Picky Parent Guide: Choose Your Child's School with Confidence, the Elementary Years (K-6), is the definitive action manual and reference guide for parents of school-age children. It is the first complete, high quality book that combines: 1. A thorough discussion of child and family needs in schools. 2. Research based guidance on school quality, regardless of school type. 3. A complete toolkit to organize the choice process for parents. Picky Parent Guide contains 22 Confident Choice Tools, checklists, and

tables that organize and simplify the whole process. Readers can create customized lists of questions to ask principals, teachers and other parents when visiting schools based on their own unique child and family needs. The authors, nationally recognized school choice experts and parents of school-age children, Bryan C. Hassel, Ph.D. and Emily Ayscue Hassel have advised leaders from the school house to the White House. Here they help you get what your child deserves from school.

Save some green by going green with these environmentally friendly gadgets! With concern for the future of our environment growing stronger and more serious every day, there has never been a better time to take a new approach to some of the most popular gizmos and gadgets on the market and learn how you can convert to electronics that have minimal environmental impact. Green gadgets encompass everything from iPods to energy-efficient home entertainment devices to solar laptop chargers and crank-powered gizmos. This helpful resource explains how to research green gadgets, make a smart purchasing decision, use products you already own in a more environmentally friendly way, and say goodbye to electronics that zap both energy and money. Explore the environmental and financial benefits of green gadgets with this friendly reference Discusses which gadgets save energy-and which ones create energy Learn ways to offset your carbon footprint when you can't reduce consumption Get tips for understanding products labels and avoiding "greenwash" Discover how to calculate the energy and money your gadgets consume Get moving and start living green with this informative guide to environmentally and wallet-friendly gadgets! Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

Coevolution of Black Holes and Galaxies Springer Nature
This is a well thought-out, highly practical text covering contemporary 'in vitro' techniques for drug absorption studies. Starting at the molecular level of investigation, it continues with cell monolayer models (both primary and cell lines) and culminates with in situ techniques as a final testing format. In addition, chapters on high-throughput assays, in vitro-

in vivo correlation, bioinformatics and regulatory issues are covered, giving a comprehensive overview of available models and techniques. Moreover, an appendix consisting of a number of practical protocols is available online, updated as needed, and should prove very helpful to apply the techniques directly to the benchside.

Dealing with the volume, complexity, and diversity of data currently being generated by scientific experiments and simulations often causes scientists to waste productive time. Scientific Data Management: Challenges, Technology, and Deployment describes cutting-edge technologies and solutions for managing and analyzing vast amounts of data, helping scientists focus on their scientific goals. The book begins with coverage of efficient storage systems, discussing how to write and read large volumes of data without slowing the simulation, analysis, or visualization processes. It then focuses on the efficient data movement and management of storage spaces and explores emerging database systems for scientific data. The book also addresses how to best organize data for analysis purposes, how to effectively conduct searches over large datasets, how to successfully automate multistep scientific process workflows, and how to automatically collect metadata and lineage information. This book provides a comprehensive understanding of the latest techniques for managing data during scientific exploration processes, from data generation to data analysis. Enhanced by numerous detailed color images, it includes real-world examples of applications drawn from biology, ecology, geology, climatology, and more. Check out Dr. Shoshani discuss the book during an interview with International Science Grid This Week (ISGTW): <http://www.isgtw.org/?pid=1002259> Carnegie Institution of Washington Wyatt North Publishing, LLC

Two pioneers and innovators in the money management field present their choice of groundbreaking, peer-reviewed articles on subjects including portfolio engineering and long-short investment strategy. More than just a collection of classic review pieces, however, *Equity Management* provides new material to introduce, interpret, and integrate the pieces, with an introduction that provides an authoritative overview of the chapters. Important and innovative, it is destined to become the Graham and Dodd of quantitative equity investing. About the Authors: Bruce I. Jacobs and Kenneth N. Levy are Principals of Jacobs Levy Equity Management. Based in Florham Park, New Jersey, Jacobs Levy Equity Management is widely recognized as a leading provider of quantitative equity strategies for institutional clients. Jacobs Levy currently manages over \$15 billion in various strategies for a prestigious global roster of 50 corporate pension plans, public retirement systems, multi-employer funds, endowments, and foundations, including over 25 of Pensions & Investments' Top 200 Pension Funds/Sponsors. Bruce I. Jacobs holds a PhD in finance from the Wharton School of the University of Pennsylvania. He is the author of *Capital Ideas and Market Realities: Option Replication, Investor Behavior, and Stock Market Crashes* and co-editor, with Ken Levy, of *Market Neutral Strategies*. He serves on the advisory board of the *Journal of Portfolio Management*. Kenneth N. Levy holds an MBA and an MA in applied economics from the Wharton School of the University of Pennsylvania. He is co-editor, with Bruce Jacobs, of *Market Neutral Strategies*. A Chartered Financial Analyst, he has served on the CFA Institute's candidate curriculum committee and on the advisory board of POSIT.

Shipping and Logistics Management serves to consolidate the knowledge its authors have acquired from being educators and observers of the shipping industry. Against the background of a global business environment, it explains how the shipping market functions, examining the strategic and operational issues that affect entrepreneurs in this industry. The authors discuss global trends and strategies in the shipping business, looking at the role of logistics service providers and at how the use of information technology can help shipping operations. *Shipping and Logistics Management* also aims to answer several important questions in the shipping industry, including: what are the shipping cost structures?, what are the patterns of sea transport? and how do companies in the shipping industry operate? An invaluable source of information for researchers and advanced, or graduate, students, *Shipping and Logistics*

Management is also a useful reference for shipping practitioners and consultants.

Drug Absorption Studies Conifer Books

The Jefferson Bible, or The Life and Morals of Jesus of Nazareth as it is formally titled, was a book constructed by Thomas Jefferson in the latter years of his life by cutting and pasting numerous sections from various Bibles as extractions of the doctrine of Jesus. Jefferson's composition excluded sections of the New Testament containing supernatural aspects as well as perceived misinterpretations he believed had been added by the Four Evangelists. In 1895, the Smithsonian Institution under the leadership of librarian Cyrus Adler purchased the original Jefferson Bible from Jefferson's great-granddaughter Carolina Randolph for \$400. A conservation effort commencing in 2009, in partnership with the museum's Political History department, allowed for a public unveiling in an exhibit open from November 11, 2011, through May 28, 2012, at the National Museum of American History.

Large Rivers: Geomorphology and Management explores an important topic in geomorphology and sedimentology: the form and function of major rivers. Our knowledge of the big rivers of the world is limited. It is currently difficult to recognise large rivers of the past from relict sedimentary deposits or to structure management policies for long international rivers. This exciting book brings together a set of papers on large rivers of the world, as a unique introduction to a demanding subject. The book includes thirty chapters and is organised into three sections. The first part is on the environmental requirements for creating and maintaining a major river system. The second is a collection of case studies on 14 large rivers from different continents, covering a range of physical environments. The third section includes chapters on the measurement and management of large rivers. First book to offer in a single volume state-of-the-art knowledge on management and geomorphology of large rivers of the world A pioneering study, pushing the boundaries of our knowledge related to big rivers Includes comprehensive case studies covering the major large rivers of the world including Amazon, Mississippi, Nile, Congo, Indus, and Mekong Written by a leading team of distinguished, international contributors *Large Rivers: Geomorphology and Management* is essential reading for postgraduate students and researchers in fluvial geomorphology, hydrology, sedimentary geology, and river management. It is also of relevance to engineers and environmental consultants in the private and public sectors working on major rivers of the world.

Drawn from a thousand photos taken over fifteen years, *We Animals* illustrates and investigates animals in the human environment: whether they're being used for food, fashion and entertainment, or research, or are being rescued to spend their remaining years in sanctuaries. Award-winning photojournalist and animal advocate Jo-Anne McArthur provides a valuable lesson about our treatment of animals, makes animal industries visible and accountable, and widens our circle of compassion to include all sentient beings.

The Jefferson Bible John Wiley & Sons

Black holes are among the most mysterious objects in the Universe. Weighing up to several billion Suns, massive black holes have long been suspected to be the central powerhouses of energetic phenomena such as quasars. This book contains papers by some of the most influential astrophysicists working in this exciting field. They not only provide spectacular proof of the long-standing paradigm, but unexpectedly reveal that these objects, far from being rare, inhabit the center of virtually every large galaxy.

[Guide to Microforms in Print](#) Cambridge University Press

Metal-rich stars accumulate their metals from previous generations of stars, and so contain the history of their galaxy. By studying these stars we can gain valuable insights into how metals change the formation and evolution of stars, and explain the extraordinary massive star populations observed in the metal-rich region of our own galaxy. Observations of metal-rich regions have shown that stars hosting giant planets are generally metal-rich, which has triggered further observations of metal-rich stars. This has led to the discovery of new exoplanets, and advances in the study of planet

formation and the late chemical evolution of galaxies. This book covers many aspects, from spectral line formation to stellar formation and evolution in high metallicity regimes. It is invaluable to researchers and graduate students in stellar evolution, extragalactic astronomy, and planet formation.

Future Data and Security Engineering. Big Data, Security and Privacy, Smart City and Industry 4.0 Applications Springer Science & Business Media

This book constitutes the proceedings of the 7th International Conference on Future Data and Security Engineering, FDSE 2020, held in Quy Nhon, Vietnam, in November 2020.* The 29 full papers and 8 short were carefully reviewed and selected from 161 submissions. The selected papers are organized into the following topical headings: big data analytics and distributed systems; security and privacy engineering; industry 4.0 and smart city: data analytics and security; data analytics and healthcare systems; machine learning-based big data processing; emerging data management systems and applications; and short papers: security and data engineering. * The conference was held virtually due to the COVID-19 pandemic.

The Universe John Wiley & Sons

The Senior Sleuth's Guide to Technology for Seniors provides an overview of products that help make senior citizens' lives more graceful, independent, invigorating and fun. In this book, the Senior Sleuth will investigate computers, the Internet, and modern technologies related to health and medication management, independent living, communication, travel and transportation, and home entertainment. This lighthearted reference book provides both seniors and their caregivers with a comprehensive look at the types of technologies being produced for their specific needs.

Gale Directory of Databases

Phytomass and Primary Production of the Various Vegetational Zones and of the Entire Biosphere The biosphere is that thin layer at the earth's surface in which living organisms exist and biological cycling takes place. It includes the upper horizons of the soil in which plants root, the atmosphere near the ground, (insofar as organisms penetrate this space), and all the surface waters. More than 99% of the earth's biomass is phytomass, to which we shall limit our discussion. Amounts of phytomass are distinctly related to vegetational zones. Because accurate determination of phytomass and primary production is difficult, only gross estimates have been available until recently. However, in 1970, Bazilevich et al. published (in Russian) more accurate calculations, based on the rapidly accumulating literature, for the various thermal zones and bioclimatic regions of the earth. These authors calculated mean phytomass and mean annual primary production for the various regions as dry mass (in tons) per hectare. On the basis of measurements of the areas covered by the individual regions, excluding rivers, lakes, glaciers, and permanent snow, total phytomass and total annual primary production for the various regions were obtained (see table). The sum of these figures is the phytomass and annual production of the land surface of the earth. In addition, the

table gives corresponding data for the waters of the earth. The values involved are potential i. e. , they are based on natural vegetation uninfluenced by man.
