Macroeconomics can be defined as branch of economics which deals with the economy in aggregates. It is a branch which deals with the structure, performance, behavior, and decision-making of an economy as a whole instead of individual market. The decisions taken in macroeconomics are inflation rate, unemployment rate and output level in an economy.

### MACROECONOMICS IN CONTEXT, SECOND EDITION

‘ The new edition of Macroeconomics in Context is the best English language introductory macro textbook with a focus on Europe. Three unique features make it outstanding: first, the "contextual" approach – viewing economy as embedded in society, nature, institutions and policies; second, a thorough focus on the European Union; third, a response to the quest for more pluralism in theories, with both Keynesianism and mainstream macro plus related controversies. ’
