Long the bestseller for the intermediate macroeconomics course, Greg Mankiw's superbly crafted textbook maintains its authority, currency, and vitality edition after edition, and the new Eighth Edition is the most accomplished yet. Again, Mankiw provides an exceptionally clear and concise introduction to the macroeconomy, taking full account of the 2007-2009 financial crisis and the measures taken in response to it. In addition to a new chapter directly inspired by the crisis (Chapter 20, The Financial System: Opportunities and Dangers) the new edition also features new research, discussions, and case studies throughout, as well as the most extensive media/supplements package available for any intermediate macroeconomics. You are welcome to use the new Financial System: Opportunities and Dangers chapter this semester with students. We will keep it

posted through early June to allow free access for all who wish to have students read it.

David R. Hakes (University of Northern Iowa) has prepared a study guide that will enhance your success. Each chapter of the study guide includes learning objectives, a description of the chapter's context and purpose, a chapter review, key terms and definitions, advanced critical-thinking questions, and helpful hints for understanding difficult concepts. You can develop your understanding of the material by doing the practice problems and answering the short-answer questions. Then you can assess your mastery of the key concepts with the self-test, which includes true/false and multiple-choice questions.

This engaging text offers a brief, readable description of our common Western heritage as it began in the first human societies and developed in ancient Greece and Rome, then through the Middle Ages. Providing a tightly focused narrative and interpretive structure, Brian A. Pavlac covers the basic historical information that all educated adults should know. His joined terms "supremacies and diversities" develop major themes of conflict and creativity throughout history. The text is also informed by five other topical themes:

technological innovation, migration and conquest, political and economic decision-making, church and state, and disputes about the meaning of life. Written with flair, this easily accessible yet deeply knowledgeable text provides all the essentials for a course on Western civilization.

### **Essentials of Economics** St. Martin's Griffin

The first practical guide of its kind that helps students transition smoothly from high school to college The transition from high school—and home—to college can be stressful. Students and parents often arrive on campus unprepared for what college is really like. Academic standards and expectations are different from high school; families aren't present to serve as

“scaffolding” for students; and first-years have to do what they call “adulting.” Nothing in the college admissions process prepares students for these new realities. As a result, first-year college students report higher stress, more mental health issues, and lower completion rates than in the past. In fact, up to one third of first-year college students will not return for their second year—and colleges are reporting an increase in underprepared first-year students. How to College is here to help. Professors Andrea Malkin Brenner and Lara Schwartz guide first-year students and their families through the transition process, during the summer after high school graduation and throughout the school

Macroeconomics: Canadian Edition W. W. Norton Jones and George are dedicated to the challenge of "Making It Real" for students. As a team, they are uniquely qualified to write about the organizational challenges facing today's managers. No other author team in the management discipline matches their combined research and text-writing experience. Essentials of Management concisely surveys current management theories and research. Through a variety of real world examples from small, medium, and large companies the reader learns how those ideas are used by practicing managers. The organization of this text follows the mainstream functional approach of planning, organizing, leading, and controlling; but the content is flexible and encourages instructors to use the organization they are most comfortable with. The themes of diversity, ethics, and information technology are clearly evident through in-text examples, photographs, "unboxed" stories, and the end-of-chapter material - all areas of importance that truly serve to bring to life the workplace realities that today's student will encounter in the course of a career.

Microeconomics Principles of Macroeconomics

This special edition of Greg Mankiw's intermediate macroeconomics textbook takes the same approach that made the parent text a bestseller, but with coverage shaped to address fiscal policy, monetary/exchange-rate policy, deficit reduction, and other critical economic issues from the uniquely Canadian perspective. Like Mankiw's *Macroeconomics*, the Canadian edition teaches fundamentals by relating theoretical concepts to big issues and policy debates, but illustrates those ideas and discussions with examples and cases from

Canada, as well as research by Canadian economists. *Intermediate Microeconomics with Calculus* Macmillan Higher Education *Principles of Macroeconomics* 8th edition boils economics down to its essentials, by considering what is truly important for students to learn in their first course in economics. In keeping with the authors' philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues – including the impacts of the contemporary macroeconomic issues, inflation, unemployment, interest rates, and monetary and fiscal policy. The resource emphasises the material that students should and do find interesting about the study of the economy, resulting in a focus on applications and policy, and less on formal economic theory. *Principles of Macroeconomics*, 8th edition encourages students to make their own judgements by presenting both sides of the debate on five controversial issues facing policy makers: the proper degree of policy activism in response to the business cycle, the choice between rules and discretion in the conduct of monetary policy, the desirability of reaching zero inflation, the importance of balancing the government's budget, and the need for tax reform to encourage saving.
