An extraordinary chronicle of Venice, its people, and its grandeur Thomas Madden's majestic, sprawling history of Venice is the first full portrait of the city in English in almost thirty years. Using long-buried archival material and a wealth of newly translated documents, Madden weaves a spellbinding story of a place and its people, tracing an arc from the city's humble origins as a lagoon refuge to its apex as a vast maritime empire and Renaissance epicenter to its rebirth as a modern tourist hub. Madden explores all aspects of Venice's breathtaking achievements: the construction of its unparalleled navy, its role as an economic powerhouse and birthplace of capitalism, its popularization of opera, the stunning architecture of its watery environs, and more. He sets these in the context of the rise and fall of the Byzantine Empire, the endless waves of Crusades to the Holy Land, and the awesome power of Turkish sultans. And perhaps most critically, Madden corrects the stereotype of Shakespeare's money-lending Shylock that has distorted the Venetian character, uncovering instead a much more complex and fascinating story, peopled by men and women whose ingenuity and deep faith profoundly altered the course of civilization.

An examination of free-to-play and mobile games that traces what is valued and what is marginalized in discussions of games. Free-to-play and mobile video games are an important and growing part of the video game industry, and yet they are often disparaged by journalists, designers, and players and pronounced inferior to games with more traditional payment models. In this book, Christopher Paul shows that underlying the criticism is a bias against these games that stems more from who is making and playing them than how they are monetized. Free-to-play and mobile games appeal to a different kind of player, many of whom are women and many of whom prefer different genres of games than multi-level action-oriented killing fests. It's not a coincidence that some of the few free-to-play games that have been praised by games journalists are *League of Legends* and *World of Tanks*.

With contributions from leading brand experts around the world, this valuable resource delineates the case for brands (financial value, social value, etc.) and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet may not even put a value on it, a company's brand or its portfolio of brands is its most valuable asset. For well-known companies it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not-for-profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every decision and every action. As well as making the case for brands and examining the argument of the anti-globalisation movement that brands are bullies which do harm, this second edition of Brands and Branding provides an expert review of best practice in branding, covering everything from brand positioning to brand protection, visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia, especially in China and India, brands in a digital world and the future for brands. Written by 19 experts in the field, Brands and Branding sets out to provide a better understanding of the role and importance of brands, as well as a wealth of insights into how one builds and sustains a successful brand.

National bestselling author Charles Wilson delivers a cutting-edge thriller based on real-life experiments at improving human intelligence currently underway in both government and private circles. Imagine a computer chip no bigger than the tip of a pencil. This chip, if implanted in a human brain, could give someone encyclopedic knowledge, lightning-fast reflexes and superior learning skills. In a remote military hospital in Montana, an experiment is being performed: implant the chip into the brains of five volunteers. These volunteers, four men and one woman, are all serving life sentences in prison. The experiment works...but the five criminals escape. One young doctor is pulled into the intrigue by the baffling murder of his medical school mentor. Can this one doctor stop the conspiracy of five powerful opponents...whose driving desire is absolute and total control?
