Concepts, Skills, and Problem Solving. Grade 3 McGraw-Hill Education

Are current testing practices consistent with the goals of the reform movement in school mathematics? If not, what are the alternatives? How can authentic performance in mathematics be assessed? These and similar questions about tests and their uses have forced those advocating change to examine the way in which mathematical performance data is gathered and used in American schools. This book provides recent views on the issues surrounding mathematics tests, such as the need for valid performance data, the implications of the Curriculum and Evaluation Standards for School Mathematics for test development, the identification of valid items and tests in terms of the Standards, the procedures now being used to construct a sample of state assessment tests, gender differences in test taking, and methods of reporting student achievement.

Concepts, Skills, and Problem Solving. Grade 5 California Mathematics Concepts, Skills, and Problem Solving. Grade 3 Presents a comprehensive vertically-aligned mathematics program to ensure that all students master the California Mathematics Contents Standards. Provides support for English learners, students with special needs, and gifted and talented students.
