Of the thousands of papers and books about problematic sexual behaviors, most focus solely on sex crimes or so-called "hyper-sexuality" or "sexual addiction." Together, these publications present a grim and pessimistic prognosis for anyone who has unusual sexual interests of any type. This book challenges that view by providing a more informed and balanced review of what is known and what is not known about unconventional sexual interests. It is based on approximately thirty years of experience by the author concerning the assessment and treatment of paraphilias and unconventional sexual interests. The Paraphilias: Changing Suits in the Evolution of Sexual Interest Paradigms examines current and past perspectives concerning unconventional sexual interests associated with both criminal and non-criminal activities. Extensively referenced, it

challenges the dogma that sexual interests are immutably determined during a single critical period and are thereafter unchangeable. The book provides extensive case histories and tables summarizing over 100 paraphilias and the latest research regarding them. It also reviews diagnostic criteria for the paraphilias. Analyses of current and past paradigms are presented together with new ways to understand, investigate, and provide meaningful and effective assistance to people with paraphilias. It is written for mental health clinicians and specialists in the fields of sexology and forensic psychiatry and psychology.

Alice Keppel, the married lover of Queen Victoria's eldest son and great-grandmother to Camilla Parker-Bowles, was a key figure in Edwardian society. Hers was the acceptable face of adultery. Discretion was her hallmark. It was her art to be the king's mistress and yet to laud the Royal Family and the institution of marriage. Formidable and manipulative, her attentions to the king brought her wealth, power, and status. Her daughter Violet Trefusis had a long tempestuous affair with the author and aristocrat Vita Sackville-West, during which Vita left her husband and two sons to travel abroad with Violet. It was a liaison that threatened the fabric of Violet's social world, and her passion and recalcitrance in pursuit of it pitted her against her mother and society. From memoirs, diaries, and letters, Diana Souhami portrays this fascinating and intense mother/daughter relationship in Mrs. Keppel and Her Daughter. Her story of these women, their lovers, and their lovers' mothers, highlights Edwardian - and contemporary - duplicity and double standards and goes to the heart of questions about sexual freedoms.

This revised, updated edition provides a comprehensive and rigorous description of the application of Hamilton's principle to continuous media. To introduce terminology and initial concepts, it begins with what is called the first problem of the calculus of variations. For both historical and pedagogical reasons, it first discusses the application of the principle to systems of particles, including conservative and non-conservative systems and systems with constraints. The foundations of mechanics of continua are introduced in the context of inner product spaces. With this basis, the application of Hamilton's principle to the classical theories of fluid and solid mechanics are covered. Then recent developments are described, including materials with microstructure, mixtures, and continua with singular surfaces.

"Fans of the forensics-oriented novels of such mystery writers as

Kathy Reichs and Patricia Cornwell...not to mention television series like CSI: Crime Scene Investigation, will make an eager audience for this one.”—Booklist On a patch of land in the Tennessee hills, human corpses decompose in the open air, aided by insects, bacteria, and birds, unhindered by coffins or mausoleums. This is Bill Bass’s “Body Farm,” where nature takes its course as bodies buried in shallow graves, submerged in water, or locked in car trunks serve the needs of science and the cause of justice. In *Death’s Acre*, Bass invites readers on an unprecedented journey behind the gates of the Body Farm where he revolutionized forensic anthropology. A master scientist and an engaging storyteller, Bass reveals his most intriguing cases for the first time. How Boston radio station WBCN became the hub of the rock-and-roll, antiwar, psychedelic solar system. While San Francisco was celebrating a psychedelic Summer of Love in 1967, Boston stayed buttoned up and battened down. But that changed the following year, when a Harvard Law School graduate student named Ray Riepen founded a radio station that played music that young people, including the hundreds of thousands at Boston-area colleges, actually wanted to hear. WBCN-FM featured album cuts by such artists as the Mothers of Invention, Aretha Franklin, and Cream, played by announcers who felt free to express their opinions on subjects that ranged from recreational drugs to the war in Vietnam. In this engaging and generously illustrated chronicle, Peabody Award-winning journalist and one-time WBCN announcer Bill Lichtenstein tells the story of how a radio station became part of a revolution in youth culture. At WBCN, creativity and countercultural politics ruled: there were no set playlists; news segments anticipated the satire of *The Daily Show*; on-air interviewees ranged from John and Yoko to Noam Chomsky; a telephone “Listener Line” fielded questions on any subject, day and night. From 1968 to Watergate, Boston’s WBCN was the hub of the rock-and-roll, antiwar, psychedelic solar system. A cornucopia of images in color and black and white includes concert posters, news clippings, photographs of performers in action, and scenes of joyousness on Boston Common. Interwoven through the narrative are excerpts from interviews with WBCN pioneers, including Charles Laquidara, the “news dissector” Danny Schechter, Marsha Steinberg, and Mitchell Kertzman. Lichtenstein’s documentary *WBCN and the American Revolution* is available as a DVD sold separately.

Winner of the Crime Writers' Association ALCS Gold Dagger for Nonfiction— A tour through the human skeleton and the secrets our bones reveal, from the author of *All That Remains* In her memoir *All That Remains*, internationally renowned forensic anthropologist and human anatomist Dame Sue Black recounted her life lived eye to eye with the Grim Reaper. During the course of it, she offered a primer on the basics of identifying human remains, plenty of insights into the fascinating processes of death, and a sober, compassionate understanding of its inescapable presence in our existence, all leavened with her wicked sense of humor. In her new book, Sue Black builds on the first, taking us on a guided tour of the human skeleton and explaining how each person's life history is revealed in their bones, which she calls "the last sentinels of our mortal life to bear witness to the way we lived it." Her narrative follows the skeleton from the top of the skull to the small bones in the foot. Each step of the journey includes an explanation of the biology—how the bone is formed in a person's development, how it changes as we age, the secrets it may hold—and is illustrated with anecdotes from the author's career helping solve crimes and identifying human remains, whether recent or historical. Written in *Bone* is full of entertaining stories that read like scenes from a true-life CSI drama, infused with humor and no-nonsense practicality about the realities of corpses and death.

During the Cold War, freedom of expression was vaunted as liberal democracy's most cherished possession—but such freedom was put in service of a hidden agenda. In *The Cultural Cold War*, Frances Stonor Saunders reveals the extraordinary efforts of a secret campaign in which some of the most vocal exponents of intellectual freedom in the West were working for or subsidized by the CIA—whether they knew it or not. Called "the most comprehensive account yet of the [CIA's] activities between 1947 and 1967" by the New York Times, the book presents shocking evidence of the CIA's undercover program of cultural interventions in Western Europe and at home, drawing together declassified documents and exclusive interviews to expose the CIA's astonishing campaign to deploy the likes of Hannah Arendt, Isaiah Berlin, Leonard Bernstein, Robert Lowell, George Orwell, and Jackson Pollock as weapons in the Cold War. Translated into ten languages, this classic work—now with a new preface by the author—is "a real contribution to popular understanding of the postwar period" (*The Wall Street Journal*), and its story of covert cultural efforts to win hearts and minds continues to be relevant today.
