blueprint for modern conservatism. It is a heartfelt appeal on behalf of old fashioned decencies and values, which are the bedrock of our weakened, but still enduring civilization.

Can machines write books? Can artificial intelligence be used for business? Will touch screens be around, or will they be replaced by voice recognition? What are deepfakes? How do self-driving cars work, and are they going to be a reality soon? These questions all come to light in this brief but informational book about artificial intelligence. Society is changing quickly because of automated systems in place that either benefit or undermine people's living style, jobs, and brains. Today, we explore what that future may hold. We will also look into options for civilians in today's modern world to adapt more quickly. Don't underestimate the rise of artificial intelligence. Understand the future. Futurist Gerd Leonhard breaks new ground again by bringing together mankind's urge to upgrade and automate everything--down to human biology itself--with our timeless quest for freedom and happiness. Before it's too late, we must stop and ask the big questions: How do we embrace technology without becoming it? When it happens--gradually, then suddenly--the machine era will create the greatest watershed in human life on Earth. Technology vs. Humanity is one of the last moral maps we'll get as humanity enters the Jurassic Park of Big Tech. Artificial intelligence. Cognitive computing. The Singularity. Digital obesity. Printed food. The Internet of Things. The death of privacy. The end of work-as-we-know-it, and radical longevity: The imminent clash between technology and humanity is already rushing towards us. What moral values are you prepared to stand up for--before being human alters its meaning forever? Gerd Leonhard is a new kind of futurist schooled in the humanities as much as in technology. In his most provocative book to date, he explores the exponential changes swamping our societies, providing rich insights and deep wisdom for business leaders, professionals and anyone with decisions to make in this new era. If you take being human for granted, press Reset now with this passionately argued call to create a genuinely braver new world.

Fr. Canice Bourke, who wrote this jewel of a guide, fought his pride valiantly: the record of his struggles fills this book. He shows how pride can be so deceptive that you can excel in all the other virtues and still lose your soul to pride. He teaches you to see our Lord as the model from whom you can learn humility and gives you practical instructions on how you can cultivate humility -- without becoming proud of it.
