How Do You

Write a Book? John Wiley & Sons Mobility is fundamental to economic and social activities such as commuting, ma nufacturing, or supplying energy. Each movement has an origin, a potential set οf intermediate locations, a destination. and a nature which is linked with geographical attributes. Transport systems composed of i nfrastructure s, modes and

terminals are so embedded in the socioeconomic life of individuals, institutions and corporations that they are often invisible to the consumer. This is paradoxical as the perceived invisibility of transportatio n is derived from its efficiency. Understanding how mobility is linked with geography is main the purpose of

this book. The third edition of The Geography of Transport Systems has been revised and updated to provide an overview of the spatial aspects of tr ansportation. This text provides greater discussion of security, energy, green logistics, as well as new and updated case studies, a revised content structure, and new figures. Each chapter covers a

specific conceptual dimension including networks, modes, terminals, freight trans portation, urban transportatio n and environmental impacts. A final chapter contains core methodologies linked with transport geography such as accessibility spatial interactions. graph theory and Geographic Information Systems for transportatio

We have worked to make physics interesting and accessible to students while maintaining the mathematical rigor inherent in the subject. With this the content of this textbook has been developed and arranged to provide a logical progression from fundamental to more advanced concepts, building upon what students have already learned and emphasizing connections between topics and

between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses and future careers. The organization and pedagogical features were developed and vetted with feedback from science educators dedicated to the project.
